PART B**VALUATION OF LAND**

1.	Size of Plot	134.26 acres
	North & South	It is very large plot area with irregular shape, hence measuring the sides is not possible.
	East & West	It is very large plot area with irregular shape, hence measuring the sites is not possible.
2.	Total extent of the plot	134.26 acres
	Area adopted on the basis of	Copy of Consolidated land area detail sheet provided to us by the company since site measurement is not feasible due to large nature of property.
	Remarks & observations, if any	Not applicable.
3.	Prevailing market rate (Along with details /reference of at least two latest deals/transactions with respect to adjacent properties in the areas)	<p><i>Land Valuation assessment is done considering the Land use for Sugar Project Land only as its highest & best use since the transaction of this land will be done based on the established Project only and separation of it from the Project will be virtually impossible, at least up to the complete economic life cycle of this plant which is taken as 30-35 years and also due to the location no other more productive use can be thought of.</i></p> <p><i>Overall Valuation assessment is done based on the fact that if any new promoter/ buyer would plan to setup a similar Plant today at same location and same size then what will cost him today for acquisition. To acquire 134.26 acres of land parcel, one would either go to Govt. to provide the land for Industry or would approach individual land owners to purchase their land portions.</i></p> <p><i>Valuation of free hold land is done on the basis of comparable market approach.</i></p> <p><i>Fragmentation sale of a large land may have different values. While assessing the Valuation of the land in this Valuation Report, it is considered as on-is-where basis for the purpose it is used for which was found at the time of site survey.</i></p> <p><i>As per our discussion with the property dealers, we came to know that during this Covid Pandemic period there is virtually no enquiry either for sale or for purchase of any property and virtually no sale/ purchase is taking place since the Pandemic started. The real estate market is facing a very critical and</i></p>

		<p><i>uncertain phase. But according to these property dealers the rates quoted by them currently are for the Pre-Pandemic phase. According to them, because of the economic slowdown, losses suffered by businessmen, the loss of jobs or cuts in salaries of the salaried class and also the natural tendency of the people to conserve available liquidity instead of locking it up in an illiquid asset like property or other fixed assets during such economic prolonged, uncertain and distressful times. The demand for properties is expected to fall very significantly in the immediate aftermath of Covid Pandemic. The same is the opinion of a number of reputed real estate consultants who have released their reports on the likely impact on the Real Estate scenario because of disruption caused by the Covid-19 to the economy. In the opinion of all these, the rates of Real Estate are expected to fall at least 10%-15% or even 20% after lockdown is over. But the actual position would be known only once the equilibrium sets in in the real estate market after the Pandemic subsides.</i></p> <p><i>No authentic last two transactions details could be known. However prospective transaction details as per information available on public domain and gathered during site survey is mentioned above. Valuation Assessment Factors of the report and the screenshots of the references are annexed in the report for reference.</i></p>
	Guideline rate obtained from the Registrar's office (an evidence thereof to be enclosed)	<p>As per the agricultural rate – Rs. 29,25,94,901/-</p> <p>As per the non-agricultural rate– Rs.291,12,70,615/-</p> <p>These circle rates gives only the indicative values. However, actually this value has no reference to the real market transaction value which is much less for this kind of land considering the land used for Industrial purpose comparing it with non-agricultural land. Hence no reference can be derived out of the Circle Guideline Value.</p>
	Assessed / adopted rate of valuation	Basic Rate= Rs.32,00,000/- per acre.
	Estimated value of land (A)	Market Value: = Rs.52,76,41,800/-

1.

VALUATION OF LAND*Applicable*

Circle Rate Value: Circle rate of the land is calculated based on “**Collector rate assessment list year 2018**” guidelines issued by Stamp & Registration department of Tehsil- Bisalpur, Distt- Pilibhit, Uttar Pradesh. In the procedure of assessment following points are taken into consideration:

1. This Project Land is used for Industrial purpose. The circle rates are given for the Agricultural and Non-Agricultural Land only. No Circle rate is given for Industrial Lands in these specific villages where these lands exist. Hence, we have shown the Circle rates for the Agricultural Lands and Non-Agricultural Land only for the reference purpose. Copy of the guideline is annexed with the report for reference.
2. The current ongoing Circle Rates of Agricultural lands located in Village- Muradabad Urf Nakta & Gulra Machwakhed is Rs.56,00,000/- & Rs.53,00,000/- per hectare respectively for agricultural land which gives a total of about Rs.29.25 cr. value to the Land.
3. The current ongoing Circle Rates of Non-Agricultural lands located in Village- Muradabad Urf Nakta & Gulra Machwakhed is Rs.5,000/- per sq.mtr. & Rs.5,500/- per sq.mtr. for non-agricultural land which gives a total of about Rs.291.12 Cr. value to the Land.
4. These circle rates gives only the indicative values. However, actually this value has no reference to the real market transaction value which is much less for this kind of land considering the land used for Industrial purpose comparing it with non-agricultural land. Hence no reference can be derived out of the Circle Guideline Value.

Fair Market Rate Value: Market Value of this Project land would be the value which any new promoters company will be spending the amount in procuring the equal measurement of the land parcel if it wants to setup a similar plant today at the same or similar location.

Hence Market value of the land is assessed based on the significant local enquiries, reference of historical sales comparable searched by our team and making rational factors of adjustment on it based on current market situation & condition. In the procedure of assessment following points are taken into consideration:

1. Significant recent sales comparable & market rate enquiries were made from local villagers, village tehsildar & land property dealers of the village where major land is acquired.

Size of the Property: Not specified.

Location: Within Vicinity of project

Rates/ Price informed: Rs.4,00,000/- to Rs.6,00,000/- per Bigha which is translated as Rs.25.29 Lakhs per acres to Rs.38.00 Lakhs per acres

Comment: As per our discussion with Mr. Kamla Charan we came to know that ample agricultural land is available in this area & the market rates depend upon size and location of the land.

- **Name:** Mr. Om Prakash Gupta
Contact No.: +91-9759641087
Size of the Property: Not specified
Location: Not specified

Rates/ Price informed: Rs.3,00,000/- to Rs.5,00,000/- per Bigha which is translated as Rs. 19.00 Lakhs per acres to Rs.32.00 Lakhs per acres.

Comment: As per discussion with Mr. Om Prakash Gupta we came to know that ample agricultural land is available in this area & the market rates depend upon size and location of the land.

1 BIGHA = 640 SQ.MTR.

2. As per our verbal conversation with the local habitants & well established locals of the subject vicinity we came to know that land rates in the subject locality varies within the range of Rs. 20 Lakh to Rs.38 Lakh per acre depending upon the various attributes like shape, size, frontage, access road width, distance from the main road etc. No information of recent transaction of such land parcel as our subject property is available. Based on the above information gathered from the market we are of the view to adopt a rate of **Rs.32,00,000/- per acre** for the purpose of this valuation exercise.
3. In addition to this basic rate premium charges are added as mentioned below on the basis of the location and purpose of the land:
 - Around 5% premium is added for Non- agricultural land.
 - Around 10% premium is added on this rate which covers the land arranging costs, Land development and site levelling and for the other administrative charges. etc.

2	Add 5% premium for non agriculture land	5%			₹ 2,14,81,600
3	Add 10% for cost & effort considerations to cover administrative cost, effort towards land acquisition & consolidation etc.	10%			₹ 4,29,63,200
4	Add: Land Development, Site Levelling charges etc.	At Rs.2.5 Lacs per acre			₹ 3,35,65,000
GRAND TOTAL					₹ 52,76,41,800
Notes:					
1. Land area details has been provided to us by the company, which is relied upon in good faith.					
2. As per the our calculations, the market rate for the subject power project is comes out to be Rs.39.30 Lakhs per Acres, which seems to be reasonable in our view.					

4. We have also weighed the land rate on the basis of land acquisition act-2013 and award value comes on higher side against the prevailing market rate considering premium also. Therefore, being on the conservative side we have taken land value on the basis of **'Market Comparable Sales Approach'** only.

REMARKS

- Land & Building value is considered based on the Project only as its best use since the transaction of this land & building will always remain closely associated with the Project only and separation of it from the Project will be virtually impossible at least up to the complete economic life cycle of this Plant which will be around 30 to 35 years.
- The separate sale of the plant Land & Building is not practically possible hence the Valuation of land & Building of the subject plant has been done on the basis of sale of project as- a-whole basis.
- Fragmented/ Individual component wise may fetch different values, however this Valuation is prepared based on the ongoing concern and the Values has been applied in totality/ group of assets.
- This is just **Replacement Valuation of the plant land only** of the Project more basically by Market approach method and doesn't cover any prospective sale-purchase value of the Plant land as a whole which will be arrived on the basis of whole project valuation (i.e. Land & Building) and additional factor.
- This is just core Asset (i.e. Land & Building) Valuation not an Enterprise Valuation. This report doesn't cover any prospective sale value of the Plant Land as a whole since the realization of land is possible only in cognizance of Plant as a whole and all these parcel is awarded only for the development of Power Plant.
- Discounting factors used in different values assigned like Fair Value, Realizable Value & Distress Value is based on the different conditions & situations of the asset
- Realizable Value & Distress Value bases on the sector specific market scenario and general marketability aspect of the assets.
- There is no fixed formula for assigning the discounting factors and it depends largely on the nature, type of the asset and the market trend.
- Any kind of unpaid statutory, utilities, lease, interest or any other pecuniary dues on the asset has not been factored in the Valuation.
- Secondary/ Tertiary costs related to asset transaction like Stamp Duty, Registration charges, Brokerage, Bank interest etc. pertaining to the sale/ purchase of this property are not considered while assessing the Market Value.

ANNEXURE VIII – VALUER’S REMARKS

5.	This Valuation report is prepared based on the copies of the documents/ information which interested organization or customer could provide to us out of the standard checklist of documents sought from them and further based on our assumptions and limiting conditions. All such information provided to us has been relied upon in good faith and we have assumed that it is true and correct. Verification or cross checking of the documents provided to us from the originals has not been done at our end.
6.	Legal aspects for eg. investigation of title, ownership rights, lien, charge, mortgage, lease, verification of documents, etc. have to be taken care by legal expert/ Advocate and same are not done at our end. It is assumed that the concerned Lender/ Financial Institution has asked for the valuation of that property for which the legal verification has been already taken and cleared by the competent Advocate before requesting for the Valuation report.
7.	Analysis and conclusions adopted in the report are limited to the reported assumptions, conditions and information came to our knowledge during the course of the work.
8.	Value varies with the Purpose/ Date/ Condition prevailing in the market. We recommend not to refer the indicative & estimated prospective Value of the asset given in this report if any of these points are different from the one mentioned aforesaid in the Report. We also recommend that the indicative estimated Value in the Valuation Report holds good only upto the period of 3 months from the date of Valuation.
9.	This report is having limited scope as per its fields & format to provide only the general basic idea of the value of the <u>property prevailing in the market</u> based on the documents/ data/ information provided by the client. The suggested indicative prospective estimated value should be considered only if transaction is happened <u>as free market transaction</u> .
10.	This Valuation report is prepared based on the facts of the property on the date of the survey. It is a well-known fact that the market value of any asset varies with time & socio-economic conditions prevailing in the country. In future property Market may go down, property conditions may change or may go worse, Property reputation may differ, Property vicinity conditions may go down or become worse, Property market may change due to impact of Govt. policies or effect of World economy, Usability prospects of the property may change, etc. Hence before financing, Banker/ FI should take into consideration all such future risk and should loan conservatively to keep the advanced money safe in case of the downward trend of the property value.
11.	Valuation of the same asset/ property can fetch different values in different situations. For eg. Valuation of a running/ operational shop/ hotel/ factory will fetch better value and in case of closed shop/ hotel/ factory it will have considerable lower value. Similarly an asset sold directly by an owner in the market will fetch better value and if the same asset/ property is sold by any financier due to encumbrance on it will fetch lower value. Hence before financing, Banker/ FI should take into consideration all such future risks and should loan conservatively to keep the advanced money safe in case of any such situation.
12.	Getting cizra map or coordination with revenue officers for site identification is not done at our end.
13.	Valuation is done for the property identified to us by the owner/ owner representative. At our end we have just cross verified the identification of the property with reference to the documents produced for perusal. Method by which identification of the property is carried out is also mentioned in the report clearly. Responsibility of identifying the correct property to the Valuer/ its authorized surveyor is solely of the client/ owner for which Valuation has to be carried out. It is requested from the Bank to cross check from their own records/ information if this is the same property for which Valuation has to be carried out to ensure that owner has not misled the Valuer company or misrepresented the property due to any vested interest.
14.	In India more than 70% of the geographical area is lying under rural/ remote/ non municipal/ unplanned area where the subject property is surrounded by vacant lands having no physical demarcation or having any display of property survey or municipal number / name plate on the property clearly. Even in old locations of towns, small cities & districts where property number is either not assigned or not displayed on the properties clearly and also due to the presence of multiple/ parallel departments due to which ownership/ rights/ illegal possession/ encroachment issues are rampant across India and due to these limitations at many occasions it becomes tough to identify the property with 100% surety from the available documents, information & site whereabouts and thus chances of error, misrepresentation by the borrower and margin of chances of error always persists in such cases. To avoid any such chances of error it is advised to the Bank to engage municipal/ revenue department officials to get the confirmation of the property to ensure that the property shown to Valuer/ Banker is the same as for which documents are provided.
15.	If this Valuation Report is prepared for the Flat/ dwelling unit situated in a Group Housing Society or Integrated Township then approvals, maps of the complete group housing society/ township is out of scope of this report and this report will be made for the specific unit based on the assumption that complete Group Housing Society/ Integrated Township must be approved in all respect..

VALUATION ASSESSMENT

M/S BAJAJ HINDUSTHAN SUGAR LIMITED, BARKHERAKALAN

	Due to fragmented & frequent change in building/ urban planning laws/ guidelines from time to time, different laws/ guidelines between regions/ states and no strict enforceability of Building Bye-Laws in India specially in non-metro and scale b & c cities & Industrial areas, property owners many times extend or make changes in the covered area/ layout from the approved/ applicable limits. There are also situations where properties are decades old when there was no formal Building Bye-Laws applicable when the construction must have been done. Due to such discrete/ unplanned development in many regions sometimes it becomes tough to determine the exact lawful situation on ground for the Valuer. In case nothing specific is noted on the covered built-up area considered in the Valuation Report, the covered area present on the site as per site survey will be considered in the Valuation.
16.	Valuation is a subjective field and opinion may differ from consultant to consultant. To check the right opinion, it is important to evaluate the methodology adopted and various data point/ information/ factors/ assumption considered by the consultant which became the basis for the Valuation report before reaching to any conclusion.
17.	Value analysis of any asset cannot be regarded as an exact science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgment. Given the same set of facts and using the same assumptions, expert opinions may differ due to the number of separate judgment decisions, which have to be made. Therefore, there can be no standard formula to establish an indisputable exchange ratio. In the event of a transaction, the actual transaction value achieved may be higher or lower than our indicative analysis of value depending upon the circumstances of the transaction. The knowledge, negotiability and motivations of the buyers and sellers and the applicability of a discount or premium for control will also affect actual price achieved. Accordingly, our indicative analysis of value will not necessarily be the price at which any agreement proceeds. The final transaction price is something on which the parties themselves have to agree. However our Valuation analysis can definitely help the stakeholders to make them informed and wise decision about the Value of the asset and can help in facilitating the arm's length transaction.
18.	This report is prepared on the RKA V-L1 (Basic) Valuation format as per the client requirement and scope of work. This report is having limited scope as per its fields & format to provide only the general estimated & indicative basic idea of the value of the property prevailing in the market based on the information provided by the client. No detailed analysis, audit or verification has been carried out of the subject property.
19.	This is just an opinion report and doesn't hold any binding on anyone. It is requested from the concerned Client/ Bank/ Financial Institution which is using this report for mortgaging the property that they should consider all the different associated relevant & related factors & risks before taking any business decision based on the content of this report.
20.	All Pages of the report including annexures are signed and stamped from our office. In case any paper in the report is without stamp & signature then this should not be considered a valid paper issued from this office.
