REFER SCHEDULE "L" OF VOLUME-I

Concessionaire

P.B.
Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

SCHEDULE-I

Item No.	Item of work	Reference to Standard (P.W.D.) Specification in Red Book Volume I 1981 Edition / Specification for Road and Bridge works, Ministry of Road Transport and Highways 2001 Edition		Additional Specification if any.
		Specification Number	Page Number	
1.	2.	3.	4.	5.
1.	ITEM NO.(1):- Excavation for roadways in soft strata such as earth soil of all sorts sand, gravel or soft, murum, hard murum and boulders including dressing section to the required grade, camber and side slopes and conveying the excavated materials with all lifts and leads and spreading for embankment or stacking, disposing as directed etc. complete.	Rd-2 Rd-3 Rd-4	P-180 P-183 P-184	This shall include all kinds of rock or shale indurated clay soil, silt sand and gravel soft average and hard murum and any other materials which can best be removed with a shovel after loosening with a pickaxe or bar. It shall also include isolated boulders upto 0.10 cubic metre each which do not need blasting and could be removed with a pick bar and shovel. The excavated materials shall be utilized in the respective items of the work as required as per specifications of the item concerned and as directed by the engineer - in - charge.
2.	ITEM NO.(2):- Watering and compacting of embankment formed of materials obtained from the road cutting, with all leads and lifts leads and lifts to 95% of standard proctor density after laying them in layers of 20 to 30 cm with vibratory roller roller etc. complete.	MORT & H 101 to 126 305 201	3 to 37 67 to 83 41 to 43	Material for embankment shall be used after testing for quality and approval from Engineer in charge.

Concessionaire:

B
Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

3.	ITEM NO.(3):- Providing earth work in embankment with approved materials obtained from departmental land or other sources specified by Engineer in-charge, with all leads including all lifts, laying in layers of 20 to 30cm thickness, breaking clods, dressing to the required lines, curves, grade & section, watering and compaction to 100% of standard proctor density with static roller etc. complete.	MORT & II 101 to 126 305 201	3 to 37 .67 to 83 41 to 43	Material for embankment shall be used after testing for quality and approval from Engineer in charge.
4.	ITEM NO (4):- Supplying 60 mm trap stone metal at the road side for metal including conveying & stacking with all leads and lifts etc. complete	Rd.19(a)	P-199	The materials shall be got tested from the approved laboratory before use at the cost of the contractor. He must preserve the forest conservation act 1980 he is fully, wholly and solely, responsible for violation of forest conservation Act 1980. If the Government quarries are not available, it will be responsibility of the Entrepreneur to obtain the materials from the private quarry at his own cost for which the contractor should obtain the permission of the owner and the competent authority at his own and no claim for extra lead charges will be entertained.

Concessionaire

Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

5.	ITEM NO.(5):- Supplying 40 mm trap stone metal at the road side for metal including conveying & stacking with all leads and lifts etc. complete.	Rd-22 MORT & H 101 to 126 407 900 Rd-23	P-201 3 to 37 128to130 137to143 202	- do -
6.	ITEM NO.(6):- Supplying hard murum at the road side, including conveying and stacking with all leads and lifts etc. complete.			The materials shall be got tested from the approved laboratory before use at the cost of the concessionaire. The finished surface of hard murum side shoulder shall be at 5% slope.
7.	ITEM NO.(7):- Supplying soft murum at the road side including conveying and stacking with all leads and lifts etc. complete lead	Rd-24	P-203	- do -
8.	ITEM NO.(8):- Supplying stone dust of trap stone aggregate at the road side, including conveying and stacking with all leads and lifts for use in bituminous road surface etc complete.	Rd-41	P-215	- do -
9.	ITEM NO.(9):- Spreading oversize 40mm and 60mm metal including sectioning and with all leads and lifts etc. complete.	Rd-29 Rd-34	P-205 P-208	- - -
10.	ITEM NO.(10):- Spreading hard murum, soft murum & stone dust over the rubble soling, oversize and size metal layer / Bandage on W.B.M. surface and with all leads and lifts etc. complete.	Rd 28,31,36, 37	P-205, 206, 211	Prior to spreading of materials, permission for spreading should be obtained from the Engineer - in - Charge.
11.	ITEM NO.(11):- Compacting oversize metal (200mm loose) layer by vibratory roller including necessary, labour, materials and artificial watering etc. complete.	Rd-32	P-206	- - -

Concessionaire

Engineer-in Charge

GOVERNMENT OF MAHARASHTRA

12.	ITEM NO.(12):- Compacting the size metal (100 mm loose) layer with vibratory roller, including necessary labour, materials and artificial watering etc. complete.	Rd-35	P-209	
13.	ITEM NO.(13):- Providing and laying granular sub base (GSB) of compacted thickness of 150mm in two layers, each layer not exceeding 75mm compacted thickness with specified graded gravel in sub base coarse, including conveying all material, with all leads and lifts labour, machinery to the site of work, spreading specified graded gravel in uniform layers on prepared surface, watering and compacting with vibratory roller etc. complete.	MORT & H 101 to 126 401 900	3 to 37 101to105 337to343	The materials shall be got tested from the approved laboratory before use at the cost of the concessionaire. The grading of material shall be as per table 400-2 with CBR value shall not be less than 20% with grading III.
14.	ITEM NO.(14):- Providing, laying, spreading and compacting graded stone aggregate to wet mix macadam specifications including premixing the material with water to OMC in mechanical mix Plant, carriage of mixed material by tipper to site, laying in uniform layers with paver in sub-base/base coarse on a well prepared surface and compacting with vibratory roller to achieve the desired density including lighting, guarding, barricating and maintenance of diversion and all material with all leads and lifts etc. complete.	MORT & H 406		The materials shall be got tested from the approved laboratory before use at the cost of the concessionaire.

Concessionaire

Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

15.	ITEM NO.(15):- Providing and applying primer coat with bitumen emulsion on prepared surface of granular base and spraying primer at the rate of 0.60 per Kilogram per sq.mt. using mechanical means including clearing of road surface, and supplying materials with all leads and lifts etc. complete.	MORT & H 101 to 126 501 503 900	3 to 37 139 to 154 157 to 160 337 to 343	i) Emulsion of Indian Standard grade shall be used. ii) For controlling traffic, construction & maintenance of diversion, is to be done at the cost of concessionaire no extra claim for payment shall be entertained for this. iii) The work shall be carried out in day time only in ordinary whether.
16	ITEM NO.(16):- Providing and laying bituminous tack coat, @ 50 Kilogram per sq.mt. over R.T. surface mechanical sprayer including supplying all materials, with all leads and lifts preparing the existing surface, heating bitumen and applying tack coat evenly on the surface etc. complete. (using 60/70 grade)	MORT & H 101 to 126 501 503 900	3 to 37 139 to 154 157 to 160 337 to 343	i) Bitumen of Indian Standard grade shall be used. ii) For controlling traffic, construction & maintenance of diversion, is to be done at the cost of concessionaire, no extra claim for payment shall be entertained for this. iii) The work shall be carried out in day time only in ordinary whether.

Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

17.	<p>ITEM NO.(17):- Providing and laying hot mix hot laid bituminous macadam 75 mm average thickness with 3.3% Bitumen content bitumen by weight of total mix for leveling course to remove irregularities / Base course including diversion of traffic supply of all materials, with all leads and lifts heating bitumen and chips in drum mix plant, cleaning the road surface, laying bituminous macadam by paver finisher including compacting with vibratory roller transportation and cost of all materials, bitumen from refinery etc. complete. (excluding tuck coal)</p>	<p>MORT & H</p> <table border="1"> <tr><td>101 to 126</td><td>3 to 37</td></tr> <tr><td>501</td><td>139 to 154</td></tr> <tr><td>504</td><td>160 to 164</td></tr> <tr><td>900</td><td>337 to 343</td></tr> </table>	101 to 126	3 to 37	501	139 to 154	504	160 to 164	900	337 to 343	<p>i) Bitumen of Indian Standard grade of 60/70 penetration shall be used, ii) For controlling traffic, construction & maintenance of diversion, is to be done at the cost of concessionaire, no extra payment shall be entertained for this iii) The minimum bitumen content shall be 3.3 % as per table 500-4 for grading I page 162 of MORT & H specifications. If bitumen content is more than 3.3 %, no extra cost will be paid. vi) Proper camber superelevation shall be provided as directed by Engineer - in - Charge. vii) Hydrometre analysis test shall be taken for testing of fines in the aggregates to ensure that extensive natural fines are not present in mix. viii) Density shall be checked by taking core of BM by core cutter machine and not by sand replacement method.</p>
101 to 126	3 to 37										
501	139 to 154										
504	160 to 164										
900	337 to 343										

Concessionaire

Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

(1)

18.	<p>ITEM NO.(18):- Providing and laying hot mix hot laid Dense Bituminous Macadam 50/75mm compacted thickness with 4.50 % bitumen content by weight of total mix on prepared surface with specified graded crusher aggregates for the base/binding course including loading of aggregates with F.E. Loader, heating of stone aggregates and bitumen and mixing, in modern drum mix type of hot mix plant transporting the hot mix to work site laying the mixed material with sensor paver finisher to the required grade, level and camber, tolling by power roller and vibratory roller to achieve the desired density. (Grade of Bituasa Should be 30/40) with supplying of all materials with all leads and lifts etc. complete.</p>	MORT & H-507	---	Before execution of work the concessionaire shall get approval to job mix from Engineer-in-charge.
-----	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------	-----	----------------------------------------------------------------------------------------------------

Concessionaire

 Engineer-in-Charge

(12)

GOVERNMENT OF MAHARASHTRA

19.	ITEM NO.(19):- Providing and laying bituminous concrete 40 mm compacted thickness on prepared surface with specified graded stone aggregates for wearing course including loading of aggregates with F.E. Loader premixed with bituminous binder @ 5 per cent of weight of mix and filler @ 2 per cent of weight of aggregate in modern drum type hot mix plant, transporting the mixed material to work site, laying the mix material with sensor paver finisher to the required level, grades and rolling with vibratory & power roller to achieve the desired density. (Grade of Bitumen should be 30/40) with supplying all materials with all leads and lifts etc. complete.	MORT & H-509		Before execution of work the concessionaire shall get approval to job mix from Engineer-in-charge
20.	ITEM NO.(20):- Providing rubble filling of trap/granite/quartzite gneiss stones of approved quality in foundation including hand packing filling gravel of sand in the voids and supplying of all materials with all leads and lifts etc. complete.	MORT & H-2204 RD-57	571 151	
21.	ITEM NO.(21):- Providing and laying in site cement concrete of M-15 proportion with trap material in foundations including necessary compacting and curing and supplying all materials with all leads and lifts etc. complete. (including form work)(This item is for foundation of HP drains)	MORT & H-1300 1701 to 1718 2100	445to449 461to478 565to568	Before execution of work the concessionaire shall get approval to mix design from Engineer-in-Charge.
22.	ITEM NO.(22):- Providing and laying weep holes of 100 mm diameter AC/PVC pipes as per drawing for abutment returns, return walls etc. Complete.	MORT & H-2706	637	The work shall be carried out as per detailed wording of Item and instruction of Engineer - in - charge.

Concessionaire

Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

	23.	ITEM NO.(23):- Providing and laying in situ (Using concrete mixer) reinforced cement concrete M-20 of trap metal for R.C.C. work in solid slab/T-beam & slab / Box girder and balanced cantilever, including centering, formwork, scaffolding, ramming, vibrating, finishing in cement plaster and curing and supplying all materials with all leads and lifts etc. complete (excluding reinforcement) (This item is for slabs of slab drains, minor bridges).	MORT & H- 1500 1701 to 1718	443 to 449 461 to 477	Before execution of work the concessionaire shall get approval to mix design from Engineer-in-Charge.
	24.	ITEM NO.(24):- Providing and cutting, bending, hooking, laying in position and tying Mild steel / HYSD / TMT bars for reinforcement as per detailed drawings for R.C.C. work.	MORT & H 1600	453 to 457	The work shall be carried out as directed by Engineer-In-Charge.
	25.	ITEM NO.(25):- Dismantling carefully the existing structure of stone masonry in cement or lime mortar, including sorting out serviceable materials and stacking the dismantled material with all leads and lifts neatly as directed etc. complete.	-	-	The work shall be carried out as per detailed wording of Item and Instruction of Engineer-in-Charge
	26.	ITEM NO.(26):- Providing and laying in situ cement concrete of 1:3:6 proportion with trap metal in foundations including necessary compacting and curing and supplying all materials with all leads and lifts etc., complete. (including formwork) (This item is for Builtup gutter).	CD-8	P-163	

Concessionaire

Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

(14)

27.	ITEM NO.(27):- Providing and laying cement concrete pipe of IS 458-1988 N.P.4 class in proper line level & slope including providing fixing collars in cement mortar 1:2 and supplying all materials with all leads and lifts etc. complete (including form work) A) 1200 mm dia. B) 900 mm dia. C) 750 mm dia. D) 600 mm dia. E) 300 mm dia. F) 150 mm dia.	MORT & H- 2901to2911 CD-7	663to666 162	
28.	ITEM NO.(28):- Providing, laying, spreading and compacting stone aggregates of specified sizes to water bound macadam specification, including spreading in uniform thickness, hand packing rolling with 3 wheeled steel and vibratory roller 8-10 tonnes in stages to proper grade and camber, applying and brooming requisite type of screening, binding materials to fill up the interstices of coarse aggregates, watering and compacting to the required density making necessary earthen band to protect edges, lighting, guarding, barricading and maintenance of diversion and supplying all materials with all leads and lifts etc. complete. i) Grading- ii) By manual means	MORT & H 101 to 126 404 900	3 to 37 112 to 120 337 to 343	The materials shall be got tested from the approved laboratory before use at the cost of the concessionaire.

Concessionaire

Engineer In-Charge

GOVERNMENT OF MAHARASHTRA

(V)

29.	ITEM NO.(29):- Providing and laying precast polished chequered colour cement tiles of size 20 x 32 and 20 mm thick as per drawing or as directed on bed of 1:4 cement mortar including neat cement float, filling joints with cement slurry mixed with approved shade of pigment to match the colour of tiles, curing, polishing and cleaning and supplying all materials with all leads and lifts etc. complete.	Bd-M-33 B	P-392	
30.	ITEM NO.(30):- Dismantling of Flexible Pavements and disposal of dismantled materials with all leads all leads and lifts stacking serviceable and unserviceable materials separately by Mechanical Means	MORT & H 202	--	--
31.	ITEM NO.(31):- Providing and laying in situ Dry lean cement concrete sub base (M-10) grade of trap metal of specified gradation using minimum cement content of 15 Kg/cum. OPC 43 grade cement mixing as per approved design mix, using batching plant of appropriate capacity, transporting and laying with self propelled paver with electronic sensor device and compacting with vibratory roller of minimum 80-100 KN static weight to give desired compacted density providing construction joints, and curing with liquid curing compound and sprinkling water and covering with moist hessian or piling of water for 7 days including all materials, with all leads and lifts labour, machinery including bailing out water manually, and脚work etc. complete.	MORT&H-601	--	Before execution of work the concessionaire shall get approval to mix design from Engineer-in-Charge

Concessionaire

Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

(19)

32.	ITEM NO.(32): Providing and laying Pavement Quality Concrete of M-40 grade (cast in situ) of trap metal including providing 125 micron thick impermeable plastic sheet membrane over the surface to be covered, coarse and fine aggregates of specified gradation using twinimum cement content of 350 kg/cum., approved admixtures, mixing as per the design mix to the specified workability, providing necessary side forms, rails and guide wires, transporting the mix with transit mixers and laying and spreading with self propelled slip form paving train of required capacity and compacting with plate vibrator and minimum ten needle vibrators, curing with approved resin based aluminised reflective curing compound and covering with moist hessian or ponding and sprinkling of water for a minimum period of 14 days, fixing dowels, tie-bars, cutting joints joint-fillers, sealants and all types of joints and finishing to the desired surface texture including all material, labour, machinery with all leads and lifts etc complete.	MoRT&H 602.	- -	Before execution of work the concessionaire shall get approval to mix design from Engineer-in-Charge.
-----	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------	-----	-------------------------------------------------------------------------------------------------------

Concessionaire

Engineer-In-Charge
(Signature)

GOVERNMENT OF MAHARASHTRA

(A)

33.	ITEM NO.(33):- Providing and fixing precast heavy duty interlocked concrete paving block of 80mm thickness having a strength of 300 kg/Sq.mt. of approved quality and shape on a bed of grit / sand of 65mm thick with C.M. 1:4 striking joints, including neat cement float filling joints with coloured cement slurry all labour all material with all leads and lifts and cleaning etc. complete	IS.15658 : 2006 BS-6717	---	The work shall be carried out as per detailed wording of Item and instruction of Engineer-in-charge.
34.	ITEM NO.(34):- Dewatering including diversion of streams, providing earthen bunds coffer dam etc. as may be necessary for foundation and other parts of the work and bailing out and pumping out water during and after excavation as required (The item include dewatering for excavation upto foundation level, filling foundation and sub structure masonry above water level) By using 3 to 9 Horse power pump.	MORT & H 304.3.3 BR-4	64to65 104to05	Record of dewatering shall be maintained in log book as directed by Engineer - in - Charge.
35.	ITEM NO.(35):- Providing and laying in situ M-20 cement concrete of trap metal for R.C.C. caps over piers and abutments including necessary scaffolding, centering, formwork, compacting by vibrating, finishing and curing and all materials with all leads and lifts etc. complete (excluding reinforcement)	MORT & H 1500 1701 to 1718 2205	443to449 461to478 572	The necessary concrete mix design for grade M-20 shall be carried out such that characteristic strength shall be as per acceptance criteria as per IS456. The minimum cement content shall be as per IRC 21 for severe exposure.
36.	ITEM NO.(36):- Providing expansion joints bituminous pad 25 mm thick	MORT & H 2601to2602	617 to 619	The work shall be carried out as per detailed wording of Item and instructions of Engineer - in - charge.

Concessionaire

(B)
Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

37.	ITEM NO.(37):- Providing Tar paper (as per IS std.) bearing as per details given.	MORT & H- 2001to2002	535	The work shall be carried out as per detailed wording of Item and instruction of Engineer - in - charge.
38.	ITEM NO.(38):- Providing and laying in situ M-15 cement concrete of trap / granite / gneiss metal for R.C.C work including centering, formwork, scaffolding, ramming, vibrating, finishing and curing and all materials with all leads and lifts etc. complete. (excluding reinforcement) (This item is for Slabs on Built up gutters)	MORT & H- 1500 1701 to 1718 2908	443to449 461to477 666	Before execution of work the concessionaire shall get approval to mix design from Engineer-in-Charge.
39.	ITEM NO.(39):- Providing and laying in situ M-20 cement concrete of trap / granite / quartzite / gneiss metal for R.C.C. work of for kerb and ballast walls, for box return etc. including scaffolding, centering, formwork, compaction, finishing and curing and supplying all materials with all leads and lifts etc. complete (excluding reinforcement)	MORT & H- 1500 1701 to 1718	443to449 461to477	—
40.	ITEM NO.(40):- Providing galvanised iron 100 mm diameter/UPVC (SWR) grade 110 mm outer diameter pipe for water spouts as per drawing etc. complete.	BR-55	P-150	—

Concessionaire

Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

16

41.	<p>ITEM NO.(41):- Providing R.C.C. parapet with (15x 60cm) M-25 cement concrete of trap/ granite / quartzite / gneiss metal, cast in situ precast panels as per the detailed drawing including reinforcement, scaffolding, centering, formwork, compating, finishing and supplying all materials with all leads and lifts and curing etc. complete.</p>	<p>MORT & H-</p> <table style="width: 100%; border-collapse: collapse;"> <tr><td style="width: 30%;">1500</td><td style="width: 30%;">443to449</td></tr> <tr><td>1701 to 1718</td><td>461to477</td></tr> <tr><td>2908</td><td></td></tr> </table> <p style="text-align: right; margin-top: -20px;">666</p>	1500	443to449	1701 to 1718	461to477	2908			
1500	443to449									
1701 to 1718	461to477									
2908										
42.	<p>ITEM NO.(42): Providing and laying 90 cm thick flexible stone mat as per standard drawing consisting of 45 cm thick trap rubble soling, 22.50 cm thick over size metal layer of 100 to 150 mm metal, 11.30 cm thick layer of 80 to 100 mm over size metal and 11.20 cm thick layer of 40 mm size metal with blindage of hard murum for rubble soling and over size and soft murum for size metal layer including supplying all materials with all leads and lifts at work site, spreading and compaction etc complete.</p>	<p>MORT & H-</p> <table style="width: 100%; border-collapse: collapse;"> <tr><td style="width: 30%;">2507</td><td style="width: 30%;">612</td></tr> <tr><td>2508</td><td>613</td></tr> </table>	2507	612	2508	613	<p>The work shall be carried out as per detailed wording of Item and instruction of Engineer-in-charge.</p>			
2507	612									
2508	613									
43.	<p>ITEM NO.(43): Dismantling R.C.C. concrete work including breaking concrete by chiselling, wedging etc. including cutting the reinforcement, stacking the serviceable materials and the debris separately with all leads and lifts or spreading the debris as directed by Engineer-in-Charge with all leads and lifts etc complete.</p>			<p>The work shall be carried out as per detailed wording of Item and instruction of Engineer-in-Charge.</p>						

Concessionaire

Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

(29)

44.	ITEM NO.(44):- Shifting of water supply line from road side embankment including reinstalling the road embankment as before in approximate length of 600 meter.			The work shall be carried out as per detailed wording of Item and Instruction of Engineer-in-Charge.
45.	ITEM NO.(45):- Providing selected hard ramum filling including laying in layers of 15 to 20 cu. metering and compacting and supplying all materials with all leads and lifts etc. complete.	CD-14	P-167	
46.	ITEM NO.(46):- Providing R.C.C.(M-15) ordinary kilometre stone of standard design as per IRC:8-1980, including painting, printing, numbering for SH Standard and fixing in C.C.-15 block of size 65 x 55 x 60 centimeter etc. complete.	MORT & H-804 RD-69	326 243to244	The work shall be carried out as per detailed wording of Item and instructions of Engineer - in charge.
47.	ITEM NO.(47):- Providing R.C.C.(M-15) 5th kilometre stone of standard design as per IRC:8-1980,fixing in c.c.M15, block of size 80 x 55 x 60 cms including painting, printing and numbering etc.complete.	MORT & H-804 RD-69	326 243to244	The work shall be carried out as per detailed wording of Item and instructions of Engineer - in charge.
48.	ITEM NO.(48):- Providing R.C.C.(M-15) 200 metre stone of standard design as per IRC:8-1980, fixing in c.c.M15, block of size 80 x 35 x 40 cms including painting, printing, and numbering etc. complete.	MORT & H-806 RD-69	327 243to244	The work shall be carried out as per detailed wording of Item and instructions of Engineer - in charge.

Concessionaire

Engineer-in-Charge

GOVERNMENT OF MAHARASHTRA

49.	<p>ITEM NO.(49):- Providing and fixing informative sign boards in square and rectangular shape of any size made out of 16 Gauge (1.6mm) thick Mild Steel sheet painted with one coat of zinc chromate stovecoating primer and two coats of green stove enamel paint on front side and grey stove enamel on back side and border message/symbols etc. with cutout of white retro reflective sheeting of engineering grade, including M.S. angle frame of size 35 x 35 x 3 MM and two M.S. angle iron post of size 65 x 65 x6MM , 3.65 metre long properly crossed brace with angle iron of size 50 x 50 x 5MM duly painted with alternate black and white bands of 25cm width including G.I. fixtures, fixing the board in 1:4:8 concrete block of size 60 x 60 x 75 cm including transportation etc. complete with 7 years guarantee.</p>	MORT & H- 801to802 IRC-67 (2001)	311to316	The work shall be carried out as per detailed wording of Item and instruction of Engineer-in-charge.

50.	ITEM NO.(50):- Providing Cautionary sign boards 90cm.equitateral triangle with apex point upward prepared on fibre reinforced plate 3.0 millimetre thick bonded with white retroreflective sheeting on Engineering grade having pressure sensitive/heat activated adhesive retroreflective white back ground and red border and back side gray, retroreflective symbols, letters, numerals, arrows, one M. S. angle post of 65 x 65 x 6 millimetre size and 3.65 metre long, inflated bottom and drilled on top, and painting posts with white & black border of 25 centimetres, fitting board to post with 2 numbers of strong G. I. bolts and nuts including transportation & fixing in p.c.c. 1:4:8 etc. complete.	MORT & H-801to802 IRC-67 (2001)	311to316	The work shall be carried out as per detailed wording of item and instruction of Engineer - in - charge. Necessary bond for seven years guarantee shall be furnished by agency.
51.	ITEM NO.(51):- Providing and laying of hot applied White thermoplastic compound 2.5mm thick, traffic lane edge/centre lines strips 10cm. wide, including reflectorising glass beads @250 gms.per sqm area, thickness of 2.5mm is exclusive of surface applied glass beads as per IRC35. The finished surface to be level, uniform and free from streaks and holes etc. complete with 3 years guaranteed.	MORT & H-803	---	The work shall be carried out as per detailed wording of item and instruction of Engineer - in - charge. Necessary bond for seven years guarantee shall be furnished by agency.
52.	ITEM NO.(52):- Providing and painting new Zebra painting of pedestrian crossing on the carriageway with approved road marking paint in two coats etc. complete.(over 10cm wide patta)	MORT & H-803	---	The work shall be carried out as per detailed wording of item and instruction of Engineer - in - charge.

TOLL EQUIPMENTS

1) Automatic Lane Closer	Barrier of Automatic lane closer instrument is in horizontal position when vehicle enters the Toll lane & barrier takes vertical position when road user pays Toll
2) Manual Lane Closer	This is used when lane is required to be closed for longer period to carry out repair work in the lane. This is operated manually by moving swinging arm which spans across the lane.
3) Toll Island Signal	It turns Red when vehicle enters the Toll lane & it turns Green when road user pays Toll amount. It works in co-ordination with Automatic Lane Closer
4) Fog Light/Flickering light	For calling the attention of road user & to make him aware that his vehicle is approaching Toll Plaza. Fog lights are provided in rainy & winter season.
5) Automatic Vehicle Counter & Classifier	Instrument for vehicles classification & counting. It classifies the type of Vehicle & also counts the vehicles passing each lane of Toll Plaza.
6) Toll Lane Camera	The Toll Plaza Manager & control room operator can see activities in each lane on C.R.V. screen.
7) Toll Booth Camera	The Toll Plaza Manager & control room operator can see activities inside the Toll booth.

8) Oversize / over loaded Vehicle detector Sensor	This sensor is provided to detect oversize/overloaded vehicle. Oversize / overloaded vehicle is stopped before entering the toll lane before it causes the damage to the Toll Booth.
9) Toll Booth Computer	To record data of tickets issued, Shift No., Toll Booth No., Date, Time, Number of Vehicle, Type of Vehicle & amount received from the road user.
10) Siren	To be operated by Toll booth operator in case of Emergency to call the attention of Road User, Control room & Toll Supervision.

B7

UNDERGROUND CABLE DUCT

Description:	This Cable duct is provided from Toll Plaza Canopy in Toll Plaza Control Room(Administrative Building) and also from Administrative Building to Transformer, Generator & stabiliser room. The Mild Steel/Galvanised Iron Cable trays are provided as shown in Drawing. One side trays are used to carry computer and Toll equipment related cables and other side trays are used to carry power cables only, to avoid disturbance to computer/toll equipment due to induction. The top of cable duct is covered by removable slabs (covers)
--------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

DELINEATORS

Description:	These are normally provided to demarcate Roadways and it's boundary on high embankment and in cutting. These are also provided near Toll Plaza to demarcate Straight and Merging length. These are available in different sizes ranging from 600 mm to 1400 mm and made up of plastic, M.S. pipes and reinforced plastics. It is provided with reflective tape on the top. It is also many times provided with metal guard to protect reflective tape portion.
--------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

INTERLOCKING PAVER BLOCK TO APPROACH ROAD TO TOLL PLAZA

Description

The interlocking block pavement is provided in the straight approach road of toll plaza. The interlocking blocks are provided on both sides for a length 50m from the center of toll plaza. The interlocking blocks pavement is easy to maintain and can be repaired easily in case of damage to road surface. These interlocking blocks if kept in spare can be used for repairing the damaged portion of road. These interlocking blocks are kept in spare, as they can be used for repairing the damaged portion of road. The traffic can be allowed immediately on the repaired portion of the road as no curing is required for the damaged portion.

Details of Cross

- Overlay Metal Layer (50 mm) = 150 mm Compacted
- Size Metal Layer (40 mm) = 75 mm Compacted
- Dry Lean Concrete (M10) = 200 mm (Compacted)
- Setu stone dash = 50 mm (Compacted)
- Interlocking Blocks (M40) = 89 mm

✓
25

CONCRETE ROAD FOR APPROACH TO TOLL PLAZA

The Concrete Road (P.Q.C.) is another option available in place of interlocking block pavement.

Details of Crust

- G.S.B. in accordance with MORT clause no. 401=150 mm (Optional)
- Wet Mix Macadam in accordance with MORT clause no. 406=75 mm (Compacted)
- Dry Lean Concrete in accordance with MORT clause no. 801=150 mm (Compacted)
- Pavement Quality Concrete(M40) in accordance with MORT clause no. 601 & 704 =350 mm (Compacted)
