### 2. PHYSICAL CHARACTERISTICS OF THE PROPERTY

### **BRIEF DESCRIPTION OF THE PROPERTY UNDER VALUATION**

Snapshot of the Asset/ Property Under Valuation

This Valuation report is prepared for the warehouse property situated at the aforesaid address having total land area admeasuring 1365 sq. yds. (1140.30 sq.mtr.) as per the copy of sale deeds provided to us by the bank.

The subject property is a free hold property purchased by virtue of four no. of sale deeds dated: 26/04/1991 by M/s. Alankar Builders Pvt. Ltd. Each sale deed has 1/4th share of land of property bearing no.9938. As per the letter of MCD having no.1690/5/3/07, the subject property has address as property no.9938/1 and it can be mutated in favor of M/s. Alankar Builders Pvt. Ltd. in condition if the owner will pay all the due house tax otherwise the owner does not devolve a legal title. So bank is advised to check if the owner company has paid all the due house tax and get the title mutated in his name and also take legal advice on the title of the subject property.

The subject property comprised of Ground & First floor. Ground Floor consist of a showroom, godown & power house room. First Floor is currently being used as a godown. The subject property is irregular in shape and almost covered on entire piece of land and due to the irregular and very congested built of the property complete site measurements was not possible so we have adopted the covered area details as per the MCD letter i.e. 22110 sq.ft. since, no copy of approved map was provided to us.

The subject property is approx. 35 years old and is average in condition. Woodland factory outlet is also present at the ground floor of the subject property.

Also, as observe during the site survey, the adjoining property also under the same boundary of the subject property, which was being used for godown purpose & belongs to different owner. However, both the properties can easily be separated by constructing a separation wall whenever desired. So, bank is advised to take a note of the same.

The subject property is situated on 25 ft. wide road which is at a distance of 100 mtr. only from main Rohtak road. The subject property is also near to the Sarai Rohilla railway station and other industrial and commercial properties are also situated nearby.

This report only contains general assessment & opinion on the Guideline Value and the indicative, estimated Market Value of the property for which Bank has asked to conduct the Valuation and found as per the information given in the copy of documents provided to us and/ or confirmed by the owner/ owner representative to us at site which has been relied upon in good faith. It doesn't contain any other recommendations of any sort.

| I.  | Any other aspect which has relevance on the value or marketability of the property | Valuation of the same asset/ property can fetch different values different circumstances & situations. For eg. Valuation of a ru operational shop/ hotel/ factory will fetch better value and in case of shop/ hotel/ factory it will have considerable lower value. Similarly an sold directly by an owner in the open market through free market transition it will fetch better value and if the same asset/ property is sold |  |                                    |                                  |                         |  |

Page 14 of 32

|    |  | financer due to encumbrance on it, will fetch lower value. Hence before financing, Lender/ FI should take into consideration all such future risks while financing.  |
|----|--|--|
|    |  | This Valuation report is prepared based on the facts of the property & market situation on the date of the survey. It is a well-known fact that the market value of any asset varies with time & socio-economic conditions prevailing in the country. In future property market may go down, property conditions may change or may go worse, property reputation may differ, property vicinity conditions may go down or become worse, property market may change due to impact of Govt. policies or effect of World economy, usability prospects of the property may change, etc. Hence before financing, Banker/ FI should take into consideration all such future risk while financing. |
| m. | Sale transaction method assumed              | Free market transaction at arm's length wherein the parties, after full market survey each acted knowledgeably, prudently and without any compulsion.  |
| n. | Best Sale procedure to realize maximum Value | Free market transaction at arm's length wherein the parties, after full market survey each acted knowledgeably, prudently and without any compulsion.  |
| 0. | Methodology/ Basis of<br>Valuation           | Govt. Guideline Value: Circle rates of Delhi  Market Value: Land Value is calculated on the basis of 'Market Comparable Sales approach' and Building construction value is calculated on the basis of 'Depreciated Replacement Cost approach'  |
|    |  | Valuation of the asset is done as found on as-is-where basis.  |
|    |  | Valuation is done based on the Valuation best practices, standard operating procedures and definitions prescribed by various organizations like IVSC, Income Tax of India, etc. as defined under.  |
|    |  | For knowing comparable market rates, significant discreet local enquiries have been made from our side representing ourselves as both buyer and seller for the similar properties in the subject area and thereafter based on this information and various factors of the property, a rate has been judiciously taken considering the market scenario.   |
|    |  | References regarding the prevailing market rates are based on the verbal/ informal/secondary/ tertiary information collected during market survey in the subject area from the local people, property consultants, recent deals, demand-supply, internet postings which are relied upon. No written record is generally available for such market information and only the verbal information has to be relied upon.   |
|    |  | Market Rates are rationally adopted based on the facts of the property that came to our knowledge during the course of the assignment considering many factors like nature of the property, size, location, approach, market situation and trends.   |
|    |  | The indicative value has been suggested based on the prevailing market rates that came to our knowledge during secondary & tertiary market researches and does not split into formal & informal payment components.  |
|    |  | Secondary/ Tertiary costs related to asset transaction like Stamp Duty, Registration charges, Brokerage, Bank interest, selling cost, marketing cost, etc. pertaining to the sale/ purchase of this property are not considered while assessing the indicative estimated Market Value.   |
|    |  | This report includes both, Govt. Guideline Value and Indicative Estimated Prospective Fair Market Value. As per the current market practice, in most of the cases, formal transaction takes place for an amount less than the actual transaction   |

amount and rest of the payment is normally done informally.

Construction rates are adopted based on the present market replacement cost of construction and calculating applicable depreciation & deterioration factor as per its existing condition & specifications based on only visual observation of the structure. No structural, physical tests have been carried out in respect of it.

Construction rates are adopted based on the plinth area rates prevailing in the market for the structure as a whole and not based on item wise estimation or Bills of Quantity method.

The condition assessment and the estimation of the residual economic life of the structure is only based on the visual observations and appearance found during the site survey. We have not carried out any structural design or stability study; nor carried out any physical tests to assess structural integrity & strength.

Sale transaction method of the asset is assumed as free market transaction while assessing Indicative & Estimated Fair Prospective Market Value of the asset.

Any kind of unpaid statutory, utilities, lease, interest or any other pecuniary dues on the asset has not been factored in the Valuation.

This Valuation is conducted based on the macro analysis of the asset/ property considering it in totality and not based on the micro, component or item wise analysis. Analysis done is a general assessment and is not investigative in nature

Fair Market Value\* suggested by the competent Valuer is that prospective estimated amount in his expert & prudent opinion of the subject asset/ property without any prejudice after he has carefully & exhaustively evaluated the facts & information came in front of him related to the subject asset at which the subject asset/ property should be exchanged between a willing buyer and willing seller at an arm's length transaction in an open & unrestricted market, after proper marketing, wherein the parties, each acted knowledgeably, prudently and without any compulsion on the date of the Valuation.

Forced, under compulsion & constraint, obligatory sales transactions data doesn't indicate the Fair Market Value.

Realizable Value\* is the minimum prospective estimated value of the property which it may be able to realize at the time of actual property transaction factoring in the potential prospects of deep negotiations carried out between the buyer & seller for ultimately finalizing the transaction across the table. Realizable value may be 10-20% less than the Fair Market Value depending on the various salability prospects of the subject property and the needs of the buyer & the seller.

Forced/ Distress Sale Value\* is the value when the property has to be sold due to any compulsion or constraint like financial encumbrances, dispute, as a part of a recovery process, any defect in the property, legal issues or any such condition or situation. In this type of sale, minimum fetch value is assessed which can be 25-40% less than the estimated Fair Market Value based on the nature, size & salability prospects of the property. In this type of sale, negotiation power of the buyer is always more than the seller and eagerness & pressure of selling the property is more than buying it. Therefore the Forced/ Distress Sale Value will always fetch significantly less value compare to the estimated Fair Market Value.

Liquidation Value is the amount that would be realized when an asset or group of assets are sold on a piecemeal basis that is without consideration of benefits (or detriments) associated with a going-concern business. Liquidation value can be either in an orderly transaction with a typical marketing period or in a forced

Name:

transaction with a shortened marketing period.

Difference between Cost, Price & Value: Generally these words are used and understood synonymously. However in reality each of these has a completely different meaning, premise and also having different definitions in the professional & legal terms. Therefore to avoid confusion, it is our professional responsibility to describe the definitions of these words to avoid ambiguity & confusion in the minds of the user of this report.

The Cost of an asset represents the actual amount spend in the construction/ actual creation of the asset.

The Price is the amount paid for the procurement of the same asset.

The **Value** is defined as the present worth of future rights in the property/ asset and depends to a great extent on combination of various factors such as demand and supply, market situation, purpose, situation & needs of the buyer & seller, saleability outlook, usability factor, market perception & reputation. needs of the buyer & seller, saleability outlook, usability factor, market perception & reputation.

Therefore in actual for the same asset/ property, cost, price & value remain different since these terms have different usage & meaning.

p. References on prevailing market Rate/Price trend of the property and Details of the sources from where the information is gathered (from property search sites & local information):

| <ul> <li>q. Adopted Rates</li> <li>Justification</li> </ul> | As per our discussion with habitants & market participants of subject property we came to<br>know the following information :-  |
|---|---|
|   | <ul> <li>The prevailing land rate in the subject locality depends upon the size, shape frontage, approach road width, distance from main road &amp; location of the plot.</li> <li>The subject locality is a mixed used area and properties are being used for residential commercial, industrial &amp; warehouse purpose also.</li> <li>No recent sale purchase has been taken place for such a large land parcel in the subject locality.</li> <li>There are very limited plots having such a large land area present in the subject locality.</li> <li>Prevailing land rates for small residential plots of approx. 100 sq.yds land area in the subject locality is between Rs.1,75,000/- to Rs.2,00,000/- per sq.yds.</li> <li>Prevailing land rates for medium plots of approx. 500 to 700 sq.yds land area in the subject locality is between Rs.1,40,000/- to Rs.1,60,000/- per sq.yds.</li> <li>Prevailing land rates for large plots of approx. 1200 to 1500 sq.yds land area in the subject locality is between Rs.1,10,000/- to Rs.1,25,000/- per sq.yds.</li> <li>The demand and availably of such large plots in the subject locality is low.</li> <li>As the subject property is a lerge land parcel being used for warehouse purpose and located approx.100 mtr. from the main road and can be clearly approached from 25 ft, wide road. The subject property is located near Saria Rohilla Railway Station and considering the size and location of the property it is suitable for using it as a warehouse purpose only. Thus for sucl a land parcel the prevailing land rate should be around Rs.1,10,000/- per sq.yds. and same</li> </ul> |

# 13. Concluding Comments & Disclosures if any

- a. As per the letter of MCD having no.1690/5/3/07, the subject property has address as property no.9938/1 and it can be mutated in favor of M/s. Alankar Builders Pvt. Ltd. in condition if the owner will pay all the due house tax otherwise the owner does not devolve a legal title. So bank is advised to check if the owner company has paid all the due house tax and get the title mutated in his name and also take legal advice on the title of the subject property.
- b. This Valuation report is prepared based on the copies of the documents/ information which interested organization or customer could provide to us out of the standard checklist of documents sought from them and further based on our assumptions and limiting conditions. All such information provided to us has been relied upon in good faith and we have assumed that it is true and correct.
- c. Legal aspects for eg. investigation of title, ownership rights, lien, charge, mortgage, lease, verification of documents from originals, etc. has to be taken care by legal experts/ Advocates.
- d. This report only contains opinion based on technical & market information which came to knowledge during course of the assignment. It doesn't contain any recommendations.
- e. This report is prepared following our Standard Operating

### **VALUER'S REMARKS - ANNEXURE IX**

| a) | This Valuation report is prepared based on the copies of the documents/ information which interested organization or customer could provide to us out of the standard checklist of documents sought from them and further based on our assumptions and limiting conditions. All such information provided to us has been relied upon in good faith and we have assumed that it is true and correct. Verification or cross checking of the documents provided to us from the originals has not been done at our end.  |  |  |
|----|--|--|--|
| b) | Legal aspects for eg. investigation of title, ownership rights, lien, charge, mortgage, lease, verification of documents, etc. have to be taken care by legal expert/ Advocate and same are not done at our end. It is assumed that the concerned Lender/ Financial Institution has asked for the valuation of that property for which the legal verification has been already taken and cleared by the competent Advocate before requesting for the Valuation report.   |  |  |
| c) | Analysis and conclusions adopted in the report are limited to the reported assumptions, conditions and information came to our knowledge during the course of the work.  |  |  |
| d) | Value varies with the Purpose/ Date/ Condition prevailing in the market. We recommend not to refer the indicative<br>& estimated prospective Value of the asset given in this report if any of these points are different from the one<br>mentioned aforesaid in the Report. We also recommend that the indicative estimated Value in the Valuation Report<br>holds good only upto the period of 3 months from the date of Valuation.  |  |  |
| e) | This report is having limited scope as per its fields & format to provide only the general basic idea of the value the property prevailing in the market based on the documents/ data/ information provided by the client, suggested indicative prospective estimated value should be considered only if transaction is happened as market transaction.  |  |  |
| f) | This Valuation report is prepared based on the facts of the property on the date of the survey. It is a well-known fact that the market value of any asset varies with time & socio-economic conditions prevailing in the country. In future property Market may go down, property conditions may change or may go worse, Property reputation may differ Property vicinity conditions may go down or become worse, Property market may change due to impact of Govt policies or effect of World economy, Usability prospects of the property may change, etc. Hence before financing Banker/ FI should take into consideration all such future risk and should loan conservatively to keep the advanced money safe in case of the downward trend of the property value.  |  |  |
| g) | Valuation of the same asset/ property can fetch different values in different situations. For eg. Valuation of running/ operational shop/ hotel/ factory will fetch better value and in case of closed shop/ hotel/ factory it will had considerable lower value. Similarly an asset sold directly by an owner in the market will fetch better value and if the same asset/ property is sold by any financer due to encumbrance on it will fetch lower value. Hence before financing, Banker/ FI should take into consideration all such future risks and should loan conservatively to keep to  |  |  |
| h) | advanced money safe in case of any such situation.  Getting cizra map or coordination with revenue officers for site identification is not done at our end.  |  |  |
| i) | Valuation is done for the property identified to us by the owner/ owner representative. At our end we have just cross verified the identification of the property with reference to the documents produced for perusal. Method by which identification of the property is carried out is also mentioned in the report clearly. Responsibility of identifying the correct property to the Valuer/ its authorized surveyor is solely of the client/ owner for which Valuation has to be carried out. It is requested from the Bank to cross check from their own records/ information if this is the same property for which Valuation has to be carried out to ensure that owner has not misled the Valuer company of misrepresented the property due to any vested interest.   |  |  |
| j) | In India more than 70% of the geographical area is lying under rural/ remote/ non municipal/ unplanned area where the subject property is surrounded by vacant lands having no physical demarcation or having any display of property survey or municipal number / name plate on the property clearly. Even in old locations of towns, small cities & districts where property number is either not assigned or not displayed on the properties clearly and also due to the presence of multiple/ parallel departments due to which ownership/ rights/ illegal possession encroachment issues are rampant across India and due to these limitations at many occasions it becomes tough to identify the property with 100% surety from the available documents, information & site whereabouts and thus chances of error, misrepresentation by the borrower and margin of chances of error always persists in such cases. To avoid any such chances of error it is advised to the Bank to engage municipal/ revenue department officials to get the confirmation of the property to ensure that the property shown to Valuer/ Banker is the same as for which documents are provided. |  |  |
| k) | If this Valuation Report is prepared for the Flat/ dwelling unit situated in a Group Housing Society or Integrated Township then approvals, maps of the complete group housing society/ township is out of scope of this report and this report will be made for the specific unit based on the assumption that complete Group Housing Society Integrated Township must be approved in all respect.  |  |  |

M/S. AERO CLUB

| I) | Due to fragmented & frequent change in building/ urban planning laws/ guidelines from time to time, different laws/ guidelines between regions/ states and no strict enforceability of Building Bye-Laws in India specially in non-metro and scale b & c cities & Industrial areas, property owners many times extend or make changes in the covered area/ layout from the approved/ applicable limits. There are also situations where properties are decades old when there was no formal Building Bye-Laws applicable when the construction must have been done. Due to such discrete/ unplanned development in many regions sometimes it becomes tough to determine the exact lawful situation on ground for the Valuer. In case nothing specific is noted on the covered built-up area considered in the Valuation   |  |  |  |
|----|---|--|--|--|
| m) | Report, the covered area present on the site as per site survey will be considered in the Valuation.  Valuation is a subjective field and opinion may differ from consultant to consultant. To check the right opinion important to evaluate the methodology adopted and various data point/ information/ factors/ assumption considered by the consultant which became the basis for the Valuation report before reaching to any conclusion.   |  |  |  |
| n) | Value analysis of any asset cannot be regarded as an exact science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgment. Given the same set of facts and using the same assumptions, expert opinions may differ due to the number of separate judgment decisions, which have to be made. Therefore, there can be no standard formula to establish an indisputable exchange ratio. In the event of a transaction, the actual transaction value achieved may be higher or lower than our indicative analysis of value depending upon the circumstances of the transaction. The knowledge, negotiability and motivations of the buyers and sellers and the applicability of a discount or premium for control will also affect actual price achieved. Accordingly, our indicative analysis of value will not necessarily be the price at which any agreement proceeds. The      |  |  |  |
|    | final transaction price is something on which the parties themselves have to agree. However our Valuation analysis can definitely help the stakeholders to make them informed and wise decision about the Value of the asset and can help in facilitating the arm's length transaction.   |  |  |  |
| 0) | This report is prepared on the RKA V-L3 (Medium) Valuation format as per the client requirement and scope work. This report is having limited scope as per its fields & format to provide only the general estimated & indication basic idea of the value of the property prevailing in the market based on the information provided by the client.
