MRS. ANITA AGARWAL W/O SUDHIR KUMAR AGARWAL

10.	ASSUMPTIONS   REMARKS   LIMITING CONDITIONS				
i.	Qualification in TIR/Mitigation Suggested, if any: Cannot comment since no copy of TIR is provided to us.				
ii.	Is property SARFAESI compliant: <b>Yes</b>				
iii.	Whether property belongs to social infrastructure like hospital, school, old age home etc.: <b>No</b>				
iv.	Whether entire piece of land on which the unit is set up / property is situated has been mortgaged or to be				
	mortgaged: Already Mortgaged				
V.	Details of last two transactions in the locality/area to be provided, if available: <i>Information couldn't be found</i> .				
vi.	Any other aspect which has relevance on the value or marketability of the property: <b>NA</b>				

- a. Information of the average market rates is taken based on the verbal market survey in the subject area from the local people, property agents, recent deals, demand-supply, internet postings which has been relied upon. No written record is generally available for such market information and only the verbal information has to be relied upon.
- b. Forced, compulsion, constraint, obligatory sales transactions data doesn't forms part of the Fair Market Valuation exercise.
- c. Sale transaction method of the asset is assumed as free market transaction while assessing Prospective Fair Market Value of the asset.
- d. This Valuation report is prepared based on the facts of the property on the date of the survey. However in future property Market may go down, property conditions may change or may go worse, Property reputation may differ, Property vicinity conditions may go down or become worse, Property market may change due to impact of Govt. policies or effect of World economy, Usability prospects of the property may change, etc. Hence before financing, Banker/ FI should take into consideration all such future risk and should loan conservatively to keep the advanced money safe in case of the downward trend of the property value.
- e. Valuation of the same asset/ property can fetch different values in different situations. For eg. Valuation of a running/ operational shop/ hotel/ factory will fetch better value and in case of closed shop/ hotel/ factory it will have considerable lower value. Similarly an asset sold directly by an owner in the market will fetch better value and if the same asset/ property is sold by any financer due to encumbrance on it will fetch lower value. Hence before financing, Banker/ FI should take into consideration all such future risks and should loan conservatively to keep the advanced money safe in case of any such situation.
- f. This report is prepared based on the copies of the documents/ information which interested organization or customer could provide to us out of the standard checklist of documents sought from them and further based on our assumptions and limiting conditions. All such information provided to us has been relied upon and we have assumed that it is true and correct. Verification or cross checking of the documents provided to us from the originals has not been done at our end. If at any time in future it's found or came to our knowledge that misrepresentation of facts or incomplete or distorted information has been provided to us then this report will automatically become null & void.
- g. Getting cizra map or coordination with revenue officers for site identification is not done at our end.
- h. All area measurements are on approximate basis. Verification of the area measurement of the property is done only based on sample random checking and not based on full scale measurement. Area of the large land parcels of more than 2500 sq.mtr or of uneven shape, is taken as per property documents which has been relied upon.
- i. Legal aspects for eg. ownership rights, lien, charge, mortgage, etc. are not considered in this report. It is assumed and taken into account that the concerned Bank/ Financial Institution has first got the legal verification cleared by the competent Advocate before requesting for the Valuation report. In case Valuation is obtained before taking legal scrutiny or opinion then it is expected from the Bank to inform back the Valuer timely about such change of rights on the property as soon as it comes into the notice of the Bank/ Financer which may affect their charge on the mortgage asset so that accordingly Valuation modification can be done only for that portion for which the Bank has complete charge/ rights.
- j. Investigation of title of the property and its legal right is beyond the scope of this report. If this property is offered as collateral security, then concerned financial institution is requested to verify & satisfy themselves on the ownership & legality of the property shown in this valuation report with respect to the latest legal opinion.
- k. Valuation is done for the property identified to us by the owner/ owner representative. Responsibility of identifying the correct property to the Valuer/ its authorized surveyor is solely of the client/ owner for which Valuation has to be carried out. At our end we can just cross verify the identification of the property with reference to the documents produced for perusal. Method by which identification of the property is carried out is also mentioned in the report clearly. It is requested from the Bank to cross check from their own records/ information if this is the same property for which Valuation has to be carried out to ensure that owner has not misled the Valuer company or misrepresented the property due to any vested interest.

#### MRS. ANITA AGARWAL W/O SUDHIR KUMAR AGARWAL

- I. In India more than 70% of the geographical area is lying under rural/ remote/ non municipal/ unplanned area where the subject property is surrounded by vacant lands having no physical demarcation or having any display of property survey or municipal number / name plate on the property clearly. Even in old locations of towns, small cities & districts where property number is either not assigned or not displayed on the properties clearly and also due to the presence of multiple/ parallel departments due to which ownership/ rights/ illegal possession/ encroachment issues are rampant across India and due to these limitations at many occasions it becomes tough to identify the property with 100% surety from the available documents, information & site whereabouts and thus chances of error, misrepresentation by the borrower and margin of chances of error always persists in such cases. To avoid any such chances of error it is advised to the Bank to engage municipal/ revenue department officials to get the confirmation of the property to ensure that the property shown to Valuer/ Banker is the same as for which documents are provided.
- m. If this Valuation Report is prepared for the Flat/ dwelling unit situated in a Group Housing Society or Integrated Township then it is assumed that the Banker or the concerned organization has satisfied themselves with the approval of the Group Housing Society/ particular floor & building before allotting the Valuation case to the Valuer company.
- n. Due to fragmented & frequent change in building/ urban planning laws/ guidelines from time to time, different laws/ guidelines between regions/ states and no strict enforceability of Building Bye-Laws in India specially in non-metro and scale b & c cities & Industrial areas, property owners many times extend or make changes in the covered area/ layout from the approved/ applicable limits. There are also situations where properties are decades old when there was no formal Building Bye-Laws applicable when the construction must have been done. Due to such discrete/ unplanned development in many regions sometimes it becomes tough to determine the exact lawful situation on ground for the Valuer. In case nothing specific is noted on the covered built-up area considered in the Valuation Report, the covered area present on the site as per site survey will be considered in the Valuation.
- o. In case of Valuation of Plant & Machinery or equipment, condition of machines is evaluated by visual observation only. No technical/ mechanical testing of any kind has been carried out at our end to ascertain the condition and efficiency of the machines. Valuation of Plant & Machinery is done on the basis of physical existence of the assets rather than their technical expediency.
- p. Secondary/ Tertiary costs related to asset transaction like Stamp Duty, Registration charges, Brokerage, Bank interest, etc. pertaining to the sale/ purchase of this property are not considered while assessing the Market Value.
- q. Any kind of unpaid statutory, utilities, lease, interest or any other pecuniary dues on the asset has not been factored in the Valuation.
- r. Valuation is a subjective field and opinion may differ from consultant to consultant. To check the right opinion, it is important to evaluate the methodology adopted and various data point/ information/ factors/ assumption considered by the consultant which became the basis for the Valuation report before reaching to any conclusion.
- s. At the outset, it is to be noted that Value analysis of any asset cannot be regarded as an exact science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgment. Given the same set of facts and using the same assumptions, expert opinions may differ due to the number of separate judgment decisions, which have to be made. Therefore, there can be no standard formulae to establish an indisputable exchange ratio. In the event of a transaction, the actual transaction value achieved may be higher or lower than our indicative analysis of value depending upon the circumstances of the transaction. The knowledge, negotiability and motivations of the buyers and sellers and the applicability of a discount or premium for control will also affect actual price achieved. Accordingly, our indicative analysis of value will not necessarily be the price at which any agreement proceeds. The final transaction price is something on which the parties themselves have to agree. However our Valuation analysis can definitely help the stakeholders to make them informed and wise decision about the Value of the asset and can help in facilitating the arm's length transaction.

MRS. ANITA AGARWAL W/O SUDHIR KUMAR AGARWAL

#### **ENCLOSURE: 1- VALUER'S REMARKS**

	4
1.	Fair Market Value*suggested by the competent Valuer is that prospective estimated amount of the subject asset/
	property in his expert & prudent opinionwithout any prejudiceafter he has carefully & exhaustively evaluated all
	the facts & information related to the subject asset at which the subject asset/ property should be exchanged
	between a willing buyer and willing seller at an arm's length transaction after proper marketing, wherein the
	parties, each acted knowledgeably, prudently and without any compulsion on the date of the Valuation.
2.	Realizable Value^ is the minimum prospective value of the property which it may be able to realize at the time of
	actual property transaction factoring in potential prospects of deep negotiations carried out between the buyer &
	seller for ultimately finalizing the transaction. Realizable value may be 10-20% less of the Fair Market Value
	depending on the various salability prospects of the subject property.
3.	Forced/ Distress Sale Value* is the value when the property has to be sold due to any compulsion or constraint
	like financial encumbrances, dispute, as a part of a recovery process, any defect in the property, having unclear
	title or any such sort of condition or situation. In this type of sale minimum disposable value is assessed which
	varies from 20-35% less from the Fair Market Value based on the nature, size &salability prospects of the
	property. In this type of sale negotiation power of the buyer is always more than the seller and eagerness of
_	selling the property is more than buying it. Therefore the Forced/ Distress Sale Value always fetches less value.
4.	Best rates are rationally adopted based on the facts of the case came to our knowledge during the course of the
	assignment considering many factors like nature of the property, size, location, approach, market situation and
_	trends.
5.	Construction rates are adopted based on present replacement cost of construction and calculating applicable
	depreciation & deterioration factor as per its existing condition, specifications based on the visual observation of
6.	the structure. No structural, physical tests have been carried out in respect of it.  This Valuation report is prepared based on the facts of the property on the date of the survey. However in future
O.	This Valuation report is prepared based on the facts of the property on the date of the survey. However in future property Market may go down, property conditions may change or may go worse, Property reputation may differ,
	Property vicinity conditions may go down or become worse, Property market may change due to impact of Govt.
	policies or effect of World economy, Usability prospects of the property may change, etc. Hence before financing,
	Banker/ FI should take into consideration all such future risk and should loan conservatively to keep the advanced
	money safe in case of the downward trend of the property value.
7.	Valuation of the same asset/ property can fetch different values in different situations. For eg. Valuation of a
' '	running/ operational shop/ hotel/ factory will fetch better value and in case of closed shop/ hotel/ factory it will
	have considerable lower value. Similarly an asset sold directly by an owner in the market will fetch better value
	and if the same asset/ property is sold by any financer due to encumbrance on it will fetch lower value. Hence
	before financing, Banker/ FI should take into consideration all such future risk and should loan conservatively to
	keep the advanced money safe in case of any such situation.
8.	No employee or member of R.K Associates has any direct/ indirect interest in the property.
9.	Sale transaction method of the asset is assumed as free market transaction while assessing Fair Prospective
	Market Value of the asset.
10.	Area measurements considered in the Valuation Report pertaining to Land & Building is adopted from relevant
	approved documents or actual site measurement whichever is less. All area measurements are on approximate
	basis only.
11.	This report is having limited scope as per its fields to provide only the general basic idea of the value of the
	property prevailing in the market based on the documents/ data/ information provided by the client. The
	suggested value should be considered only if transaction is happened as free market transaction.
12.	The condition assessment and the estimation of residual economic life of the structure is based on the visual
	observations and appearance found during the site survey. We have not carried out any structural design or
	stability study; nor carried out any physical tests to assess structural integrity & strength.
13.	This report is prepared based on the copies of the documents/ information which interested organization or
	customer could provide to us out of the standard checklist of documents sought from them and further based on
	our assumptions and limiting conditions. All such information provided to us has been relied upon and we have
	assumed that it is true and correct. Verification or cross checking of the documents provided to us from the
	originalshas not been done at our end. If at any time in future it's found or came to our knowledge that
	misrepresentation of facts or incomplete or distorted information has been provided to us then this report will
	automatically become null & void.
