**Subject : Quotation for Agilent Uv-Visible Spectrometer Cary 60 with following features :**

- 3 Year Guaranteed performance of Lamp ( with a typical lifetime of 10 years)  
Compared to regular lamp offered by other companies which only offer 2000 hrs of lamp life, Agilent Cary 60 help lab with fewer breakdowns and more up time for high throughput laboratories.  
The Xenon lamp also prevents photo-bleaching of samples to allow more accurate and true results.
- Room light immunity** : Cary 60's unique optical design allows accurate sample measurement even with the sample lid open — especially useful for high throughput QA/QC labs.
- Complete Spectrum Range:** 190 nm – 1100 nm
- Fast Scan Speed:** 24,000 nm/min & 80 data points/second maximum measurement rate allows faster and accurate data aquisition for high throughput labs.
- 1.5 nm fixed spectral bandwidth Gives excellent spectral resolution for solids and liquids and meets international Pharmacopoeia compliance regulations.
- Photometric range up to 4 Abs Permits the analysis of highly turbid solutions and a wide range of sample concentrations (optical densities), as well as reducing sample preparation (dilution) requirements.
- Non-measurement phase stepping wavelength drive Means that sample and reference measurements are made at the same wavelength ensuring that no peak shifts are observed — even when measuring at the fastest scan speeds.
