Name:</b> Mr. Manav Gupta (Property Consultant)  <b>Contact No.:</b> +91-708855008  <b>Size of the Property:</b> Approx. 1500 sq.mtr.  <b>Rates/ Price informed:</b> Rs.10,000/- to Rs.12,000/- per sq.mtr.</p> <p><b>Comment:</b> As per our discussion, we came to know that the rates within vicinity of subject Industrial land is ranging in between Rs.10,000/- to Rs.12,000/- per sq.mtr. There is a good demand as well as supply of such industrial plots in SIDCUL area.</p> <p><b>2. Name:</b> M/s. Radhe Radhe Properties (Property Consultant)  <b>Contact No.:</b> +91-9412074363  <b>Size of the Property:</b> Approx. 1800 sq.mtr.  <b>Rates/ Price informed:</b> Rs.10,000/- to Rs.12,000/- per sq.mtr.</p> <p><b>Comment:</b> As per our discussion, we came to know that the rates within vicinity of subject Industrial land is ranging in between Rs.10,000/- to Rs.12,000/- per sq.mtr. There is a good demand as well as supply of such industrial plots in SIDCUL area.</p> <p><i>During our micro market survey and discussion with local property dealers and local inhabitant we came to know following information:</i></p> <p>1. The prevailing market rate for industrial plot in the subject locality depends on the shape, size, frontage, approach road width, its location &amp;</p>

		<p>distance from main road</p> <ol style="list-style-type: none"> <li>The subject property is located on a corner plot amidst of averagely developing industrial area of SIDCUL on plot no.9, Sector 8B.</li> <li>The subject property lies in the averagely developed SIDCUL area and is located at a distance of 650mtr. from SIDCUL Bypass road</li> <li>The demand of the land in this locality is good.</li> <li>The on-going market rate for the industrial land located within this vicinity of subject land is ranging between Rs.10,000/- to Rs.12,000/- per sq.mtr.</li> </ol> <p>As the subject property is a medium size industrial plot having land area 1,777 sq.mtr/ 2,125.274 sq.yds and the shape of the land is irregular. So keeping all the above factors in mind we are of the view that the prevailing market rate for such a land parcel should be between Rs. 10,000/- to Rs.12,000/- per sq.mtr. we have considered Rs. 11,000/- which seems to be reasonable in our opinion.</p>
4.	Circle rate obtained from Department of Stamps and Registration, Haridwar (an evidence thereof to be enclosed)	Rs.14,000/- per sq.mtr. 1777 sq. mtr. x Rs.14,000/- per sq. mtr. <b>= Rs.2,48,78,000/-</b>
5.	Assessed / adopted rate of valuation	<b>Rs.11,000/- per sq.mtr.</b>
6.	Estimated value of land(A)	<b>Market Value:</b> <b>Land : Rs.11,000/- per sq. mtr. X 1777 sq. mtr.</b> <b>= Rs.1,95,47,000/-</b>

ENCLOSURE: VI – VALUER'S REMARKS

1.	This Valuation report is prepared based on the copies of the documents/ information which interested organization or customer could provide to us out of the standard checklist of documents sought from them and further based on our assumptions and limiting conditions. All such information provided to us has been relied upon in good faith and we have assumed that it is true and correct. Verification or cross checking of the documents provided to us from the originals has not been done at our end.
2.	Legal aspects for eg. investigation of title, ownership rights, lien, charge, mortgage, lease, verification of documents, etc. have to be taken care by legal expert/ Advocate and same are not done at our end. It is assumed that the concerned Lender/ Financial Institution has asked for the valuation of that property for which the legal verification has been already taken and cleared by the competent Advocate before requesting for the Valuation report.
3.	Analysis and conclusions adopted in the report are limited to the reported assumptions, conditions and information came to our knowledge during the course of the work.
4.	Value varies with the Purpose/ Date/ Condition prevailing in the market. We recommend not to refer the indicative & estimated prospective Value of the asset given in this report if any of these points are different from the one mentioned aforesaid in the Report. We also recommend that the indicative estimated Value in the Valuation Report holds good only upto the period of 3 months from the date of Valuation.
5.	This report is having limited scope as per its fields & format <u>to provide only the general basic idea of the value of the property prevailing in the market based on the documents/ data/ information provided by the client.</u> The suggested indicative prospective estimated value should be considered only if transaction is happened <u>as free market transaction.</u>
6.	This Valuation report is prepared based on the facts of the property on the date of the survey. It is a well-known fact that the market value of any asset varies with time & socio-economic conditions prevailing in the country. In future property Market may go down, property conditions may change or may go worse, Property reputation may differ, Property vicinity conditions may go down or become worse, Property market may change due to impact of Govt. policies or effect of World economy, Usability prospects of the property may change, etc. Hence before financing, Banker/ FI should take into consideration all such future risk and should loan conservatively to keep the advanced money safe in case of the downward trend of the property value.
7.	Valuation of the same asset/ property can fetch different values in different situations. For eg. Valuation of a running/ operational shop/ hotel/ factory will fetch better value and in case of closed shop/ hotel/ factory it will have considerable lower value. Similarly an asset sold directly by an owner in the market will fetch better value and if the same asset/ property is sold by any financier due to encumbrance on it will fetch lower value. Hence before financing, Banker/ FI should take into consideration all such future risks and should loan conservatively to keep the advanced money safe in case of any such situation.
8.	Getting cizra map or coordination with revenue officers for site identification is not done at our end.
9.	Valuation is done for the property identified to us by the owner/ owner representative. At our end we have just cross verified the identification of the property with reference to the documents produced for perusal. Method by which identification of the property is carried out is also mentioned in the report clearly. Responsibility of identifying the correct property to the Valuer/ its authorized surveyor is solely of the client/ owner for which Valuation has to be carried out. It is requested from the Bank to cross check from their own records/ information if this is the same property for which Valuation has to be carried out to ensure that owner has not misled the Valuer company or misrepresented the property due to any vested interest.
10.	In India more than 70% of the geographical area is lying under rural/ remote/ non municipal/ unplanned area where the subject property is surrounded by vacant lands having no physical demarcation or having any display of property survey or municipal number / name plate on the property clearly. Even in old locations of towns, small cities & districts where property number is either not assigned or not displayed on the properties clearly and also due to the presence of multiple/ parallel departments due to which ownership/ rights/ illegal possession/ encroachment issues are rampant across India and due to these limitations at many occasions it becomes tough to identify the property with 100% surety from the available documents, information & site whereabouts and thus chances of error, misrepresentation by the borrower and margin of chances of error always persists in such cases. To avoid any such chances of error it is advised to the Bank to engage municipal/ revenue department officials to get the confirmation of the property to ensure that the property shown to Valuer/ Banker is the same as for which documents are provided.
11.	If this Valuation Report is prepared for the Flat/ dwelling unit situated in a Group Housing Society or Integrated Township then approvals, maps of the complete group housing society/ township is out of scope of this report and this report will be made for the specific unit based on the assumption that complete Group Housing Society/ Integrated Township must be approved in all respect..
12.	Due to fragmented & frequent change in building/ urban planning laws/ guidelines from time to time, different laws/

	guidelines between regions/ states and no strict enforceability of Building Bye-Laws in India specially in non-metro and scale b & c cities & Industrial areas, property owners many times extend or make changes in the covered area/ layout from the approved/ applicable limits. There are also situations where properties are decades old when there was no formal Building Bye-Laws applicable when the construction must have been done. Due to such discrete/ unplanned development in many regions sometimes it becomes tough to determine the exact lawful situation on ground for the Valuer. In case nothing specific is noted on the covered built-up area considered in the Valuation Report, the covered area present on the site as per site survey will be considered in the Valuation.
13.	Valuation is a subjective field and opinion may differ from consultant to consultant. To check the right opinion, it is important to evaluate the methodology adopted and various data point/ information/ factors/ assumption considered by the consultant which became the basis for the Valuation report before reaching to any conclusion.
14.	Value analysis of any asset cannot be regarded as an exact science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgment. Given the same set of facts and using the same assumptions, expert opinions may differ due to the number of separate judgment decisions, which have to be made. Therefore, there can be no standard formula to establish an indisputable exchange ratio. In the event of a transaction, the actual transaction value achieved may be higher or lower than our indicative analysis of value depending upon the circumstances of the transaction. The knowledge, negotiability and motivations of the buyers and sellers and the applicability of a discount or premium for control will also affect actual price achieved. Accordingly, our indicative analysis of value will not necessarily be the price at which any agreement proceeds. The final transaction price is something on which the parties themselves have to agree. However our Valuation analysis can definitely help the stakeholders to make them informed and wise decision about the Value of the asset and can help in facilitating the arm's length transaction.
