Supreme Vasat Bhiwandi Tollways Private Limited

mmary of significant accounting policies and other explanatory information for the year ended 31 March 2017

Supreme Vasa Briwands Tollways Private Limited (the Company) is a private limited Company incorporated in India on 1st May,2013. The Company has been set up to develop, establish, construct, operate and maintain a project relating to the construction of the "Chinchot-Kamar-Anjurphata to Markoll road M.S.H. No.4" under "Bullid-Operate"-Trenster" (BOT) basis. The registered office of the company is located at 903-905, Tower-B1,9th floor, millennium

The financial statements of the Company for the year ended 31 March 2017 were authorised for issue in accordance with resolution of the Board of Directors on 30 May 2017.

Note 2.1 Significant Accounting Policies

| Basis of Preparation

The finencial statements of the Company have been prepared to comply in all material respects with the Indian Accounting Standards ("Ind AS") notified under the Companies (Accounting Standards) Rules, 2015.

The financial statements for all periods upto and including year ended 31 March 2016 were prepared in accordance with the Accounting Standards notified under Section 133 of the Companies Act ("the Act), read with Rule 7 of the Companies (Accounts) Rules, 2014 (as amended) ("previous GAAP"). The financial statements for the year ended 31 March 2017 are the first financial statements properly the Company in accordance with Ind AS, Refer Note 2.3 for information on how the Company adopted hid AS.

The financial statements have been prepared under the historical cost convention with the exception of certain financial assets and patilities which have been measured at fair value, on an accrual basis of accounting.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use

All the assets and liabilities have been classified as current or non-current, wherever applicable, as per the operating cycle of the Company as per the guidance set out in Schedule III to the Act, Operating cycle for the business activities of the Company covers the duration of the project including defect liability period and extends up to the payment of liabilities (including retention monies) within the agreed credit period normally applicable to the project.

The Company's financial statements are reported in Indian Rupees, which is also the Company's functional currency, and all values are rounded to the nearest lakhs (INR 00.000), except when otherwise indicated.

Accounting Estimates
The preparation of the financial statements, its conformity with the recognition and measurement principles of Ind AS, requires the management to make estimates and assumptions that affect the reported amounts of assets and itabilities and disclosure of contingent liabilities as at the date of financial statements and the results of operation during the reported period. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates which are recognised in the period in which they are determined.

Estimates and assumptions.

The key assumptions concerning the future and other key sources of estimation uncertainty of the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of ossets and illabilities within the next linancial year, are described below. The Company based its assumptions and estimates on parameters exhibited within the next linancial year, are described below. The Company based its assumptions and estimates on parameters exhibited within the inancial statements were prepared. Existing circumstances and assumptions and sufficient exhibited the control of the Company. Such changes are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

Impairment of non-financial assets
The Company assesses at each reporting data whether there is an indication that an asset may be impaired. If any indication exists, or when annual
Impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an
asset's or Cash Generating Linit's ICGU's lair value less costs of disposal and its value in use, it is determined for an individual asset, unless the asset
does not generate cash inflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset or CGU
exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.
In assessing value in use, the estimated future cash flows are dispounted to their present value using a pre-lox discount rate that reflects current market
assessments of the time value of money and the risks specific to the asset, in determining fair value jets cast of disposal, recent market transactions are
taken into account. If no such transactions can be identified, an appropriate valuation model is used. These Calculations are corroborated by valuation

multiples or other available fair value indicators.

impairment of financial assets

impariment of interceal assets. The company uses judgement in The impariment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making linear assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

Informed tax essets in a season to the control of the control of the deferred income tax assets will not be realizability of deferred income tax assets will not be realized. The ultimate regization of deferred income tax assets is dependent upon the generation of future taxable income during the periods in which the temperary differences become deductivite. Management considers the scheduled reversals of deferred income tax ilabilities, projected future taxable. income, and tax planning strategies in making this assessment. Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred income tax assets are deductible, management believes that the Company with resture the benefits of those eductible differences. The amount of the deferred income tax assets considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carry forward period are reduced.

As per the Service Concession Agreements, the Company is obligated to carry out resurfacing of the roads under concession. The Company estimates the likely provision required towards resurfacing and accrues the costs over the period at the end of which resurfacing would be required, in the statement of profit and loss in accordance with Ind AS 37 "Provisions, Contingent Liabilities and Contingent Assets".

III Property, Plant and Equipment

Property. Plant and Equipment are stated at cost of acquisition including attributable interest and finance costs, if any, till the date of acquisition installation of the assets less accumulated deproclation and accumulated impairment losses, if any. Subsequent expenditure relating to Property, Plant and Equipment is capitalised only when it is prohable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to the Statement of Profit and Loss as incurred. The cost of the relationship is the statement of Profit and Loss as incurred. The cost of the relationship is the statement of Profit and Loss as incurred. The cost of the relationship is the statement of Profit and Loss as incurred. The cost of the relationship is the statement of Profit and Loss as incurred. The cost of the relationship is the statement of Profit and Loss as incurred. The cost of the relationship is the statement of Profit and Loss as incurred. The cost of the relationship is the statement of Profit and Loss as incurred. The cost of the relationship is the statement of Profit and Loss are considered with the relation in the relationship is the statement of Profit and Loss are considered with the relationship is the statement of Profit and Loss are considered with the relation in the cost of the Relationship is the statement of Profit and Loss are considered with the relation in the relation in the relation is the relation in the relation in the relation is the relation in the rel accumulated depreciation are eliminated from the financial statements, either on disposal or when retired from active use and the resultant gain or loss ar recognised in the Statement of Profit and Loss

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or lose analog on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted

Capital work-in-progress represents expenditure incurred in respect of assets under development and not ready for its intended use pre-certled at cost. Cost includes the cost of replacing part of the plant and equipment and borrowing its for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred

On transition to Ind AS, the Company has opted to continue with the carrying values measured under the previous GAAP as at 1 April 2015 of its Property, Plant and Equipment and use that carrying value as the deemed cost of the Property, Plant and Equipment on the date of transition (e. 1 April 2015.

ly Intangible Assets

Triangine assets. Under the Concession Agreements, where the Company has received the right to charge users of the public service, such rights are recognised and classified as "Intangitied Assets". Such right is not an unconditional right to receive consideration because the amounts are conlingent to the extent that the public uses the service and thus are recognised and classified as intangible assets. Such an intangible asset is recognised by the Company at cost (which is the fair value of the consideration received or received for the construction services delivered) and is capitalized when the project is complete in all respects and when the companies receives the completion certificate from the authority as specified in the Concession Agreement.

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets ocquired is their fair value at the date of ecquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the ceriod in which the expenditure is incurred.

On transition to Ind AS, the Company has opted to continue with the carrying values measured under the previous GAAP as at 1 April 2015 of its "Tolk Collection Rights" (Intengible Assets) and used that carrying value as the deemed cost of the Intengible Assets on the date of transition i.e. 1 April 2015.

Depreciation/ Amortisation

Depreciation on property, plant and equipment is calculated on a SLM basis using life rates arrived at based on the useful lives estimated by the management which coincides with the rates as per Schedule II of the Companies Act, 2013

Toll Collection Rights

roll Collection Rights are amortised over the period of concession i.e. 7 years 6 months, using revenue based amortisation as prescribed in Ind AS 38. Under this method, the carrying value of the rights is amortised in the proportion of actual lotf revenue for the year to projected revenue for the balance toil period, to reflect the pattern in which the assets economic benefits will be consumed. At each balance sheet date, the projected revenue for the balance tot period is reviewed by the management. If there is any change in the projected revenue from previous estimates, the amortisation of foll collection rights is changed prospectively to reflect any changes in the estimates.

Gains or losses arising from derecognition of an intengible asset are measured as the difference between the net disposal proceeds and the carrying amount of the esset and are recognised in the statement of profit or loss when the asset is derecognised.

Intergrible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

a Financial Assets

Initial Recognition

in the case of financial assets not recorded at fair value through profit or loss (FVPL), financial assets are recognised initiatly at fair value plus transaction costs that are directly stiribusoits to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or set the asset

Subsequent Measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

rueig

Financial Assets at Amortised Cost

Vesa.

Financial sests ar amonisor. Cost Financial sests are subsequently measured at amortised cost if these financial sests are bedd within a business model whose objective is to hold these assets in order to collect contradual cash flows and the contractual terms of the financial asset give rise on specified dieties to cash flows that are solely payments of principal and interest on the principal amount outstanding. Interest flooring from these financial assets is included in finance income using the effective interest rate ("EIR") method, impairment gains or losses arising on these assets are recognised in the Statement of Profit and Loss

Supreme Vasal Bhiwandi Tollways Private Limited

Summary of significant accounting policies and other explanatory information for the year ended 31 March 2017

Financial Assets Measured at Fair Value
Financial assets are measured at fair value through other comprehensive income ("QCI") if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows or to sell these financial assets and the contractual terms of the inancial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in the Statement of Profit and Loss

Financial asset not measured at amortised cost or at fair value through OCI is carried at FVPL

impairment of Financial Assets

In accordance with Ind AS 109, the Company applies the expected credit loss ("ECI.") model for measurement and recognition of impairment toss on financial assets and credit risk exposures.

For recognition of impairment loss on financial assets and risk exposure, the Company determines that whether there has been a significant increase in the orbit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, inferime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since inlinal recognition, then the enjity reverts to recognising impairment loss allowance based on 12-month ECL.

ECL is the difference between all contractual cash flows that are due to the group in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR, Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL Impairment loss allowance (or reversal) recognised during the period is recognised as income/ expense in the Statement of Profit and Loss.

De-recognition of Financial Assets

The Company de-recognities a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all risks and rewards of ownership of the asset to another entity.

If the Company refilter transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the assets and an associated liability for amounts it may have to pay,

If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

b Equity Instruments and Financial Liabilities Financial liabilities and equity instruments issued by the Company are classified according to the substance of the contractual arrangements entered Into and the definitions of a financial liability and an equity instrument.

Equity Instruments
An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its flabilities. Equity instrument is should are issued for cash are recorded at the proceeds received, net of direct issue costs. Equity instruments which are issued for consideration other han cash are recorded at fair value of the equity instrument.

Financial Liabilities

Initial Recognition
Financial liabilities are classified, at initial recognition, as furuncial flabilities at EVPL, foans and borrowings and payables as appropriate. All financial liabilities recognised initially at fair value and, in the case of loans and botrowings and payables, not of directly attributable fransaction costs.

Subsequent Measurement

The measurement of financial liabilities depends on their classification, as described below

Loans and borrowings

Loans and borrowings
This is the category most relevant to the Company. After initial recognition, interest-bearing loans and borrowings are subsequently measured at americaed osst using the EIR method. However, the company has borrowings at floating rates. Considering that the impact of restatement of effective interest rate, year on year due to reset of interest rate, is not material and hence the company is amortising the transaction cost in straight line basis over the remure of the loan. Geins and losses are recognised in profit or loss when the liabilities are derecognised as well as through the transaction cost amortisation process. This category generally applies to borrowings.

Financial Babilities at FVPL

remental industries at EVPL include financial flabilities held for traning and financial liabilities designated upon mittal recognition as at EVPL. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. Gains or losses on liabilities held for trading are recognised in the profit or loss.

& K.

ndi Toliways Private Limited

Summary of significant accounting policies and other explanatory information for the year ended 31 March 2017

Financial flabilities at amortised cost

After intil recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR metrod. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in the Statement of Profit and Loss.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

Where the Company issues compulsorily convertible debenture, the fair value of the tiability portion of such debentures is determined using a market interest rate. This value is recorded as a liability on an amortised cost basis until extinguished on conversion of the debentures. The remainder of the proceeds is attributable to this equity portion of the instrument. This is recognised and included in shareholders' equity (net of income tax) and are not subsequently re-measured.

Where the terms of a financial liability is re-negoliated and the Company issues equity instruments to a creditor to extinguish all or part of the liability (debt for equity swap), a gain or loss is recognised in the Statement of Profit and Loss; measured as a difference between the carrying amount of the financial liability and the fair value of equity instrument issued.

De-recognition of Financial Liabilities

Financial liabilities are de-recognised when the obligation specified in the controct is discharged, cancelled or expired. When an axisting financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are aubstantially modified, such an exchange or modification is treated as de-recognition of the original hiability and recognition of a new hability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Liss.

Offsetting Financial Instruments

Financial assets and financial (labifilities are offset and the net amount is reported in the Batance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis to realise the assets and settle the (liabifilies simultaneously

vil Cash and Cash Equivalents

Cash and cash equivalents in the Balance Sheet comprises of cash at banks and on hand and short-term deposits with an original maturity of three month or less, which are subject to an insignificant risk of changes in value.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that the Company incurs in connection with the borrowing of funds. Also, the EIR amortisation is included in finance costs.

Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be retiably measured. regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into eccount contractually defined terms of payment and excluding times or duties collected on behalf of the government.

The specific recognition criteria described below must also be met before revenue is recognised.

Income from toll collection are recognised on actual collection of toll revenue. However, in case of monthly coupons, income is recognised proportionate to the utilisation till the date of balance sheet.

b Compensation from government

Compensation towards loss of revenue from exempted vehicles, granted by the government (competent) authority, is accrued as other operating ue in the period for which they are receivable

c Interest income

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rates applicable. For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (E/R). E/R is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial exact to the amortised cost of a financial flability. When estociating the effective interest rate, the company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, estension, call and elimiter options) but does not consider the expected credit losses, interest income is included in finance income in the Statement of Profit and Loss.

x Income Tax

Income fax comprises of current and deferred income fax income fax is recognised as an expense or income in the Statement of Profit and Loss, except to the extent it retates to items directly recognised in equity or in OCI.

Current income lax is recognised based on the estimated lax liability computed after taking credit for allowances and exemptions in accordance with the Income Tax Act, 1951. Current income the assets and liabilities are measured at the amount expected to be recovered from or paid to the assets and allowing any advantage. The textures are transferred to the amount of the amount

b. Deferred Income Tax

Deterred tax is determined by applying the Balance Sheet approach. Deferred tax assets and habitiles are recognised for all deductible temporary differences between the financial statements' carrying amount of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using the enacted tax rates or tax rates that are substantively enacted at the Balance Sheat date. The effect on deferred tax assets and liabilities of a change in tax rates is recognised in the period that includes the enactment date. Deferred tax assets are only recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Such assets are reviewed at each Balance Sheet date to reassess realisation.

S. 64

conu

Supreme Vasai Rhiwandi Tollways Private Limited

Summary of algorificant accounting policies and other explanatory information for the year ended 31 March 2017

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities. Current tax assets and tabilities. Current tax assets and tabilities are offset where the entity has a logally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Minimum Alternative Tax ("MAT") credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognised as an asset in accordance with the recorrerendations contained in Guldance Note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the Statement of Profit and Loss and shown as MAT Credit Entitlement. The Company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal Income Tax during the specified period.

xi Impairment of Non-Financial Assets

impairment or non-inflancial assets. As at each Balance Sheet date, the Company assesses whether there is an indication that a non financial asset may be impaired and also whether there is an indication of reversal of impairment loss recognised in the previous periods. If any indication exists, or when annual impairment losing for an esset is required, the Company determines the recoverable amount and impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount.

Recoverable amount is determined:

- In case of an individual assets, at the higher of fair value of less cost to sell and value in use, and

- in case of cash generating unit (a group of assets that generates identified, independent cash flows), at the higher of cash generating unit's fair value of less cost to self and value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using pre-lox discount rate that reflects current market assessments of the time value of money and risk specified to the assess, in determining fair value less cost to self, recent market transaction are taken into account. If no such transaction can be identified, an appropriate valuation model is used.

impairment losses of continuing operations are recognised in the Statement of Profit and Loss, except for properties previously revalued with the revaluation taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation

When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amount are written off, if the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, then the previously recognised impairment loss is reversed through the Statement of Profit and Loss.

all Earnings Per Strare

Earnings Per Share

Basic earnings per share is computed by dividing the net profit or loss for the period attributable to the equity shareholders of the Company by the weighted average number of equity shares outstanding during the portod. The weighted average number of equity shares outstanding during the portod and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares, that have changed the number of equity shares outstanding, without a corresponding change in resources.

Diluted earnings per share is computed by dividing the net profit or loss for the period attributable to the equity shareholders of the Company and weighted overage number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been equally issued at fait value (i.e. the average market value of the outstanding equity shares).

xIII Provisions, Contingent Liabilities and Contingent Assets
A provision is recognized when the Company has a present obligation (legal or constructive) as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, in respect of which a reliable estimate can be made of the amount of obligation. Provisions are determined based on management's estimate required to settle the obligation at the Balance Sheet date. In case the time value of money is material, provisions are discounted using a current pro-tax rate that reflects the risks specific to the liability. When discounting is used, the increase in this provision due to the passage of time is recognised as a finance cost. These are reviewed at each Balance Sheet date and adjusted to reflect the current management estimates.

Confungent liabilities are disclosed in respect of possible obligations that arise from past events, whose existence would be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. A confingent fiability also arises, in rare cases, where a liability cannot be recognised because it cannot be measured reliabily.

Contingent assets are neither recognised nor disclosed in the financial statements

xly Segment information

The Company is engaged in "Road Infrastructure Projects" which in the context of the AS 108 "Operating Segment" notified under section 133 of the Act is considered as the only segment. The Company's activities are restricted within India and hence no separate geographical segment disclosure is

Standard Issued but not yet offective

Sentiate residence for this year officered in March 2017, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) (Arrived Internal Rules, 2017, hothlying amendments to Ind AS 7, "Statement of cash flows". These amendments are in accordance with the recent emendments made by International Accounting Standards Board (IASS) to IAS 7, "Statement of cash flows". The amendments are applicable to the Company from 1 April 2017

The amendment to Ind AS 7 requires the entitles to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes, suggesting inclusion of a reconcilation between the opening and closing balances in the balance sheet for liabilities arising from financing activities, to meet the disclosure requirement. The Company is evaluating the requirements of the amendment and the effect on the financial statements is being evaluated.

Supreme Vasal Bhiwandi Tollways Private Limited
Summary of significant accounting policies and other explanatory information for the year ended 31 March 2017

Note 2.3 Disclosures as required by Indian Accounting standard (Ind AS) 101 First time adoption of Indian accounting standard

The Company has adopted find AS with effect from 1 April 2015 with comparatives being restated. Accordingly the impact of transition has been provided in the Opening Reserves as at 1 April 2015 and all the periods presented have been restated accordingly.

Exemptions availed on first time adoption of ind AS 101:

On first time adoption of Ind AS, Ind AS 101 allows certain exemptions from the retrospective application of cortain requirements under Ind AS. The Company has availed the following exemptions:

- a Since, there is no change in the functional currency of the Company, it has opted to continue with the corrying values measured under the previous GAAP and use that carrying value as the deemed cost for property, plant and equipment and intengible assets on the date of transition.
- b Fair value measurement of financial assets or liabilities at initial recognition. The Company has not applied the provision of Ind AS 109, Financial Instruments, upon the initial recognition of the financial instruments where there is no active market

tt Exceptions
The following mandatory exceptions have been applied in accordance with Ind AS 101 in preparing the financial statements:

Estimates

The estimates as at 1 April 2015 and 3 I March 2016 are consistent with those made for the same dates in accordance with previous GAAP (after adjustment to reflect and differences if any, in accounting policies) apart from impairment of financial assets based on the expected cradit loss model where the application of previous GAAP did not require estimation

The estimates used by the Company to present the amounts in accordance with the Ind AS reflect conditions that existed at the date on transition to Ind AS.

b Derecognition of financial essets
The Company has elected to apply the derecognition requirements for financial assets and financial liabilities in ind AS 109 prespectively for transactions occurring on or after the date of transition to Ind AS

c Classification and movement of The Company has classified the financial assets and liabilities in accordance with ind AS 109 on the basis of facts and circumstances that existed at the date on transition to Ind AS.

iii. Reconciliation of equity as previously reported under previous GAAP to ind AS:

Explanation for reconciliation

1. Subordinated debt
Subordinated debt is quasi-equity as it is the part of total project cost which need s to be incinced by the company. Further, cash flow on eccount of repayment of the sub-debt will not be withdrawn till end of the period and will be repayable of the discretion of the company. As subordinated debt is to be pell at the discretion of one company and it avidences a residuel interest of Spontors in the pasters of the company after deduction all of its liabilities, it satisfies the definition of a puttable equity instrument, trace, as on transition date, subordinated debt has been classified into other equity.

2. Other financial assets - Financial guarantees
Under Ind AS, the financial guarantee given by the ultimate holding company to the lender of the Company for its horrowings are recognised initially as a liability at fair value which is subsequently amortised as an interest expanse to the Statement of Profit and Loss. This transaction was not recorded under the provious GAAP.

3, Provisions
Under the previous GAAP, discounting of provisions was not permitted. Under the AS, provisions have been measured at discounted amounts.

Under tind AS, loans are valued at present value as compared to being carried at cost in the previous GAAP. This adjustment includes the difference between the book value and the present value of an interest free loan or loan below market rate given to group companies. The interest on the present value of this loan is recognised over the tenure of the loan using the EIR method.

5. Income tax

Deferred income tax

The Company has not recognized deferred tax assets on the adjustments made on transition to Ind AS as at 31 March 2016 in the absence of reasonable certainty.

6. Other comprehensive income Under the provious GAAP, the Compeny has not presented OCI separately. Hence, it has reconciled previous GAAP profit or loss to profit or loss as per Ind AS. Further, pravious GAAP profit or loss is reconciled to total comprehensive income as per Ind AS.

7. Other equity
Adjustments to retained earnings and OCI have been made in occardance with Ind AS, for the above mentioned transition froms.

iv Statement of cash flow

There were no significant reconciliation items between cash flows prepared under previous GAAP and those prepared under Ind AS.

mary of significant accounting policies and other explanatory information for the year ended 31 March 2017

Note 25 Financial risk management objectives and policies

The Company's activities expose it to a variety of threncest tasks market risk, credit risk and liquidity risk. The Company's focus is to foresee the unpredictability of francial markets and seek to markinize potential adverse effects on its financial performance.

Market risk to the risk that the fall value of future cosh flows of a financial instrument will fluctuate because of changes in market prices. Market risk majority includes interest rate risk. Major financial instruments effected by market risk includes loans and borrowings bearing floating interest rate.

Interest rate sensitivity
The following table demonstrates the constituty to a reasonably possible change in interns: rates on that person of loans and berrowings affected. With all other variables held constant, the Company's profit before tax is affected through the impact on loating rate borrowings, as follows:

	Veer ended 3) March 2017 Rs. in (aths	Year ended 31 March 2018 Rs-In leths
Increase in interest rate by	1%	1%
Effect on profit before tax	(200 27)	(180 58)
Decrease in exterest rate by	1%	1%
Effect on profit before tax	200 27	180 58

If Credit risk
The tompetry engages in intrastructure development and construction business varior RQT and currently derive most of the turnover from BQT contracts with PMD.
Plyments by ere synically not encured by any form of credit support such as letters of credit, portormance guarantees or estore enrangement. Credit risk is the risk trust countripanty with not mere its obligations under a financial instrument, feeding to a financial loss. The Computity is exposed to credit risk from its operating activities and from its financing editions.

Financial assets that are potentially subject to concentrations of credit risk and feitures by counter-parties to discharge their obligations in full or in a limety manner consist principally of cash, cash equivilents and other reconsists. Choose risk, on cash before, with borst are limited because the moure-marks are entities with ecceptable credit ratings. The europeant to credit risk for other receivable is four as its mainly consist of Government authorities i.e. PWO and amount is received on limby best within the credit period which is about 90 to 120 days.

Ageing enabysis of the age of receivable amounts from government authorities that are plast due as at the end of reporting year but not empeired

	As at As at	
Particulars	31 March 2017 31 March 2016	
	Rs. in lakhs Rs. in takhs	
Lèss than 120 days	S3 59 56 29	
Over 120 days	309 28	
Total	382,80 56.29	

The liquidity risk is manageri on the basis of expected masurey dates of the ferencial habities

The energies sents period telen to settle trace payables is about 90 to 120 days. The other payables are with short-term durations. The corrying amounts are assumed to be a reasonable approximation of fair value.

iii Liquidity risk. Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incaming unacceptable losses. The Company of objective is to, as all times maintain optimum lovels of logicity to meet its cash and collateral requirements. The Company closely monitors its figurely position and deploys a robust cash management system it maintains adoptate sources of financing including debt from lenders at an optimised cost.

The table below provides detaits regarding the contractual maturities of significant financial liabilities.

Supreme Vasai Bhiwandi Tollways Private Limited

Summary of algorificant accounting policies and other expluratory information for the year wided 31 March 2017

Note 26 Capital management

For the purpose of the Company's capital management, capital includes insued equity capital and all other equity reserves attributable to the equity holders of the Company three to safeguard its ability to containe early going concern so that they can maximize roturns for the shareholders and benefits for other stake holders. The aim to maintain an optimal capital sluctures and minimize cost of capital.

The Company manages its capital situature and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may return capital to statementers, issue new states or adjust the dividend payment to shareholders (if permitted) Consistent with others in the industry the Company monitor as capital using the genting ratio which is total relatively byte folial deprivations.

				Az at	As at	As at
			*	31 March 2017	31 March 2015	1 April 2015
				Rs. in takhs	Ro. in lakha	Rs. in takhs
Total debt		•		24,075 53	20,027,47	18,057.89
Total equity				. 731 44	3.887.54	4,844 04
Total debt to total equity plus total o	el-I (Gearing ratio %)			97%	84%	78%

In the long run, the Company's strategy is to keep optimum genong ratio (,c. between 60% to 88%

In order to achieve this overall objective, the Company's capital management, enumgs other things, evins to ensure that it meets fluencial coverients effected to the stress-theoring loans and borrowings that define the capital stroduce requirements. Broaches in meeting the financial coverients would permit the benk to immediately call loans and borrowings. Subsequent to assignment of borrowings as stated annote 10, there have been no communications from the tenders in this regard which might never energiethe impact on the goarning ratio. No changes were made in the objectives, policies or processes for managing capital during the years writted 31 March 2017 and 31 March 2016.

Note 27 Income tax

Current fax

No provision for current fax has been made as there is no taxable incurrentsook profit for the year under the provisions of the income-tax Act, 1961

Deferred tax
The Company has not recognised deterred tax assats on liming differences, unabsorbed depreciation and carry surward of tax losses as at 31 March 2017 in the absence of reasonable containty that sufficient future taxable income will be available against which such deferred tax assats can be cellised.
