Valuation Methodology

We have adopted the **Market Approach of Valuation** for estimating the Market Value of land. In this approach, the **Sales Comparison Method** of Valuation is adopted in which due weightages have been given to factors such as:

- ❖ The Right to Sell / Transfer / Lease the land.
- ❖ Demand and prospective buyers for such type of Residential plots.
- ❖ Shape, Size, Prominence and Location of land.
- ❖ The Marketability, Utility, Demand and Supply of Residential land in the surrounding area. The land rates as evident from the Sale Instances of comparable land found upon market enquiry.
- ❖ Legal and Physical Encumbrance on land.
- ❖ Freehold or Leasehold nature of land etc.

The Realizable Value of the said immovable property is considered at **85%** of its Market Value, while the Forced Sale Value for the said immovable property is considered at **75%** of its Market Value.

Remarks:

- There are no demarcations for the site. We have inspected the said site as per the site identification done by the representative present on site.
- There was vegetation cover over the land.
- Internal roads are not developed.
- The said property is only Non Agricultural land and rest all surrounding land parcels are agricultural lands.
- There is no residential building nearer to this area.
- We observe that the Guideline rate of the said land is significantly less as compared to its Market rate.
- We were informed by the local enquiry that the similar lands in the locality are being sold in the range of INR 2,000 to INR 4,000 per sq. mtr. depending on the location and condition of the property. Accordingly, suitable rate has been adopted for valuation.
- We have adopted the Sale Rate based on our local inquiries and as per prevailing Market Rate in the vicinity.
- The site inspection is done in presence of Mr. Kulkarni N. K. (9604049488- Representative of MSM Steel Private Limited) and Mr. Ankit Wahane (Assistant manager- SBI Representative)
