Our Ref: SIT/CT/119

Date: 23/11/2021

Sunrays Image Technology is pleased to submit the following quotation for Siemens Sensation 64 slice CT scan machine, herein at the stated prices and terms. Subject to customer's acceptance of the terms and conditions.

System Configuration:

The Somatom Sensation 64 by Siemens has been designed to provide you with excellent performance in your daily routine and clinical research. This scanner is the first one in the world that is able to take 192 images of the patient's heart per second. You will be able to obtain clear and sharp pictures of your patient's organs, tissue, blood vessels and more in as little as only 10 seconds.

The Siemens Somatom Sensation 64 will reduce the radiation dose to the patient compared to the older CT systems. When you buy the Siemens Somatom Sensation, you will be able to offer your patients a non-invasive and painless exam of the heart. The Sensation 64 is so quick that it exposes patients to fewer x-rays.

Features:

- Reduces radiation dose
- Produces images with clarity and detail
- Ability to detect soft plaques with routine CT exams
- Offers unprecedented clarity

Technical specification

Ultra high isotropic resolution
z-Sharp Technology
Industry's highest routine isotropic resolution
at any scan speed and any position within the scan field
Maximum table speed with submillimeter resolution
Fastest rotation time
Data acquisition (slices/rotation) 0.33/sec
5.3 MHU STRATON X-ray tube
Generator peak power
syngo CT.3D
CT Cardiac Engine
CT Acute Care Engine

The 64-slice configurations of Siemens award-winning SOMATOM Sensation offer the industry's highest routine isotropic resolution of below 0.4 mm, visualizing the smallest pathology and finest anatomical structures with exceptional quality, whether complex inner-ear bones or the finest vessels of the coronary tree.

SOMATOM Sensation provides comprehensive CT Clinical Engines, allowing you to perform everything from fast and confident diagnosis to comprehensive reporting in only a matter of minutes. With the fastest gantry rotation speed available of 0.33 seconds and high volume coverage, SOMATOM Sensation allows you to not only examine the entire vascular system without venous contamination, but also to robustly image the heart and the coronary arteries in only a few seconds. Additionally, you can perform accurate stenosis measurements and stent planning. And all this at the lowest possible dose, due to Siemens CARE solutions. The computer-assisted reading tools also enable early detection, fast evaluation, and precise follow-up of malignant disease – with all information available at the scanner before the patient is off the table.

Taking the role as innovation leader seriously, Siemens aim to revolutionize CT in every aspect. The goal is to give you the latest and most advanced technology, like the proprietary STRATON X-ray tube that enables the industry's fastest gantry rotation time, resulting in imaging free of motion artifacts. The unparalleled 0 MHU STRATON X-ray tube is a paradigm shift in CT imaging. It offers you the combination of maximum speed and exceptional image quality. The tube's direct anode cooling eliminates the need for heat storage capacity, permitting a compact design and the industry's fastest CT gantry rotation time of 0.33 seconds for all applications. You will not experience cooling delays, even after long range scans or scanning obese patients.
