REPORT PREPARED FOR

BANK OF INDIA, LARGE CORPORATE BRANCH OFFICE, MUMBAI

Important - In case of any query/ issue or escalation you may please contact Incident Manager
at valuers@rkassociates.org. We will appreciate your feedback in order to improve our services.

NOTE: As per IBA & Bank's Guidelines please provide your feedback on the report within 15 days of its submission after
which report will be considered to be correct.

Valuation Terms of Services & Valuer's Important Remarks are available at www.rkassociates.org for reference.

CORPORATE OFFICE:

PART C

INTRODUCTION

1. **NAME OF THE PROJECT:** Detailed Fixed Asset Valuation of (6 x 600) MW Pulverized Coal Fired Sub-Critical Thermal Power Plant set by M/s. KSK Mahanadi Power Company Limited (KMPCL) at Villages Nariyara, Rogada, Amora & Tarod of Tehsil Akaltara, Janjgir-Champa District of Chhattisgarh.

2. **BRIEF DESCRIPTION OF THE PROJECT:** M/s. KSK Mahanadi Power Company Limited (hereinafter referred to as KMPCL), a subsidiary of KSK Energy Ventures is setting up a 3,600 MW (6x600) pulverized coal fired Sub- Critical Thermal Power Plant at villages Nariyara, Rogada, Amora & Tarod of Akaltara Tehsil in Janjgir- Champa district of Chhattisgarh State in India.

This is a Project Fixed Asset Valuation report comprises of Land & Building, Plant & Machinery and other miscellaneous assets of the Sub Critical Thermal Power plant located in Janjgir-Champa District of Chhattisgarh. Details of Land & Building and Plant & Machinery are enumerated in different section of this report. This report doesn't includes Enterprise valuation and the current asset.

This plant is approved for 6 Units of 600 MW each. However, out of the total 6 units, 3 units (that is 2nd, 3rd & 4th) are commissioned and the balance 3 units are at various stages of construction since long of which currently all construction is on hold from last more than 5 years. At the time of site inspection, all three units were operational. Accordingly 3 units are capitalized in the FAR and

abrogated units are captured in CWIP. Thus, valuation of this whole plant is broadly computed based on the 3 commissioned units (2, 3 & 4) and CWIP separately for the noncommissioned units (1, 5 & 6).

Bank of India (BOI) being one of the consortium lender has appointed us for the valuation of this plant only without considering the SPVs i.e. M/s. Raigarh Champa Rail Infrastructure Pvt. Ltd (RCRIPL) and M/s. KSK Water Infrastructure Pvt. Ltd. (KWIPL).

RCRIPL and KWIPL were established to develop a private railway siding and other related infrastructure from Akaltara railway station to the plant for transportation of coal and to transport water from river Mahanadi to the subject plant for meeting the water requirement respectively.

Valuation of the subject plant along with the SPVs was carried out by us in the year 2018 and October 2022 also. Since, the company is now under CIRP and IRP is appointed in it, therefore, during the present valuation exercise there was data & information limitation. Thus for the purpose of the present valuation, we have referred the data/ information which was available & provided to us.

Present status of all the 6 units

Table No. 3			
Unit	Date of Contractual Schedule	COD Achieved	Current Status
Unit-2	25-Mar-13	28-Feb-17	Operational
Unit-3	25-Jul-12	14-Aug-13	
Unit-4	25-Nov-12	26-Aug-14	
Unit-1	25-Nov-13	-	Stalled condition. No construction activity ongoing since April 2018
Unit-5	25-Jul-13	-	
Unit-6	25-Mar-14	-	

Source: Technical Study Report by L&T-S&L | Dated: December 16, 2020

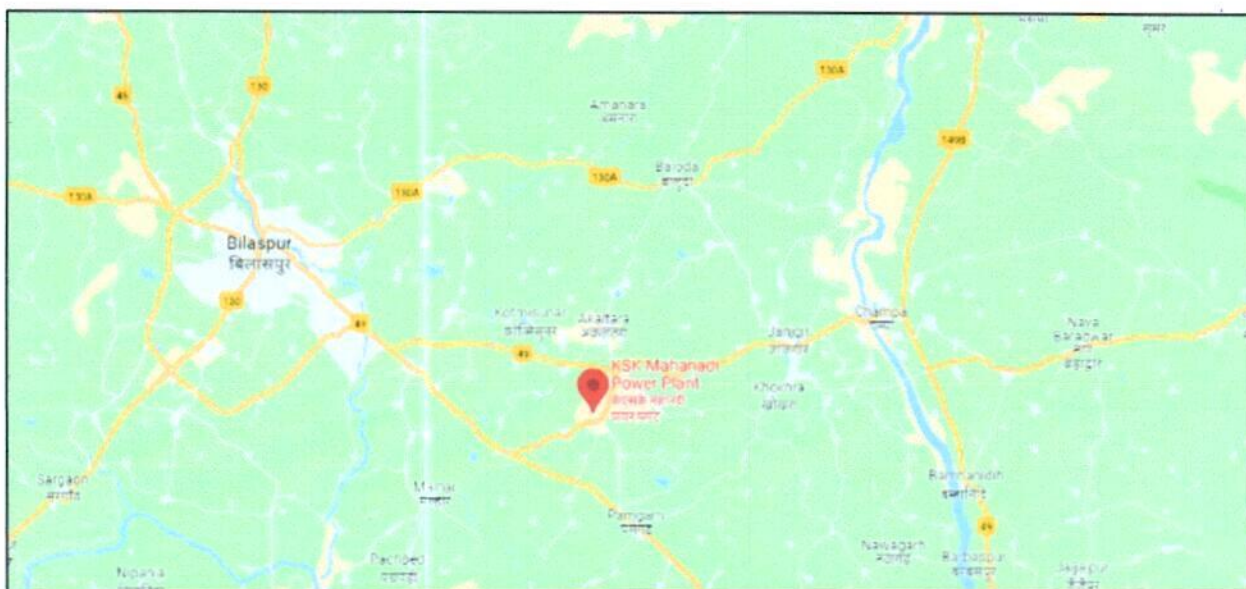

Project Location

The location of the project is right in the heart of the coal belt in Chhattisgarh-Orissa region which ensures ample availability of high grade of coal nearby. The Project is located at Akaltara Tehsil in Janjgir-Champa District of Chhattisgarh and the Project site is well connected by air, rail & road. The nearest town to the project site is Akaltara which is 10 km north east by road from the site. The National Highway NH-200 runs 0.5 km from the site.

The Bilaspur-Janjgir-Champa-Jharsugudha broad gauge railway line passes within a distance of 5 km from the site. Water is available in adequate quantity from the major perennial river

Mahanadi. Thus, the two major ingredients that are required for the functioning of a thermal power plant are easily available nearby, which is a big advantage for it. For this reason, a number of other new independent power producers have set up or are in the process of setting up coal fired thermal power plants of a total capacity of more than 4,000 MW within a radius of 100-150 Km of this plant.

The nearest airport is on the outskirts of Bilaspur, about 43 km from the project. The condition of the roads is good, which provides connectivity to the Project Site.

Land Requirement

For the purpose of setting up the Plant, KMPCL has acquired total land area of 2132.74 acres for the Power Project as shown in the table below:

PROJECT LAND AREA : 6x600 MW COAL BASED THERMAL POWER PLANT OF M/S. KSK MAHANADI POWER COMPANY LIMITED, CHHATTISGARH									
Sr. No.	Village	Private Land Acquisition		Private Purchase		Govt. Land		Total (A)	
		Acres	Hect.	Acres	Hect.	Acres	Hect.	Acres	Hect.
1	Nariyana	111.46	45.13	554.45	224.5	284.71	115.27	950.62	384.87

		434.04	175.72	1186.00	480.16	512.7	207.57	2132.74	863.46

Source: KSKMPCL Management

Implementation Agreement or EPC Contract

The Project is being implemented through a turnkey contract. The Engineering, Procurement and Construction (EPC) contract was executed with M/s. Shandong Electric Power Construction Corporation (SEPCO), a China based EPC Contractor on 1st April 2009. The brief scope of EPC Contract is as under:

- a) Offshore supply: Design, engineering, manufacture, procurement, assembling, shop testing, seaworthy packing, forwarding and delivery of the plant and equipment including commissioning spares, consumables on CFR basis.
- b) Offshore services: Basic engineering, design & engineering services, technical services including interfacing integration and demonstration of Performance Guarantee Values of Units as well as training of KMPCL personnel.
- c) Onshore supply: Design, engineering, approval of drawings, manufacture, procurement, assembling, shop testing, packing, forwarding, transportation and delivery of the plant and equipment at the site including commissioning spares and consumables.
- d) Onshore services: Detailed services including project management, inspection, expediting, supervision of erection, testing and commissioning and such services as may be required from time to time for timely commissioning of the plant.
- e) Construction contract: Undertake earthworks, dewatering during construction, grading and leveling, excavation, foundations, buildings, all other civil works, architectural works, structural works, procurement services, project management, expediting, site mobilization, supervising, co-ordination, inspection, contractor's permits and clearances etc.

Non- EPC Contracts

Project Company has also executed Non-EPC Contracts which includes:

- River water Intake System up to the raw water reservoir within plant boundary – Separate SPV
- Rail infrastructure covering tracks for Coal, fuel oil system etc. - Separate SPV
- Wagon Tippler
- Training Simulator
- CCTV for plant Surveillance
- Development of Green belt area
- Transmission lines
- External Boundary Wall
- Peripheral Storm Drain

According to the philosophy of construction in Phase-I, Phase-II and Phase-III, all Engineering, procurement, supply, construction, commissioning etc. including BOP, CHP, AHP, Switchyard, Rail infrastructure, Water infrastructure, Transmission lines etc. were planned and executed. Therefore, the first unit commissioned was Unit-3, then Unit-4 and finally Unit-2.

Main machinery of the plant includes Boiler, Turbine, Generator, Coal Handling Plant, Ash Handling Plant, Water Treatment Plant, Switchyard, Transmission line, Water pipeline system to bring raw water to the plant, and other auxiliary machinery for running the plant.

Plant is distributed into different blocks comprising of different buildings as per their utility. These mainly comprise of Industrial Structures consisting of massive steel structural members embedded in RCC base and covered by Industrial heavy duty corrugated steel sheets. Also, some buildings are made out of brickwork and RCC with RCC Roofs.

Some of the Buildings like Power House Building, Steel Structure for Raw Water Pump House etc. are capitalized in the Miscellaneous Equipment's under P&M head. The list of the buildings capitalized under this head was not provided to us. So, it is not possible for our team to segregate the buildings.

We have considered the Buildings capitalized in the FAR dated 31-03-2022 of the subject company for the Valuation purpose under the buildings head in the Fixed Asset Register provided to us for the 3 commissioned units. Detailed break-up of the Buildings under Buildings head in the

FAR is annexed with the report for reference however valuation is done on a complete block of buildings as a whole instead of individual structure.

Main sections of the Plant include Boiler House, ESP Building, ESP Control Room, Power House, Service Building, Coal bunker, Switchyard Control room, Control Room, Fly Ash Silos, Chimney among other buildings & sections.

Water Requirement & Raw Water Intake System

The total water requirement for the Project is estimated to be 8655 m³/hr. The water will be sourced from River Mahanadi which is about 45 km from the Project Site. To meet the lean flow period of 2 months in the river, it was decided by the Project Company to store 16 MCM of water at an intermediate reservoir.

Presently, the raw water is being pumped from Basantpur pump house to the reservoir in the plant which can cater to the three units of the plant; water is sufficiently available in the plant. It was informed that during the summer months KMPCL can pump 22.51 MCM (12.51 MCM from Basantpur + 10 MCM from Seorinarayan).

Railway Siding

As per the information gathered from the last valuation report, the railway siding work from Akaltara railway station till up to the plant boundary and return rail over rail bridges outside the plant boundary was being carried out by the SPV; RCRIPL. The siding work inside the plant boundary is being done by KMPCL only and contracts have been awarded to M/s Jhajharia Nirman Pvt. Ltd. for inside power plant boundary and Track and Towers Pvt. Ltd. for outside the power plant boundary. However, the railway siding work outside the boundary wall of the subject plant is owned, operated and carried out by RCRIPL which is not under scope of the present valuation, hence, the same is not included in this valuation.

Coal Linkage or Fuel Supply Agreement and Transportation

For KMPCL, the main source of the fuel is Indigenous Coal which will be supplied from various subsidiaries of Coal India Limited. However we have not got any latest information about the coal linkage or FSA status in the present exercise on our request. However, below we have described the details available from the previous report in this regard only for reference purpose:

The total requirement of coal for operation of 3,600 MW at 85% PLF works out to ~16 MTPA based on gross station heat rate of 2,240 kcal/kWh and average gross calorific value of about 4,000 kcal/kg.

Adhish

A. S.

Initially, coal for the Project was to be supplied from the Gare Pelma-III and Morga-II mines through GIDC/GMDC. To offset any delay in start of production from the new Morga-II mine, KMPCL was allocated tapering linkage of 7.49 MTPA for supply of coal to first three units. Subsequently, KMPCL had also entered into Fuel Supply Agreement (FSA) with South Eastern Coalfields Ltd. (SECL) for tapering linkage of 4.994 MTPA and with Eastern Coalfields Ltd. (ECL) for 1.76 MTPA.

However, the coal blocks were de-allocated after the Supreme Court judgment of 24th September 2014. Further, pursuant to directives from Ministry of Coal (MoC), the tapering FSA with SECL has ceased and a Memorandum of Understanding (MoU) has been executed on 13th July 2015 for supplying 67% of LOA quantity on "best effort basis". Coal will be supplied under this MoU up to 31st March 2016 or until a policy in this regard is formulated by MoC, whichever is earlier.

As per previous report, KMPCL has been sourcing fuel from the open market including under the special forward e-auction for power sector by Coal India Limited (CIL) and coal imports, post the de-allocation of the Morga II and Gare Pelma III coal blocks tied up by the company as per the Supreme Court order dated 24th September 2014. However, the company was able to secure fuel linkage for supply of 6 MTPA (million tons per annum) through the first reverse auction held by CIL for allocation of coal linkages under the SHAKTI policy.

Govt. of India in the month of May 2017 announced a policy for allocation of coal linkage auction for power sector, under 'Shakti' Scheme. Coal linkage under the policy for IPP's with PPA's would be based on bid for discount to existing tariffs. KMPCL had participated in the 'Shakti' Scheme for allocation of coal linkage for the existing units wherein the PPA tie up was in place. The fuel supply agreement (FSA) under this linkage was expected to be signed shortly with CIL, however we do not have the present status with us. This linkage was estimated to be sufficient for meeting about 38% of the fuel requirement of the project at 80% PLF. However, the fuel supply risk persisted for the remaining capacity.

KMPCL has been declared successful bidder pursuant to the Auction Process under 'Shakti Scheme', and was allocated the following:

Table No. 4			
S. No.	CIL Subsidiary	Quantity Allotted (In Tonnes)	Indicative Grade of Coal
1	Mahanadi Coalfields Limited	11,00,000	G12-G14
2	South Eastern Coalfields Limited	12,00,000	G5-G6
3	South Eastern Coalfields Limited	45,00,000	G10-G15
4	Mahanadi Coalfields Limited	20,700	G13
Total		68,20,700	

For imported coal KMPCL had signed a sale agreement with M/s Ask RE Ltd. on 15th October, 2015 for a quantity of 1,50,000 MT+/- 4% having a typical GCV of 5,900 kcal/kg and a rejection limit of less than 5,700 kcal/kg. The coal shall be sourced from Gangavaram port.

Akaltara railway station is the nearest station to the power plant (10 km). As per previous report, Coal that will be transported to the Project by rail will use the Indian Railway network up to Akaltara railway station and thereafter use the railway siding up to the power plant for the transportation of coal.

Power Purchase Agreement

As per the Technical Study Report prepared by L&T – Sargent & Lundy Ltd. dated 16th December, 2020, the subject company has executed various Power Purchase Agreements (PPA) with Power DISCOMs as given in the table below:

Table No. 5				
S. No.	Counter Party	Contracted Capacity (MW)	Original PPA Date	PPA Term/ expiry Date
1	GUVNL (under sub judice with GSERC)	1010 MW	03-Jun-2010	25 years
2	CSPTadeco	~90 MW (5% aggregate capacity of the Unit or the Power Station; 90 MW considering 3 units in operation)	18-Oct-2013	Perpetual
3	TANGEDCO	500 MW	27-Nov-2013	15 years
4	UP DISCOM	1000 MW	26-Feb-2014	25 years
Total		2,600 MW		

As can be seen from the above table, out of the total net capacity of 3,347 MW (considering 7.017% auxiliary consumption), only 2,600 MW has been tied up, and rest of the capacity needs to be tied up by the company. Also, PPA executed with GUVNL of 1010 MW is under sub-judice before Hon'ble GERC. Therefore, total net capacity for which PPAs have been executed is 1,590 MW only.

Power Evacuation Arrangement

As per RKA's old valuation report, the initial plan for power evacuation was through 2 double circuit 400 kV lines to PGCIL's 800 kV HVDC/765 kV/400 kV Champa pooling station, but due to the delay in commissioning of the Champa substation, the Generated power was being evacuated through a 400 kV double circuit LILO connection with PGCIL's existing Raipur–Raigarh transmission line i.e. Line 1.

Operations and Maintenance (O&M) Agreements

(Handwritten signature)

As per the Technical Study Report prepared by L&T – Sargent & Lundy Ltd. dated 16th December, 2020, the subject company has engaged various O&M (Operations & Maintenance) contractors for various O&M activities of different activities of the plant as tabulated below:

Table No. 6			
Sr. No.	Package Description	Agency Name	Contract Completion Date
1	Ash Handling Plant (AHP)	Globus Engineers	31-10-2021
2	Coal Handling Plant (CHP)	McNally Bharat	31-10-2021
3	BTG & BOP (Non Water Block)-O&M Services	Power Mech Projects Limited	31-07-2021
4	BOP-Chemistry O&M Services-Contract	Ion Exchange India Limited	31-07-2021
5	Analysis of Coal & Ash Samples (outside Plant)	Therapeutics Chemical Research Corporation	30-04-2021
6	Electrical and C&I Except CHP & AHP	Voltech O and M Services Pvt. Ltd	30-06-2021
7	Coal and Ash Sampling (Inside Plant)	Quality Services and Solutions	31-07-2021

21	Round the clock Security Services for Open Material Store Yard Area Inside Plant	Megha Security Services	30-06-2021

Agency

All these contracts have been expired already and there is no latest information on whether these are renewed or not has been provided to us by the company.

Status of plant during site survey

At the time of the site survey, 3 units were commissioned out of the planned 6 units and construction of the balance 3 units is on hold from more than 5 years. The manpower is demobilized from the site and the balance work is standstill. Out of the three commissioned units, only two were operational during the site survey. The overall condition of the plant of the commissioned units is good.

CWIP main equipment & machines are also found to be packed and preserved properly under shed except structural material which is lying in open yards.

Year-wise Monthly Electricity Generation Details

Period	Total Capacity (MU)	Actual Generation (MU)
FY 2018 - 2019	15,768	7,872
FY 2019 - 2020	15,811	10,290
FY 2020 - 2021	15,768	10,475
FY 2021 - 2022	15,768	9,002
FY 2022 - 2023 *	11,880	7,667

* pertains to YTD December 2022

- PURPOSE OF THE REPORT:** To assess & determine the current Fair Market Value of the Fixed Assets of the Project pertaining to M/s. KSK Mahanadi Power Company Limited.
- SCOPE OF THE REPORT:** To assess and determine Fair Market Valuation of the Assets as- on- where is basis of 6x600 MW KMPCL Thermal Power Plant covering following points:
 - Valuation of Land.
 - Valuation of Civil & Structures.

- Valuation of the Plant & Machinery of 3 commissioned Units.
- Valuation of Capital Work-In Progress of Under construction Units
- Valuation of other fixed assets of the Project only under M/s. KSK Mahanadi Power Company Limited

5. DOCUMENTS/DATA REFERRED:

General

- Old Valuation Report prepared by RKA dated 12-10-2022
- FA Schedule & FAR Dated 31-03-2022
- Technical Study Report prepared by L&T- Sargent and Lundy Ltd. dated 16-12-2020
- Copies of Approvals and NOC's from various Government agencies and departments
- Petitions under CERC for Approved Capital Cost of Coal based TPP
- Power Plants references available in public domain

Building and P&M

- Fixed Asset Register dated 31-03-2022

CWIP

- Cost bifurcation table shared by the company for CWIP Details for the Under-construction Units of Power Project.

CHARACTERISTICS DESCRIPTION OF THE PROJECT

S.NO.	CONTENTS	DESCRIPTION
3.	INTRODUCTION	
l.	Report prepared for	Financial Institution
m.	Name & Address of Organization	Bank of India, Large Corporate Branch Office, Mumbai
n.	Name of Owner/s	Under Resolution Professional
o.	Name of Property Owner	Under Resolution Professional
p.	Address & Phone Number of the owner	---
q.	Purpose of the Valuation	General Value Assessment
r.	Date of Inspection of the Property	1 March 2023
s.	Date of Valuation Report	3 March 2023
t.	Name of the Developer of the Property	EPC Contract given to M/s. Shangdong Electric Power Construction Corporation (SEPCO) & Non-EPC Contracts to various other contractors
u.	Type of Developer	Private Contractor and EPC Consultant built
v.	Type of Loan	Project Financing
w.	Type of the Property	Thermal Power Plant
x.	Type of Valuation	Industrial Land & Building and Plant & Machinery Valuation
y.	Report Type	Project Detailed Asset Valuation including Project value Addition Factors
z.	Surveyed in presence of/ Information gathered during site survey	Owner's representative Mr. P.K. Nanda (DGM) Contact No.: +91-7024143971
aa.	Scope of the Report	Opinion on General Prospective Valuation Assessment of the Property identified by Property owner or through its representative
bb.	Out-of-Scope of Report	<ol style="list-style-type: none"> 1. Verification of authenticity of documents from originals or cross checking from any Govt. dept. 2. Legal aspects of the property. 3. Identification of the property is only limited to cross verification from its boundaries at site if mentioned in the provided documents. 4. Getting cizra map or coordination with revenue officers for site identification. 5. Measurement of the property as a whole. 6. Measurement is only limited upto sample random measurement. 7. Drawing Map & design of the property. 8. Preparation of inventory list of items. 9. Machines condition assessment is limited to visual observation as-on-is where basis. 10. No technical testing of any accessories/equipment was carried out during survey.

dd.	Identification of the property	<input type="checkbox"/> Cross checked from boundaries of the property mentioned in the deed		
		<input checked="" type="checkbox"/> Done from the name plate displayed on the property		
		<input checked="" type="checkbox"/> Identified by the owner/ owner representative		
		<input type="checkbox"/> Enquired from local residents/ public		
		<input type="checkbox"/> Identification of the property could not be done properly		
		<input type="checkbox"/> Survey was not done	NA	

4. PHYSICAL & LOCATION CHARACTERISTICS OF THE PROPERTY

a. **Brief description of the Property under Valuation:** M/s. KSK Mahanadi Power Company Limited (KMPCL), a subsidiary of KSK Energy Ventures is setting up a 3600 MW (6x600) pulverized coal fired Sub- Critical Thermal Power Plant at villages Nariyara, Rogada, Amora & Tarod of Akaltara Tehsil in Janjgir- Chmapa district of Chhatisgarh State in India.

This is a Sub-Critical pulverized coal fired Power Plant. The Plant comprises of 6 Units of 600 MW each. Out of the total 6 units, 3 units are commissioned and the balance 3 units are at various stages of construction.

The detailed COD dates is given in the table below:

Table No. 7			
Sr. No.	Unit No.	Dates of per Contractual Schedule	COD achieved
1	Unit-3	25 July 2012	14 August 2013

2	Unit-4	25 November 2012	26 August 2014
3	Unit-2	25 March 2013	27 December 2017
4	Unit-5	25 July 2013	-
5	Unit-1	25 November 2013	-
6	Unit-6	25 March 2014	-

Other Project details are already described in 'Brief description of the Project' under Part-A Introduction section.

The location of the project is right in the heart of the coal belt in Chhattisgarh-Orissa region which ensures ample availability of high grade of coal nearby. The Project is located at Akaltara Tehsil in Janjgir Champa District of Chhattisgarh and the Project site is well connected by air, rail & road. The nearest town to the project site is Akaltara which is 10 km north east by road from the site. The National Highway NH-200 runs 0.5 km from the site. The Bilaspur-Janjgir-Champa-Jharsugudha broad gauge railway line passes within a distance of 5 km from the site. Water is available in adequate quantity from the major perennial river Mahanadi.

i.	Is property clearly demarcated by permanent/ temporary boundary on site	Yes
ii.	Is the property merged or colluded with any other property	No, it is an independent singly bounded property Coal Handling Plant & Railway Sidings area is not demarcated with permanent boundary
iii.	Current activity done in the property	Industrial
iv.	Type of Land	Solid
v.	Area of the Plot/ Land	Power Project: 2,132.74 acres (863.46 ha.) Also please refer to Part-B Area description of the property.
vi.	Covered Built-up area description (Plinth/ Carpet/ Saleable Area)	Also please refer to Part-B Area description of the property.
b. Location attribute of the property		
i.	Nearby Landmark	Property is a landmark itself
ii.	Postal Address of the Property	Villages Nariyara, Rogada, Amora & Tarod, Tehsil Akaltara, District Janjgir- Champa, Chhattisgarh, India
iii.	Independent access/ approach to the property	Clear independent access is available
iv.	Google Map Location of the Property with a neighborhood layout map	Enclosed with the Report Coordinates or URL: 21°57'41.1"N 82°24'36.4"E
v.	Details of the roads abutting the property	
	Main Road Name & Width	Akaltara to Pamgarh NA
	Front Road Name & width	Akaltara to Pamgarh NA
	Type of Approach Road	Bituminous Road
	Distance from the Main Road	On main road
vi.	Description of adjoining property	Agricultural lands
vii.	Plot No.	Several

viii.	Village/ Zone	Villages: Nariyara, Rogada, Amora & Tarod	Tehsil Akaltara
ix.	Sub registrar	NA	
x.	District	Janjgir-Champa	
xi.	City Categorization	Village	Rural
xii.	Characteristics of the locality	Average	Within unnotified Industrial area
xiii.	Property location classification	On Wide Road	Road Facing NA
c.	Boundaries schedule of the Property		
i.	Are Boundaries matched	No, boundaries are not mentioned in the documents.	
ii.	Directions	As per Sale Deed/TIR	Found as per Site Survey
	North	NA	Agricultural Land Parcels
	South	NA	Govt. Resham kendra Nariyara
	East	NA	Agricultural Land Parcels
	West	NA	Agricultural Land Parcels

5.	TOWN PLANNING / ZONING PARAMETERS		
a.	Master Plan Area/ Zone	NA/	
b.	Provision of Building by-laws as applicable	PERMITTED	CONSUMED
	i. FAR/ FSI	Not available	Not available
	ii. Ground coverage	Not available	Not available
	iii. Number of floors	Not available	Not available
	iv. Height restrictions	Not available	Not available
	v. Front/ Back/ Side Setback	Not available	Not available
c.	Status of Completion/ Occupational certificate	No information available	No information available
d.	Comment on unauthorized construction if any	Not available	
e.	Comment on Transferability of development rights	As per regulation of Chhattisgarh Govt.	
f.	Master plan currently in force	NA	
g.	Development controls/ Authority	Area not falling under development authority limits	
h.	Municipal limits	NA	
i.	Zoning regulations	Not yet under zoning regulations	
j.	Any notification on change of zoning regulation	NA	
k.	Is property usage as per applicable zoning	It is a village area, no zoning regulations defined	
l.	Comment on the surrounding land uses & adjoining properties in terms of uses	Majorly, all nearby lands are used for Agricultural purpose.	
m.	Any notification for Demolition	No	
n.	Any notification for Compounding/ Regularization	No	
o.	Any notification for land acquisition	NA	
p.	Any notification for road widening	No	

q.	Any information on encroachment	No
r.	Any heritage site restrictions	No
s.	Is the area part of unauthorized area/ colony	No (As per general information available)
t.	Category of Land Use	Industrial
u.	Any conversion of land use done	From Agricultural to Industrial
v.	Street Notification	Not notified
w.	Is property tax been paid for this property	Not Known
	Property or Tax Id No.	Not provided

6. LEGAL OWNERSHIP ASPECTS OF THE PROPERTY				
a.	Ownership documents provided	Sale deed	Lease Deed	NA
b.	Names of the Legal Owner/s	M/s. KSK Mahanadi Power Company Limited		
c.	Constitution of the Property	Free hold and Lease hold		
d.	Agreement of easement if any	NA		
e.	Notice of acquisition if any and area under acquisition	No		
f.	Notice of road widening if any and area under acquisition	No		
g.	Transferability rights of the property ownership	For Free hold, Complete transferable rights & for Lease hold, have to take NOC in order to transfer		
h.	Any known existing mortgages/ charges/ encumbrances on the property, if any	Yes	Consortium of Lenders led by Power Finance Corporation (PFC)	
i.	Whether the owners of the property have issued any guarantee (<i>personal or corporate</i>) as the case may be	Not Known	NA	
j.	Building plan sanction:			
	i. Authority approving the plan	NA		
	ii. Name of the office of the Authority	NA		
	iii. Any violation from the approved Building Plan	NA		
k.	Whether the property SARFAESI complaint	Yes		
l.	i. Information regarding municipal taxes (<i>property tax, water tax, electricity bill</i>)	Tax name	NA	
		Receipt number	NA	
		Receipt in the name of	NA	
		Tax amount	NA	
	ii. Observation on Dispute or Dues if any in payment of bills/ taxes	Not known to us		
m.	Whether entire piece of land on which the unit is set up / property is situated has been mortgaged or to be mortgaged	Yes		
n.	Qualification in TIR/Mitigation suggested if any	NA		
o.	Since how long owners owing the Property	13-14 Years		
p.	Year of Acquisition/ Purchase	2009-10		

q.	Property presently occupied/ possessed by	Legal Owner
r.	Title verification	To be done by the competent Advocate
s.	Details of leases if any	No

7. ECONOMIC ASPECTS OF THE PROPERTY		
a.	Reasonable letting value/ Expected market monthly rental	NA
b.	Is property presently on rent	No
	i. Number of tenants	NA
	ii. Since how long lease is in place	NA
	iii. Status of tenancy right	NA
	iv. Amount of monthly rent received	NA
c.	Taxes and other outgoing	NA
d.	Property insurance details	NA
e.	Monthly maintenance charges payable	NA
f.	Security charges, etc.	NA

8. SOCIO - CULTURAL ASPECTS OF THE PROPERTY		
a.	Social structure of the area (<i>population, social stratification, regional origin, age groups, economic levels, location of slums/ squatter settlements nearby, etc.</i>)	Rural Area
b.	Whether property belongs to social infrastructure like hospital, school, old age homes etc.	No

9. FUNCTIONAL AND UTILITARIAN SERVICES, FACILITIES & AMENITIES			
a.	Space allocation		Yes
b.	Storage spaces		Yes
c.	Utility of spaces provided within the building		Yes
d.	Car parking facilities		Yes
e.	Balconies		Yes
f.	Sewerage / sanitation		Yes
g.	Drainage arrangements		Yes
h.	Water Treatment Plant		Yes
i.	Power Supply arrangements	Permanent	Yes/ As per sanctioned load
		Auxiliary	Yes
j.	HVAC system		Yes/ in the Service Building, Admin Building, Control Rooms and other buildings
k.	Security provisions		Yes/ Private security guards
l.	Lift/ Elevators		Yes/ In the Crusher House, Boiler House, Service Building, Admin Building
m.	Compound wall/ Main Gate		Yes

n.	Whether gated society	Yes
o.	Solar lightening system	No
p.	Internal development	
	Garden/ Park/ Land scraping	Water bodies
	Yes	Yes
	Internal roads	Pavements
	Yes	Yes
	Boundary Wall	Yes

10. INFRASTRUCTURE AVAILABILITY

a.	Aqua Infrastructure availability						
	i. Water Supply				Yes, Mahanadi River through dedicated pipelines		
	ii. Sewerage Treatment Plant (STP)				Yes		
	iii. Storm water drainage				Yes		
b.	Other Physical Infrastructure						
	i. Solid waste management				Yes, Self- managed		
	ii. Electricity				Yes, Self-generated		
	iii. Road and Public Transport connectivity				Yes		
	iv. Availability of other public utilities nearby				Transport, Market, Hospital etc.		
c.	Proximity & availability of civic amenities & social infrastructure						
	School	Hospital	Market	Bus Stop	Akaltara Railway Station	Metro	Bilaspur Airport
	~10 km	~10 km.	~10 km.	~2 km.	~10 km.	NA	~43 km.

11. MARKETABILITY ASPECTS OF THE PROPERTY:

a.	Location attribute of the subject property	Good	
b.	Scarcity	Similar kind of properties are not easily available in this area.	
c.	Availability of recreation facilities (Parks, open spaces etc.)	This is a rural remote area. No recreational facility is available nearby.	
d.	New Development in surrounding area	No new development	NA
e.	Market condition related to demand and supply of the kind of the subject property in the area	Demand of the subject property is in accordance with the current use/ activity perspective only which is currently carried out in the property.	
f.	Any negativity/ defect/ disadvantages in the property/ location	No	NA
g.	Any other aspect which has relevance on the value or marketability of the property	No	

12. ENGINEERING AND TECHNOLOGY ASPECTS OF THE PROPERTY:

a.	Type of construction & design	Industrial corrugated GI Shed and RCC pillar beam column structures. Please refer Part-B of the report
b.	Method of construction	Construction done by professional contractor and EPC consulant based on architect plan

		Construction done using pre-fabricated as well as cast in-situ methodology	
c.	Specifications		
	i. Appearance/ Condition of structures	Internal - Good External - Good	
	ii. Roof	Floors/ Blocks	Type of Roof
		Please refer Part-B of the report	
	iii. Floor height	Please refer Part-B Area Description Chart	
	iv. Type of flooring	Vitrified tiles, Kota stone, PCC	
	v. Doors/ Windows	Aluminum flushed doors & windows, Wooden frame & panel doors	
	vi. Interior Finishing	POP punning, Simple Plastered Walls, Designer false ceiling in office areas.	
	vii. Exterior Finishing	Neatly plastered & putty coated walls, Glass facade, Architecturally designed & elevated	
	viii. Interior decoration/ Special architectural or decorative feature	Simple plain looking structure.	
	ix. Class of electrical fittings	Internal/ Normal quality fittings	
	x. Class of sanitary & water supply fittings	Internal/ Normal quality fittings	
d.	Maintenance issues	No maintenance issue, structure is maintained properly	
e.	Age of building/ Year of construction/ Remaining life expected	Please refer Building Sheet in Part-B	
f.	Extent of deterioration in the structure	No deterioration came into notice through visual observation	
g.	Structural safety	Structure built on RCC technique so it can be assumed as structurally stable. However no structural stability certificate is available	
h.	Protection against natural disasters viz. earthquakes etc.	Not Applicable	
i.	Visible damage in the building if any	No visible damages in the structure	
j.	System of air conditioning	AC is installed in office area	
k.	Provision of firefighting	Fire Hydrant System	
l.	Status of Building Plans/ Maps	NA	
m.	Is Building as per approved Map	Yes appears to be as per visual observation	
n.	Details of alterations/ deviations/ illegal construction/ encroachment noticed in the structure from the original approved plan	<input type="checkbox"/> Permissible Alterations	NA
		<input type="checkbox"/> Not permitted alteration	NA
o.	Is this being regularized	NA	
13.	ENVIRONMENTAL FACTORS:		
a.	Use of environment friendly building materials like fly ash brick, other Green building techniques if any	Standard civil construction material used	
b.	Provision of rainwater harvesting	Yes	

c.	Use of solar heating and lighting systems, etc.	No
d.	Presence of environmental pollution in the vicinity of the property in terms of industries, heavy traffic, etc. if any	NA
14.	ARCHITECTURAL AND AESTHETIC QUALITY OF THE PROPERTY:	
a.	Descriptive account on whether the building is modern, old fashioned, etc., plain looking or with decorative elements, heritage value if applicable, presence of landscape elements, etc.	Well-constructed Industrial Building

PART E

AREA DESCRIPTION OF THE ASSET

- 1. LAND AREA:** For the purpose of setting up the plant, KMPCL has acquired 2,132.74 acres of land via multiple sale deeds, lease deeds and land acquisition act. The area has been cross checked by the satellite tools, snapshot of which is shown below:

Most of the land was acquired in the year 2009 and 2010. Detailed description of land under possession is given in the table below:

Table: 9

PROJECT LAND AREA : 6x600 MW COAL BASED THERMAL POWER PLANT M/S. KSK MAHANADI POWER COMPANY LIMITED, CHHATTISGARH									
Sr. No.	Village	Private Land Acquisition		Private Purchase		Govt. Land		Total (A)	
		Acres	Hect.	Acres	Hect.	Acres	Hect.	Acres	Hect.

2. BUILDINGS & STRUCTURES: Several buildings and structures are erected as per the norms & requirement of a Sub-Critical Thermal Power Plant. Civil Works of the Plant includes construction of roads, boundary wall, sewerage and drainage, Power House, Service Building, Ash Water recovery Pump House, Township Buildings, Sea Water Intake Pump House etc. As per the information provided by the company the total built-up area of the buildings and civil works capitalized in the books of the subject company is 2,34,616 sq. mtr. or 25,24,467 sq. ft.

Detailed break-up of buildings capitalized under Buildings' head in the provided FAR dated 31-03-2022 has been tabulated below:

Unit 2:

Plant Buildings (other than the commissioned units):

Table No. 11			
S. No.	Nature of Expenditure	Gross Block (in ₹)	Net Block (in ₹)
PLANT BUILDINGS			
1	Construction of coal sampling room under TT5 in CHP area	3,26,133	2,55,759
2	Supply and installation of cupboards for time office building	4,41,347	3,71,436
WAGON TIPLER HOUSE			
1	Supply of reinforcement steel for wagon tippler	1,68,94,621	1,31,49,451
2	Supply of steel (TMT BAR 32 MM) for wagon tippler	71,50,381	55,65,300
3	Civil works at wagon tippler area for 6*600 MW power plant & transfer tower at village Nariyara	11,33,73,396	8,82,40,981
4	Earth work excavation at wagon tippler area in connection with railway with railway siding	2,94,32,032	2,29,07,590
5	Supply of 8.89 MT TMT Bar steel to site	27,03,785	21,04,416
6	Supply of TMT bar 20 mm for wagon tippler	2,29,01,905	1,78,25,049
7	Supply of TMT Bar 25 mm for wagon trippler	97,76,664	76,09,392
8	Procurement of steel for wagon tippler	1,17,17,969	91,20,351
9	Supply of Electroformed grating for using as walkways on coal	86,041	66,966
10	Reimb of Freight, Debit Note No.1-2013-PAT	1,16,278	90,503
11	TMT Rebars and MS Plate	30,11,106	23,43,610
12	Earlier debited to Sepco Retention account now transferred to CWIP based email dtd.01.05.14 confirmation from project	21,35,687	16,62,250
13	Earlier debited to Sepco Retention account now transferred to CWIP based email dtd.01.05.14 confirmation from project	1,82,394	1,41,960
14	Earlier debited to Sepco Retention account now transferred to CWIP based email dtd.01.05.14 confirmation from project	3,407	2,651
15	Provision for works executed by Sepco as per mail dtd.23.07.15 of Mr. Repala Srinivasa Rao ref Elecon order No.1527	6,00,000	4,66,994

Other Civil Structures:

Table No. 12			
S. No.	Nature of Expenditure	Gross Block (in ₹)	Net Block (in ₹)
BUILDINGS – OTHERS			
Development of Approach Roads - 171001 - 10 YEARS			
1	Supply & Fixing of 2 Nos Hume pipes for 33 KV Sub-Station Road at Nariyara	-	-
2	Stone dust filling	37,155	-
3	Construction of WBM road for the approach to 33 KV sub station	28,001	-
1	Repairing of road in Km 49/8-10 on NH 49 at KMPCL junction	5,88,637	-
2	Supply of 384 Cu Mtr Crusher Stone 10 mm to 20 mm	2,06,880	-
3	Supply of 384 Cu Mtr Crusher Stone 10 mm to 20 mm	2,07,137	-
4	Supply of 384 Cu Mtr Crusher Stone 10 mm to 20 mm	82,635	-
5	Supply of 150 CU Mtrs Crusher Stone 10 mm to 20 mm	81,823	-
6	Civil work for road block 1 & 2 and dining hall at plant area - nariyara site and Construction of roads at site block offices and dining hall at nariyara plant site	1,19,822	-
7	Supply of RCC Hume pipe 600 MM dia NP3 for construction of approach roads to various facilities at Nariyara plant site	89,251	-

Table No. 12			
S. No.	Nature of Expenditure	Gross Block (in ₹)	Net Block (in ₹)
8	Construction of Approach roads in Camp office area at Nariyara	1,23,996	-
9	Construction of approach road at camp office, Nariyara	11,08,396	-
10	Tariff room approach road in Switchyard area	1,16,143	13,933
11	Construction of CC Road in staff accommodation inside Sepco Living qtrs	7,03,657	84,877
12	Construction of Kesla road	1,16,52,000	73,88,478
NPB - BOUNDARY WALL - 171006 - 30 YEARS			
1	Construction of Boundary wall	44,74,264	39,38,626
2	Construction of boundary wall (Sample)	1,82,532	1,62,300
3	Construction of outer peripheral boundary wall	19,81,788	17,62,117
4	Construction of outer peripheral boundary wall	8,51,940	7,57,506

280	Construction of boundary wall	1,23,970	1,14,150
281	Construction of boundary wall	3,50,350	3,22,604
282	Construction of boundary wall	51,648	47,559
283	Construction of boundary wall	53,900	49,631
284	Construction of boundary wall	26,950	24,817
285	Construction of boundary wall	80,850	74,447
CONSTRUCTION OF WATCH TOWER			
1	Fabrication and erection of watch tower for security	30,66,487	23,81,365
Fencing of Plant Area - 30 YEARS			
1	Porta Cabin fencing & Barricating	-	-
2	MS angles and Flats for fencing & ISA 65x65x6mm for fencing at site	20,88,378	15,63,395

Table No. 12

S. No.	Nature of Expenditure	Gross Block (in ₹)	Net Block (in ₹)
3	Fabrication of PPOST for fencing, Shed for vehicle, security post-2 nso, post fencing for porta cabin	2,00,574	1,50,155
4	Fabrication charges of Angles & pipes with consumables & tools for fencing of plant green belt area	3,23,629	2,42,274
5	Structural steel ISA 90X90X8 MS Angles 20.570 MT	6,16,803	4,61,750
6	Structural steel 24.92 MT for our fencing work at aite (DBR No.157 dtd.16.10.10)	7,87,053	5,89,203
7	GI wiremesh, Red oxide & Tarpin oil for boundary fencing, GI Chain Link fencing 3.08 MT for boundary fencing work & GI Chain link fencing (7.51 MT)	7,43,970	5,56,950
8	Supply of GI fencing wire 1.830 MT for green belt	83,807	62,740
9	Supply of MS Bolt -200 Kg & Nut 25 Kg for boundary wall fencing	13,043	9,765
10	Supply of GI chain link fencing size 50*500 MM wire dia 8SWG, height 3 Mtr (MRN No.GE/11-12/41 dt.23.04.11)	3,21,378	2,40,590
11	Fabrication & Erection of Angles for fencing work at site	12,69,636	9,50,473
12	Supply of Structural steel 29.01 Mt for fencing work at site	8,80,437	6,59,112
13	Supply of Structural steel (19.95 MT) for fencing work at site (MRN No.220 dt.27.01.11)	7,07,463	5,29,621
14	Supply of MS Nuts M-16 (Qty 25 Kg) for fencing work at site	1,709	1,280
15	Supply of MS Nuts 25 Kg & MS Bolts 200 KS, GI Chain link fencing (6.85 Mt), G.I Chain & G.I chain link 7.47 mt for fencing work at site (MRN No.214 dt.14.01.11)	10,23,293	7,66,053
16	Supply of MS Nut M-16 (50 Kg) for site fencing work	3,588	2,685
17	Supply of MS Nut & Bolts for fencing work at site (MRN No.213 & 14.01.11)	15,911	11,910
18	Erection & Fabrication of Angles & Chain link with Civel Material for site fencing work (700 MT)	5,54,090	4,14,801
19	Supply of OG MS Nuts, Bolts, Red oxide (MRN No.219 dt.25.01.11)	34,959	26,173
20	Supply of 1.905 MT GI Chain Link fencing for fencing work at site (MRN No.218 dt.25.01.11), (8.74 MT) of G.I Chain Link fencing for site fencing work (MRN No.6 dt.16.02.11) & (6.75 MT) GI Chain Link fencing (MRN No.GE/KSK/19 dt.16.02.11)	8,24,083	6,16,924
21	Supply of GI Concernita coil 2.5 MM Dia (400 rolls) for fencing work at site (MRN No.GE/KSK/20 dt.26.02.11)	4,07,219	3,04,848
22	Supply of GI Concertina coil 2.5 mm Qty 600 roll & GI Concertina coil 2.5MM at nariyara site	12,09,912	9,05,762
23	Supply of material for fencing of boundary wall (MRN No.GE/KSK/43 dt.15.03.11) & GI Chain link fencing at site (MRN No.GE/11-12/19 dt.15.04.11)	5,43,714	4,07,031
24	Supply of material for fencing of boundary wall (MRN No.GE/KSK/65 dt.21.03.11)	2,09,932	1,57,159
25	Supply of material for fencing of boundary wall (MRN No.GE/KSK/42 dt.15.03.11)	12,84,367	9,61,499
26	Purchase of MS Nuts & Bolts for site fencing work	4,368	3,269
27	Erection of Angles and chain link with materials for fencing work at site, Nariyara	5,54,090	4,14,801
28	Supply of 20 Nos ball valve zoloto	8,436	6,313
29	Supply of ball valve & nipple at site, Nariyara	17,634	13,201
30	Erection of Angles for fencing work at site, nariyara	1,43,132	1,07,152
31	Supply of MS Square bar (Req. for island fencing work near NH)	76,820	64,651
32	Fabrication & Erection of angle chain fencing work	1,07,993	90,885

Table No. 12

S. No.	Nature of Expenditure	Gross Block (in ₹)	Net Block (in ₹)
8	Fabrication, erection, sheeting work in bachelor accommodation	41,008	36,216
9	Construction plinth level for labour colony at Nariyara plant site	6,18,048	5,44,917
10	Construction of labour quarter with masonry foundation and super structure with aerocon panels, plinth for labour colony & security cabin at our project site-nariyara	24,00,324	21,16,870
11	Drinking water platform to facilitate labours at summer season at differenrent location at site	30,374	26,781
12	Water tank foundation work in labour colony area	1,12,899	99,554
13	Civil works for the construction of labour colony two blocks, 20 rooms at nariyara plant site	23,68,264	20,89,264
14	Civil works for labour colony block-3 at nariyara plant site	13,68,991	12,07,725
15	Construction of labour quarter with masonry foundation & super structure with aerocon panels, plinth for labour colony	10,27,857	9,06,376
16	Civil work for the construction of labour colony sheds & Civil works for 20 nos. rooms at labour colony block-4 at nariyara plant site	10,08,200	8,89,428
17	Septic tank in labour colony area at KMPCL site Nariyara	1,13,463	1,00,074
18	Plinth work for labour colony area at KMPCL site, Nariyara	6,19,754	5,46,616
19	Construction of building with 50 MM thick aerocon panel all including GI sheet / MS pipe/ C channel with window & door	22,64,534	19,97,990
20	Fabrication & erection of inter office connection passage at nariyara	2,10,266	1,85,522
21	Toilet block 14 nos work in labour colony area at nariyara	2,49,864	2,20,463
22	Construction of toilet block civil work	6,98,425	6,16,242
23	Miscellaneous works at camp office	2,31,584	2,04,374
24	Construction of servicing room, platfrom and Misc. civil works	3,47,540	3,06,726
25	Construction of labour quarter with masonry foundation	1,71,925	1,51,742
26	Shed work in labour colony	5,84,056	5,15,598
27	Miscellaneous works at camp office - site	1,71,560	1,51,477
28	Supply of stone dust with dressing for labour colony at Nariyara site TPP power plant	62,652	55,317
29	Supply of Ash bed for Labour colony at nariyara Site	23,832	21,044
30	Shed work in labour colony	12,57,055	11,10,179
31	Construction of Septic tank & water sump in staff accommodation inside Sepco Living qtrs	2,42,629	2,14,320
32	Supply of boulder & dust laying compaction in labour colony area	12,28,723	10,85,167
33	Shed work in labour colony	12,88,171	11,37,665
34	Construction of staff accommodation inside Sepco living quarter at project site Nariyara	25,10,403	22,17,545
35	Construction of proposed staff accommodation inside Sepco living qtr at Kmpcl, Nariyara	25,26,453	22,31,719
36	Construction of building for bachelor quarters 1 (block-2) & G+1 (66 DUS) inside the camp office for site	2,56,005	2,26,112
37	Construction of toilet block for admin staff in camp office site (between BAU 1&2) at Banahil staff accommodation - Sepco living qtrs	1,33,254	1,17,702
38	Construction of proposed staff accommodation (Block B) inside Sepco living qtrs at Nariyara	25,55,167	22,57,223
39	Constructed labour colony area for chimney civil work	25,75,653	22,78,348
40	Construction of staff accommodation in sepco living qtrs (Block-C)	23,41,297	20,71,251

Table No. 12			
S. No.	Nature of Expenditure	Gross Block (in ₹)	Net Block (in ₹)
41	Additional manpower for labour colony area	25,74,950	22,77,918
42	Construction of proposed project site staff accommodation (Block-G) inside Sepco living qtrs	23,75,607	21,01,455
43	Construction of staff accommodation inside Sepco living qtrs at Kmpcl, Nariyara	23,60,400	20,88,005
44	Water tank work in camp office Banahil	41,244	36,494
45	Inside Camp office, Banahil miscellaneous work	2,18,847	1,93,634
46	Plumbing connections & Driver room painting work	1,59,422	1,41,075
47	Construction of four room supporting staff quarters (Extension of existing four room qtrs) with masonry foundations & super structure & other Misc works with aerocon panels at our camp office	2,32,263	2,05,459
48	Construction of toilet block for support staff (Adjacent to support staff accommodation) in our camp office site, banahil	2,52,713	2,23,550
49	Construction of Septic Tank in camp office Sr.Mgmnt qtrs, Banahil	2,03,193	1,79,746
50	Shed work in labour colony and LD charges	6,38,869	5,65,143
51	Construction of Sr.Management quarters inside the camp office at Akaltara	3,22,604	2,85,677
52	New Sewer line from Septic tank to main at site office	14,851	13,176

PART G

ASSET VALUATION & COSTING ASSESSMENT

1. **TOTAL PROJECT COST/ CAPEX INCURRED/ TO BE INCURRED IN THE PROJECT:** As per the copy of Technical Study Report prepared by L&T – Sargent & Lundy Ltd. dated 16th December, 2020 the total cost incurred in the subject project is ₹ 20,942 Cr. and to complete the balance 3 units the company has to incur an amount of ₹ 8,693.32 Cr. However, at the time of inception of the project in 2009, the project cost was envisaged at ₹ 16,190 Cr.

For the purpose of this valuation, we have relied on the copy of latest FAR and Balance sheet dated 31st March 2022 shared with us by the company which states that the Gross Block and the Net Block of the tangible assets including CWIP are ₹ 20,612.63 Cr. and ₹ 16,524.82 Cr. respectively. Details of the same has been tabulated below:

Table No. 14			
Sr. No.	Particulars	Gross Block (in ₹ Cr.)	Net Block (in ₹ Cr.)
1	Land - Free Hold	172.58	172.58
2	Buildings	2,006.94	1,508.61
3	Leasehold improvements	5.63	-
4	Plant and Machinery	13,532.03	10,036.03

B	Building and Civil Works	
1	Unit-5	95.19
2	Unit-1&6	200.373
Total - B		295.56
C	Additional Cost towards meeting the Environment Norms	
1	FGD	1,872.00
2	ESP Modification	12.00
Total - C		1,884.00
Grand Total (A+B+C)		8,693.32
Source: Technical Study Report by L&T dated 16-12-2020		

The cost of ancillary infrastructure set up through separate SPVs i.e. M/s. Raigarh Champa Rail Infrastructure Pvt. Ltd (RCRIPL) and M/s. KSK Water Infrastructure Pvt. Ltd. (KWIPL), is not considered in the above cost since that is not under scope of the valuation.

There was one cost overrun (COR) in the Project. Main reasons for the COR as advised in the IM dated: January, 2016 prepared by SBICAPS was due to various reasons like delay in financial closure, manpower mobilization constraint faced by EPC contractor, adjustment in EPC contractor's scope and issues during detailed engineering, change in construction methodology, incessant rain and prolonged monsoon periods, commotion by villagers, non-infusion of equity by GIDC/GMDC, increase in Interest During Construction (IDC), adverse forex fluctuation, and increase in scope of work etc.

- 2. PRESENT STATUS OF THE PROJECT:** As per the information received during the site visit and the status mentioned in the Technical Study Report by L&T dated 16-12-2020, following is the status of all the 6 units are the details related to the balance 3 under construction units (construction stalled since past 3 years).

Table No. 17

Unit No.	Status
3	<ul style="list-style-type: none"> Commercial Operation Commenced on 14/08/2013 Performance Guarantee Test completed on 14/04/2015 On standby as on date of site visit from last 1 week
4	<ul style="list-style-type: none"> Commercial Operation Commenced on 26/08/2014 Performance Guarantee Test completed on 24/01/2016
Units in the construction stage	
1	The construction activities were stopped since April 2018
5	The construction activities were stopped since April 2018
6	The construction activities were stopped since April 2018

3. **PROJECT ASSET VALUATION:** Any Valuation assessment broadly falls under any of these 3 Methodologies: **a. Cost approach, b. Market Approach, c. Income Approach.**

Accordingly, all the asset items broadly grouped together under 3 categories viz., a. Land, b. Building, Structures & Civil works, c. Plant & Machinery and other assets are evaluated separately.

Land Valuation is done commonly for the all the Units of Power Project based on the **"Comparable Market Sales approach"** with taking adjustments for the Industrial Land.

Capitalized/Commissioned Units

Based on the nature of asset and our scope of work of Asset Valuation we have considered **mixed approach of Cost + Market**, wherein Land valuation is assessed based on the **Market approach** and Building, structures and Plant & Machinery & other assets are assessed based on the **Depreciated Replacement Value of Asset**.

Under Construction/CWIP Units

In CWIP Building, structures and Plant & Machinery & other assets are evaluated based on **"Depreciated Replacement Value of Asset"** after taking adjustment for replacement value of the Project cost for 3600 MW and deductions for unreasonable cost and doing adjustments for uncertainty factor since the work is on standstill.

[Handwritten signature]

[Handwritten initials]

4. LAND VALUATION ASSESSMENT

A. METHODOLOGY ADOPTED: The total land acquired by KMPCL for the purpose of setting up the Project stands at 2132.74 acres.

Overall Land Valuation assessment is done considering the Land use for Power Project Land only as its highest & best use since the transaction of this land will be done based on the established Project only and separation of it from the Project will be virtually impossible, at least up to the complete economic life cycle of this Plant which is taken as 25 years.

Assessment is done based on Comparable Market Sales approach prevailing in the market at the time of survey that would cost as on date of Valuation if the similar land with similar area is acquired today. This includes individual negotiations, land aggregation, land acquisition consideration etc.

Fragmentation sale of a large land may have different values. While assessing the Valuation of the land in this Valuation Report, it is considered as on-is-where basis for the purpose it is used for which was found at the time of site survey.

Circle Rate Value: Circle rate of the land is calculated based on “**General instructions for Market value assessment year 2019-20**” guidelines issued by Stamp & Registration department of Akaltara Tehsil, Distt. Janjgir Champa, Chhattisgarh. In the procedure of assessment following points are taken into consideration:

1. This Project Land is used for Industrial purpose. The prescribed circle rates are given for the agricultural land (irrigation) and agricultural land (non-irrigation) only.
2. No rates are prescribed for Non-agricultural/industrial land separately for these villages.
3. Project Company has acquired Agricultural Land (Non-irrigation) and further converted it to Industrial purpose.
4. Hence for the reference indicative purpose, we have considered the prescribed Agriculture Land (Non-Irrigation) rates only.
5. Copy of the guideline rates is annexed with the report for reference.
6. The current ongoing Guideline/Circle Rates of Agricultural Land (Non-irrigation) in Villages named are as follows:

Table No. 18			
S. No.	Village	Circle/Guideline rate	
		Rs. Per Hectare	Rs. Per Acre
1	Nariyara	21,70,000	8,78,169

2	Tarod	21,00,000	8,49,841
3	Amora	14,25,900	5,77,042
4	Rogda	12,53,000	5,07,072

Fair Market Value: Market Value of this Project land would be the value which any new promoter company will be spending the amount in procuring the equal measurement of the land parcel if it wants to setup a similar plant today at the same or similar location.

Detailed micro market research for this locality was done in September, 2022 too. As per current survey, no material change in the market situation was found in that locality. Accordingly references gathered in September, 2022 and as per the current survey are mentioned as below:

1. Significant recent sales comparable & market rate enquiries were made from local villagers and small shop owners of few villages where major land is acquired.
 - A small shopkeeper in the village-Nariyara (Mr. Ajay Kumar Yadav, Mob: +91- 62600 15465): As per him current ongoing transactional rates are ranging from Rs.15.00 – 20.00 Lacs per acre for land near to KSK Power Plant. He said that the transactional rates in the inside of the main road are around Rs.13.00 Lacs per acre.
 - A resident of Tarod village: He said that the average asking rate by the villagers is ranging from Rs.14.00 – 18.00 Lacs per acre for the land parcels located near to road and near to KSK Power Plant. The land parcels will fetch lesser value as we go away from the road and KSK Power Plant.
 - A resident of Amora village: He said that the average asking rate by the villagers is ranging from Rs.12.00 – 16.00 Lacs per acre for the land parcels located near to KSK Power Plant.
 - A resident of Rogda village: He said that the average asking rate by the villagers is ranging from Rs.10.00 – 14.00 Lacs per acre for the land parcels located near to KSK Power Plant.
2. During the site visit our engineering team has conducted a market survey of the area near to the plant and its suburbs. After interaction with around 5-6 local habitants, the rates which came into our knowledge ranges between Rs.12.00 Lacs to 20.00 Lacs per acres for agricultural land nearby KSK Power Plant. After purchasing agriculture land, it can be converted to industrial land as a normal practice for any non-industrial area land.
3. Historical land transaction information for this land is also referred. KMPCL has shown the land value at Rs.344.00 Cr. in the Revised Project Cost which translates to Rs.16.13 lakhs per acre.

Ajay

4. Out of the total Land area measuring 2,132.74 acres, it is estimated that around 45% & 25% of the total Project Land lies in Village Nariyara & Village Tarod respectively which lies near to the road. Rest of the land located in Village Amora & Rogda lies on the back side of the Power Plant.
5. Acquisition and congregation of such a large land parcel is a highly cumbersome task through purchase of individual land parcels by individual negotiations which is nearly impossible job to do. Whenever such large land parcels are acquired for Industrial purpose then Land Acquisition Act, 2013 is taken into use and accordingly the state & district administration acquires the required land to setup such projects. According to the Land Acquisition Policy-2019, the land rate comes out to be Rs.17.57 Lakhs per acre in village Nariyara, Rs.17.00 Lakhs per acre in village Tarod, Rs.11.55 Lakhs per acre in village Amora and Rs.10.15 Lakhs per acre in village Rogda.
6. Based on the facts & information on record in our opinion applying the law of average for such a large land parcel, Rs.18,00,000/- per acre for the land parcels lying in Village Nariyara (since it is in front portion), Rs.16,00,000/- per acre for the land parcels lying in Village Tarod, Rs.14,00,000/- per acre for the land parcels lying in village Amora and Rs.12,00,000/- per acre for the land parcels lying in Village Rogda which lies on the back side of the power plant would be reasonable rate which can be considered for the project land.
7. Additionally, 5% premium charges are added on this rate which covers the land arranging effort cost, land conversion charges etc. to reach out to Fair Market Value of Project Land and approximately Rs.20.00 Cr. for lump sum Charges for Land Levelling and Site Development.

Therefore, the land valuation is as follows:

Table No. 19						
Sr. No.	Village	Area (in Acres)	Market Rates (₹ Cr. per acre)	Market Value (in ₹ Cr.)	Additional premium of 5% (in ₹ Cr.)	Total (in ₹ Cr.)
1	Nariyara	950.62	0.18	171.11	8.56	179.67
2	Tarod	515.67	0.16	82.51	4.13	86.63
3	Amora	335.15	0.14	46.92	2.35	49.27
4	Rogda	331.30	0.12	39.76	1.99	41.74
Sub-Total		2,132.74		340.30	17.01	357.31
Lump sum Charges for Land Levelling, Site Development						20.00
Arrived Land Value						377.31
Arrived Fair Market Value (Considering 3.60% Economic Obsolescence on land value)						363.74

5. BUILDING & STRUCTURES VALUATION ASSESSMENT

A. METHODOLOGY ADOPTED: The fair market value of the building as on the date of valuation is its cost of reproduction on that date less the depreciation & other deterioration deductions from the date of completion of the buildings to the date of its valuation.

- As per copy of provisional BS dated 31-12-2022, the total Gross Block & Net Block of buildings is Rs. 2,016.97 Cr. & 1,452.00 Cr. respectively. However, breakup/FAR of the same is not shared with us. Due to absence of FAR dated 31-12-2022, we have considered FAR dated 31-03-2022 for the purpose of valuation.
- Value of the individual structure is not calculated based on the Depreciated Plinth Area Rate since the company has not capitalized the Buildings by its name in the Fixed Asset Register and it is not possible for our team to match the same with the building area sheet provided by the company.
- While preparing FAR, in such Plants many a times there is an overlapping in the categorization of building & civil works and Plant & Machinery.
- Therefore to avoid discrepancy and double valuation, we have considered FAR as the sole basis of the valuation calculation and the buildings mentioned in the FAR is taken as it is.
- As per the information received during the site visit, date of capitalization of each unit has been tabulated below:

Table No. 20	
Unit No.	Date of Capitalization
3	14 th August, 2013
4	26 th August, 2014
2	28 th February, 2018

- The structures in Unit # 1, 5 and 6 are under construction and has been considered separately in the valuation of CWIP section of this report.
- For detailed break-up of the Buildings capitalized in the FAR, please refer Part C: Area description of the asset.
- Valuation is done on a complete block of buildings as a whole instead of individual structure.
- Replacement Cost of the Civil Structures is calculated based on the Construction Cost Index (CCI) from the date of capitalization till the date of valuation in Unit 2, 3 and 4.
- The CCI indices are available till the year 2021, further, as per the CPWD's Office Memorandum dated 13th May 2022, Building cost index over plinth area rates (PAR) 2021 is approved as 110 as on 1st April 2022 with base 100 as on 1st April 2021.

- Depreciation is charged on the structures considering the life to be 30 years to absorb the residual value of the structure after completion of the economic life of the plant which is 25 years. (As per CERC the estimated life of Coal based Thermal Power is 25 years).
- It is assumed that the capitalized cost in the FAR is inclusive of all the Soft Cost (Finance Charges, Pre-operatives, Interests, etc.) related to Civil & Structures.
- A mark-up of ~15% is taken on the depreciated value of the structures for reaching out to the fair market value, since, the BTG building is half completed and is open from 2 ends and other miscellaneous supporting structures requires some finishing works.
- Except point above, the condition of the buildings and structures found to be good during the site visit.
- We have also referred some petitions before State Electricity Regulatory Commission for the approval of Capital Cost of TPP setup recently. The Per MW cost of construction of the buildings/structures appears to be in the same line with the capitalized cost in the subject project.
- Units-2 comprises of Control Room, cooling tower, crusher house, internal road, compound wall etc.
- Unit-3 comprises of pulverizer room, cooling tower, track hopper, control room, plant building, watch tower, parking sheds, drains office building etc.
- Unit-4 comprises of Track Hoppers, Earth works, Signaling & telecom Buildings, Security building, Drains, Culverts, Crossovers etc.
- Plant building comprises CHP Area, Time Office, Civil work of Wagon Tippler etc.
- Other Building comprises construction of peripheral boundary wall, fencing, drainage green belt development etc.

Ashar
Dr. A

B. BUILDINGS & STRUCTURAL WORKS CALCULATIONS: Below table shows the Cost of Capitalization (EPC and Non-EPC) under Buildings head which is extracted from the Fixed Asset Register dated 31.03.2022 provided to us by the company & the Valuation of Civil and Structure as on date:

Figures in Cr.

Table No. 21					
As per KMPCL as on 31-03-2022			As per RKA as on 03-03-2023		
Particular	Gross Block	Net Block	GCRC	DRC	Fair Market Value
Unit 2	₹ 487.97	₹ 400.98	₹ 538.59	₹ 382.26	₹ 368.50
Unit 3	₹ 607.18	₹ 370.72	₹ 684.24	₹ 415.85	₹ 400.88
Unit 4	₹ 821.18	₹ 667.32	₹ 917.40	₹ 580.94	₹ 560.03
Total Main Units	₹ 1,916.32	₹ 1,439.02	₹ 2,140.23	₹ 1,379.05	₹ 1,390.40
Plant Buildings	₹ 22.09	₹ 17.19	₹ 24.64	₹ 16.23	₹ 15.65
Other Buildings	₹ 68.53	₹ 52.39	₹ 76.45	₹ 50.36	₹ 48.55
Leasehold Improvements	₹ 5.63	-	-	-	-
Total Others	₹ 96.24	₹ 69.58	₹ 101.08	₹ 66.59	₹ 64.19
Grand Total	₹ 2,012.56	₹ 1,508.61	₹ 2,241.31	₹ 1,445.64	₹ 1,393.60
Per MW cost	Rs.1.12	Rs.0.84	Rs.1.25	Rs.0.80	Rs. 0.77

**PART H PLANT & MACHINERY VALUATION ASSESSMENT FOR THE
 COMMISSIONED UNIT- 2, 3, 4 & OTHER SUPPORTING MACHINERY**

A. BRIEF DESCRIPTION OF THE PLANT: This Valuation report is prepared for the Project with a capacity of 6x600 MW Pulverized Coal Based Thermal Power Plant named setup by KSK Mahanadi Power Company Limited (KMPCL). This plant is based on Sub – Critical Technology.

This is a Sub-Critical pulverized coal fired Power Plant. The Plant comprises of 6 Units of 600 MW each. Out of the total 6 units, 3 units have achieved COD and balance 3 units are at various stages of construction.

The below table shows the COD's as per contractual schedule, Actual COD and Revised COD's as per KMPCL:

Table No. 22			
Unit	Date of Contractual Schedule	COD Achieved	Current Status
Unit-2	25-Mar-13	28-Feb-17	Operational
Unit-3	25-Jul-12	14-Aug-13	
Unit-4	25-Nov-12	26-Aug-14	
Unit-1	25-Nov-13	-	Stalled condition. No construction activity ongoing since April 2018
Unit-5	25-Jul-13	-	
Unit-6	25-Mar-14	-	

At the time of site survey, out of the total 6 units, 3 units (2nd, 3rd & 4th) are commissioned and the balance 3 units are at various stages of construction since long of which currently all construction

is on hold from last more than 5 years. Accordingly 3 units are capitalized in the FAR and abrogated units are captured in CWIP. Thus, valuation of this whole plant is broadly computed based on the 3 commissioned units (2, 3 & 4) and CWIP separately for the noncommissioned units (1, 5 & 6). The Overall condition of the Plant is good.

The main sections of the KSK Mahanadi Power Plant includes Plant area, Railway line, Ash ponds, Coal handling unit and other miscellaneous structures. The location advantage for the plant site is proximity to Highway and Railway which makes the import of the coal more efficient.

The list below tabulates the make, technical details and physical condition of machineries installed in the plant:

Table No. 23					
Major Machinery					
S. No.	Name of machinery	Make	Technical Specifications	Qty	Condition
1	Boiler	Shanghai Boiler Works Ltd.	600 MW Each	3	Fair
2	Turbine	M/s. Dong Fang turbine factory Ltd. CHINA	600 MW Each	3	Fair
3	Condenser	Shanghai power station auxiliary factory	35000 TPH Each	4	Fair
4	Coal Handling Plant	BSBK Engineers Pvt. Ltd.	2500 TPH	1	Fair
5	Compressor (Plant Air Compressor)	Atlas Capco	3150 M ³ /Hr	6	Fair
6	Ash Handling Plant Compressor	Algi	16 M ³ /Hr	9	Fair
7	Coal Mill	Shanghai heavy Machinery plant co ltd	42 TPH	1	Fair
8	Ash handling Plant	BSBK Engineers Pvt. Ltd	32 TPH	2	Fair
9	ESP	Shanghai metallurgical and mining machine manufactory	99.95%	1	Fair
10	FGD	Alstom		1	Fair
Auxiliary Machinery					
Sr. No	Name of machinery	Make	Technical Specifications	Qty	Condition
1	GIS	ABB	420 KV	1	Fair
2	Reactor	ABB	50 MVA		Fair
3	Transformer	ABB	355 MVA	4	Fair
4	DM Water tank	Local Manufacture	100 CUM	2	Fair
5	Fire Water tank	Local Manufacture	1250 CUM	2	Fair
6	Switch Gear	ABB	4000Amp	1	Fair

The Project is being implemented through a turnkey contract. The Engineering, Procurement and Construction (EPC) contract was executed with M/s. Shandong Electric Power Construction Corporation (SEPCO), a China based EPC Contractor on 1st April 2009. The brief scope of EPC Contract is as under:

- a) Offshore supply: Design, engineering, manufacture, procurement, assembling, shop testing, seaworthy packing, forwarding and delivery of the plant and equipment including commissioning spares, consumables on CFR basis.
- b) Offshore services: Basic engineering, design & engineering services, technical services including interfacing integration and demonstration of Performance Guarantee Values of Units as well as training of KMPCL personnel.
- c) Onshore supply: Design, engineering, approval of drawings, manufacture, procurement, assembling, shop testing, packing, forwarding, transportation and delivery of the plant and equipment at the site including commissioning spares and consumables.
- d) Onshore services: Detailed services including project management, inspection, expediting, supervision of erection, testing and commissioning and such services as may be required from time to time for timely commissioning of the plant.
- e) Construction contract: Undertake earthworks, dewatering during construction, grading and leveling, excavation, foundations, buildings, all other civil works, architectural works, structural works, procurement services, project management, expediting, site mobilization, supervising, co-ordination, inspection, contractor's permits and clearances etc.

Project Company has also executed Non-EPC Contracts which includes the Railway Siding Works, Transmission Lines Works & Development of Green belt.

For the above works, KMPCL has signed agreements with the following contractors to execute the work:

- a) M/s. Track & Towers Pvt. Ltd. : Railway siding works
- b) M/s. Jhajharia Nirman Pvt Ltd.: Railway siding works
- c) Chhattisgarh Rajya Van Vikas Nigam Ltd. : Development of green belt in and around the power plant
- d) L&T Limited: Design, supply and construction of 400 kV transmission line from plant to PGCIL's pooling station.

Abhis
A

The construction of railway infrastructure from Akaltara railway station to project site and other related works like rail corridor, power evacuation and raw water system were the responsibilities of government agencies but since these got delayed therefore KMPCL took up the work by forming Special Purpose Vehicle (SPV) namely Raigarh Champa Rail Infrastructure Pvt. Ltd. (RCRIPL) and KSK Water Infrastructure Pvt. Ltd. (KSKWPIL) for the development of rail corridor and raw water system respectively. However since these 2 SPVs are not under scope of this report, therefore the works done under these SPVs are also not made part of this report.

The below is the list of the contracts awarded to various contractors by KMPCL Management for the establishment of this 6x600 MW Thermal Power Plant:

PROJECT CONTRACTS		
Sr.No.	Contracts	Contractors
1	Offshore supply, offshore services, onshore supply, onshore services and construction services	Shangdong Electric Power Construction Corporation (SEPCO), China
2	In-plant railway siding	Jhajharia Nirman and Track and Towers
3	Transmission line upto PGCIL pooling substation	L&T Limited
4	Raw water intake system (Pump house, Intermediate reservoir and pipeline upto plant)	KSK Water Infrastructure Pvt. Ltd.
5	Railway siding outside plant	Raigarh Champa Rail Infrastructure Private Ltd
6	Development of Green belt in and around power plant	Chhattisgarh Rajya Van Vikas Nigam Ltd
Source: 25th Progress Report of Steag Energy Services India Pvt Ltd. Dated Feb 2018		

Main machinery of the plant includes Boiler, Turbine, Generator, Coal Handling Plant, Water Treatment Plant, Switchyard, Transmission line, Water pipeline system to bring raw water to the plant from Mahanadi River, and other auxiliary machinery for running the plant.

Main sections of the Plant include Boiler House, ESP Building, ESP Control Room, Turbine Building, Switchyard Building, Coal bunker, Station Building, Service Building, Control Room, Fly Ash Silos, Chimney among other additional buildings & sections.

This Power plant is compliant with all the required necessary statutory approvals, licenses, NOCs like Consent to Operate, NOC for Construction of Chimney, NOC from MoEF, Water drawl from River Mahanadi etc.

B. POWER GENERATION PROCESS:

- First, the pulverized coal is burnt into the furnace of steam boiler.
- High pressure steam is produced in the boiler.
- This Steam is then passed through the super heater, where it is further heated up.
- This heated steam is then entered into a turbine at high speed.
- In the turbine, this steam at high pressure rotates the turbine blades i.e., potential energy of the high pressured steam is converted into mechanical energy.
- After rotating the turbine blades, the Steam loses its high pressure, passes out of turbine blades and enters into a condenser.
- In the condenser the cold water is circulated with help of pump which condenses the low pressure wet steam.
- This condensed water is then further supplied to low pressure steam increases the temperature of this feed water, it is then again heated in a high pressure heater where the high pressure of steam is used for heating.
- The turbine in thermal power station acts as a prime mover of the alternator.

C. FUEL SUPPLY AGREEMENTS (FSA): The project was planned to use domestic coal from two coal blocks namely Gare Pelma-III and Morga-II. After the Supreme Court's order to de-allocate the tied-up coal blocks on 24th September 2014, KMPCL has been sourcing fuel from the open market including under the special forward e-auction for power sector by Coal India Limited (CIL) and coal imports. However, the company has secured fuel linkage for supply of ~6.8 MTPA through the first reverse auction held by CIL for allocation of coal linkages under the SHAKTI policy (Scheme for Harnessing and Allocating Koyala (Coal) Transparently in India).

At present Coal is being purchased through FSA linkage coal, E-Auction or Market / Traders or Imported. The Coal is transported from Mines / Source / Port through Railways and Road as applicable:

Table No. 24			
SHAKTI linkage sources	Acq. Qty. (MT) as per FSA for PPA of 2128 MW	Acq. Qty. (MT) for 3 units (1800 MW)	
Talcher (MCL)	20,700	17,509	
IB Valley (MCL)	11,00,000	9,30,451	
Korea Rewa (SECL)	12,00,000	10,15,038	
Korba & Mand-Raigarh (SECL)	45,00,000	38,08,391	
Total	68,20,700	57,71,389	

Additional Allocation of Linkage Coal

KMPCL has received the LOA from MCL and LOI from SECL for additional allocation of coal through auction process. KMPCL informed that FSAs for these allocations are yet to be made.

Table No. 25				
Source	LOA / LOI Reference	Allocated Qty. (MT)	Coal Range	Remarks
IB Coalfields (MCL)	No. MCL/ SBP/ GM(M&S)/ Comml./ 2019-20/ 3087 Dated 12/03/2020	6,50,000	G12 – G14	19.58% of premium on Notified Price
Talcher Coalfield (MCL)	No. MCL/ SBP/ GM(M&S)/ Comml./ 2019-20/ 3087 Dated 12/03/2020	2,00,000	G12 – G14	12.24% of premium on Notified Price
Korba & Mand Raigarh (SECL)	No. SECL/ BSP/ M&S/ FSA/ SHAKTI/ LOI/ B(iii)(R-3)/ 2/ KSK/ 758 Dated 10/07/2020	4,34,200	G10 – G15	Levellised discount of 7 paise / kWh
Total		12,84,200		

The allocation is for the specified end use plant of KMPCL. The LOA / LOI is only indicative of the quantity allocated and any entitlement to such quantities of coal is subject to execution of the FSA

in accordance with the provisions of the Scheme Document and satisfaction of the conditions prescribed in the FSA.

D. POWER PURCHASE AGREEMENTS (PPA): As details mentioned TEV Report by L&T-S&L dated 16th December 2020, KMPCL has signed power purchase agreements to sell power from its 6x600 MW Coal Fired Thermal Power Station as below:

Table No. 26				
S. No.	Counter Party	Contracted Capacity (MW)	Original PPA Date	PPA Term/ expiry Date
1	GUVN (under sub judice with GSERC)	1,010 MW	03-Jun-2010	25 years
2	CSPTradeco	~90 MW (5% aggregate capacity of the Unit or the Power Station; 90 MW considering 3 units in operation)	18-Oct-2013	Perpetual
3	TANGEDCO	500 MW	27-Nov-2013	15 years
4	UP DISCOM	1,000 MW	26-Feb-2014	25 years
Total		2,600 MW		

As can be seen from the above table, out of the total net capacity of 3,347 MW (considering 7.017% auxiliary consumption), only 2,600 MW has been tied up, and rest of the capacity needs to be tied up by the company. Also, PPA executed with GUVNL of 1010 MW is under sub-judice before Hon'ble GERC. Therefore, total net capacity for which PPAs have been executed is 1,590 MW only.

E. TECHNOLOGY COLLABORATIONS: M/s. SEPCO, a wholly owned subsidiary of Shandong Electric Power Corporation, China was the EPC (*Engineering, Procurement and Construction*) contractor for establishment of 6x600 MW Coal Based Thermal Power Plant of KMPCL. SEPCO is one of EPC company in the core area of technology and is engaged in the design, manufacture and sale of products including power generation equipment, power transmission and distribution equipment, transformers, switch gears, circuit breakers etc. However present service terms with SEPCO is not clear that whether they are still providing maintenance services to the Plant or not.

F. INFORMATION INPUT FOR ASSESSMENT: One common fixed asset register was provided to our team having installed cost, WDV, Capitalization Cost, Unit Name, Asset Name etc. for three commissioned units. Break-up of Soft & Hard Cost is not mentioned in the shared FAR dated 31st March 2022.

G. SURVEY DETAILS:

Abhay

A

rk

rk Associates Valuers & Techno Engineering Consultants Pvt. Ltd.

- i. This plant has been surveyed by our Engineering team comprising of Mechanical Engineer. Site inspection was done in the presence of plant representatives.
- ii. Only major machinery, equipment & sections were cross checked as per the documents provided to us and sample random checking was done of the overall plant.
- iii. Team visited all the different blocks of the plant.
- iv. Permission to take photographs of each asset, were not allowed by the company's management.
- v. Plant and all its installed machinery equipment were found in good condition at the time of survey.
- vi. At the time of site survey, out of the planned 6 units; only 3 units were commissioned and construction of the balance 3 units was stalled since the year 2018.
- vii. As on date of site visit, unit-2, unit-3 and unit-4 were operational.
- viii. As per TSR dated 16th December 2020, prepared by L&T – Sargent & Lundy Ltd., there are some pending works of Unit-2 as described below related to the sections: TDBFP, W Pump-Common Standby, Workshop tools 7 tackles, Boiler elevator, One single phase GT, Bull Dozer, Fork lift, etc. which are yet to be done.
- ix. Machine condition reported in this report is only based on the visual observation. No mechanical/ functional testing is carried out to know the efficiency or condition of the machines.
- x. This valuation is done only on the basis of the physical existence of the assets during the site survey rather than their technical expediency.
- xi. As per Monthly electricity generation data shared, the average PLF from April 2022 to November 2022 is about 63.37%.
- xii. Balance works for Unit 2: As per the TSR Report dated 16th December 2020, following are the major concerns for Unit 2 continuous operation /full Load:
 - Non-availability of 2nd TDBFP, not yet dispatched from China.
 - Rectifications of Pump of 1st TDBFP: Thrust bearing found damaged during commissioning period, hence the Pump assembly has been replaced with 2nd TDBFP pump for Unit#2 COD (72 Hours continuous operation). 1st TD-BFP pump has to be rectified (as spare) before unit in continuous operation.
 - Non-availability of 3rd / Standby BCC Pump, replacement/repair of 3rd BCCW pump
 - Non-availability of 3rd CW Pump & Motor, not yet dispatched from China.
 - Unit 2 Balance / Punch Points to be completed (List required for monitoring the works)

Aditya
in A

The detailed balance works for Unit 2 under various heads and the estimated cost of balance works is shown in the tables below:

BTG & BOP BALANCE WORKS:

Sr. No	Equipment/ System	Comp %	Balance work Status	LTSL Observations/ Comments
1	Boiler Erection	95%	Boiler Platforms & walkways, Insulation sheeting erection work under progress Boiler water wall, Ducting Insulation cladding work under progress.	Additional manpower engagement is required for timely completion
2	TG Erection	100%	Erection & Painting of Noise Acoustic covers for main Turbine & TDBFP has been completed.	
3	Condenser erection	99%	COLTCS system erection has been completed. Commissioning is U/p.	
Sr. No	Equipment/ System	Comp %	Balance work Status	LTSL Observations/ Comments
4	BTG Piping	96%	Piping Permanent support has been completed, Insulation cladding work under progress.	
5	TD BFP erection	60%	1 st TD BFP erection completed. 1 st TD-BFP pump Thrust Bearing found damaged during commissioning. Hence, it has been replaced with 2 nd TD-BFP pump for Unit#2 COD. 2 nd TDBFP – Erection balance.	1 st TD-BFP pump has to be rectified before unit in continuous operation. 2nd TD BFP –material not received at site.
6	CW Pump Erection	50%	3 rd CW Pump (stand by) - Erection not started.	Material Constraint:- 3 rd CW Pump & Motor yet to be received at site
7	Ash Handling Plant	95%	Bottom ash hopper ash disposal Clinker grinder drive assembly, feed gate Overflow tank & pumps erected & commissioned. Commissioning through PLC under progress.	Ash transport compressors reliability is poor.

Estimated Cost to Complete for Unit- 2 (As per TSR dated 16th December 2020)

Table No. 27			
S. No.	Particulars	Amount (In Rs. Cr.)	Remarks
	Supply Cost		
1	TDBFP	12.00	1 set of TDBFP
2	CW Pump-Common Standby	1.80	1 Set of CW Pump
3	Workshop tools 7 tackles	3.00	1 Set
4	Boiler elevator	0.60	1 No.

Table No. 27			
S. No.	Particulars	Amount (In Rs. Cr.)	Remarks
5	One single phase GT	6.50	1 No.
6	Bull Dozer, Fork lift	1.20	1 set
	Total Supply Cost-A	25.10	
	Erection, Testing, Commissioning of Balance Items- B	3.48	20 % of the supply cost
	Liquidation of punch point items - Service Cost-C	5.00	Ball Park estimate
7	Total (A + B + C)	33.58	
8	Contingency (5 %)	1.68	
	Total (7+8)	35.23	

Some of the photographs shared (As per old valuation report dated 12-10-2022 prepared by us) by the company's management are attached below:

Miscellaneous Photographs taken during site survey:-

Handwritten signature and initials.

H. SALES TRANSACTIONAL PROSPECTS OF SUCH PLANTS: Infrastructure assets like power plants are of great value for the nation and region and these have much greater socio-economic value, in addition to its core Asset value.

In case of sale transactions, such assets can be divested as a single entity only through strategic sales by way of acquisition or takeovers by the large conglomerates who are either already into the same business line or any other large corporates who may have business interest to diversify for entering into such sectors if they are already not into it.

This plant is based on the sub-critical technology. M/s. SEPCO (China) was the EPC Contractor for KMPCL. Also, 3 units of the Plant have been commissioned and having PPA and FSA in place. Also, the other 3 units are various stages of construction but stalled but Plant has scope of expansion by way of revival of these 3 stalled units as per the power requirement and demand in the country which is constantly increasing. Therefore, it can be a good option for major domestic & foreign big shots in energy sector keep on evaluating options to take up stakes in valuable assets.

I. VALUATION METHODOLOGY ADOPTED: For arriving at the fair market value of P&M asset, our engineering team has rationally applied **the 'cost approach (depreciated replacement cost)'**. Reliable market sales comparison references are not available hence market approach is not adopted. For reliable cost references, CERC benchmark is also referred before reaching out to the Fair Market Value of the Asset.

J. VALUATION PROCEDURE: For arriving at fair market value of P&M asset our engineering team has rationally applied **the 'cost approach (depreciated replacement cost)'**. Following points are taken into consideration during the assessment of Plant & Machinery:

1. As per copy of provisional BS dated 31-12-2022, the total Gross Block & Net Block of buildings is Rs. 13,901.10 Cr. & 9,872.65 Cr. respectively. However, breakup/FAR of the same is not shared with us. Due to absence of FAR dated 31-12-2022, we have considered FAR dated 31-03-2022 for the purpose of valuation.
2. As per FA Schedule dated 31-03-2022 shared over the mail, the figures matches with the FAR dated 31-03-2022. Thus, the same is considered for valuation purpose.
3. Main reference point for the assessment of the Valuation of P&M of 3 commissioned units is Fixed Asset register dated 31st March 2022 provided to us by the company which is relied upon in good faith.

4. Core P&M Asset Valuation is done keeping in mind various factors like technology used, machines availability, its condition, average age, maintenance & service and parts replacement availability of the machines and more importantly demand in the market.
5. Machinery items in this plant are specific purpose machines used for the thermal power plant which limits the realizable value to the particular purpose only.
6. To arrive at the fair market value, firstly gross current replacement cost (GCRC) of the machines have to be assessed as on date.
7. As per analysis and working done by the team of RKA, the Gross Current Replacement Cost of all the plant & machinery for Unit-2, Unit-3, Unit-4 & ancillary machines is Rs. 16,777.62 Cr. which translate to Rs. 9.32 Cr. per MW cost of capitalization for 1800 MW Thermal Power Plant.
8. Presently only super critical & ultra-super critical power plants are setup due to their higher efficiency than the sub-critical power plants. Presently thermal power plants with sub-critical technology is not setup anymore. Project cost for setting up Ultra Super Critical or Super Critical Thermal Power Plants is ranging between Rs.7.8 cr. per MW to Rs.9.5 Cr. per MW. The benchmark cost for establishing sub critical power plants established upto the year 2018 was approx. Rs.6.50 Cr. to Rs.6.90 Cr. per MW. Also since many ancillary/ common facilities required by the Plant is already covered in the Project since 3 other units are already operational. Therefore based on these factors and considering technological obsolescence we have considered Rs.6.7 Cr. per MW as replacement cost of the Project. Since no new plant is setup under sub critical technology, therefore CII indexation is not followed in this case and the historical benchmark cost is considered for estimating replacement cost of the Plant. However Rs.6.70 Cr. per MW is for the complete Project cost which includes Land & Buildings also. Land & Buildings in Balance of Plant in the project is already completed therefore while considering the benchmark cost of P&M this portion has to be deducted. As per our analysis of different projects, around ~15% cost comes in Land & Buildings of the Plant. Thus, we have reduced 15% from Rs. 6.70 cr. per MW, which comes around Rs. 5.70 crore per MW which is used to estimate the replacement cost of P&M units as on date.
9. Water infrastructure for the subject plant is setup & owned by a SPV of KSK Group named as M/s KSK Water Infrastructure Private Limited (KWIPL) which is not the part of M/s. KSK Mahanadi Power Company Limited (KMPCL). As per the earlier valuation conducted in the year 2018, the capitalized cost of KWIPL was Rs. 647.21 Cr. which is about Rs. 0.20 Cr. per MW. This cost is also deducted from the benchmark cost. Accordingly Rs.5.50 per MW is arrived which is considered to calculate the replacement cost of the P&M which majorly

involves BTG or main Plant cost. Calculation to arrive replacement cost per MW after the above deductions considered for the subject plant is tabulated below:-

Table No. 28			
S. No.	Particulars	Values	Unit
A	KMPCL arrived Replacement Cost by RKA as per FAR	Rs. 9.32 Cr.	Per MW
B	Benchmark cost considered to setup sub critical thermal power plant (Including Land & Building) till the period it is implemented	Rs. 6.70 Cr.	Per MW
C	Average cost of Land & Building	15% of Rs. 6.70 Cr.	
D	Benchmark cost considered to setup sub critical thermal power plant (excluding Land & Building) till the period it is implemented (B-C)	Rs. 5.70 Cr.	Per MW
E	Cost of Water infrastructure as per KWIPL FAR dated 31-03-2018 (Gross Block Rs. 647.21 Cr.)	Rs. 0.20 Cr.	Per MW
F	Balance Benchmark cost or Replacement cost considered for the Subject Plant (D-E)	Rs. 5.50 Cr.	Per MW

10. Accordingly Rs.5.50 Cr. per MW is adopted for Plant & Machinery as a whole to arrive at reasonable GCRC of the project i.e. New GCRC.
11. There was no breakup of ex works, CST, loading and unloading fees, insurance fees, installation and commissioning fees, and pre-operative costs.
12. For evaluating depreciation, Central Electricity Commission Guidelines & Chart of Companies Act-2013 for ascertaining useful life of different types of machines are followed. Useful life of Primary machines of the Plant like Boiler, Turbine, Generator, Coal Handling System etc. is taken as 25 years. For other auxiliary machinery & equipment average life varies from 5-20 years.
13. As analysis conducted during the site visit, the overall condition of all the machine is fair and maintained property with regular maintenance and plant was running normally.
14. Market & Industry scenario is also explored for demand of such Power Plants in the nearby area.
15. This valuation would be more reasonable if anyone would buy this plant in as is installed condition. Also, Valuation may differ in case these assets are sold in dismantled/Uninstalled condition. The present valuation is not on the piecemeal basis but on the ongoing concern basis.
16. All the gathered information & data is further collated & analyzed and obsolescence/deterioration factor is applied to arrive at the Fair Market Value of the machines.
17. Different similar assets in the FAR is categorized and grouped together to compute the depreciation as per its economic life and salvage value to arrive at the fair market value of the asset based on the cost approach.

PART I

**VALUATION OF CAPITAL WORK-IN PROGRESS (CWIP)
 FOR UNDER-CONSTRUCTION UNITS
 (UNIT #1, UNIT#5 & UNIT #6)**

1. OVERALL PROGRESS OF THE PROJECT:

Unit 1, 5 and 6 are under CWIP. Presently all the construction activities are halted since April 2018 i.e. from past 4 years. The complete project (3,600 MW) as on date is delayed by more than 8 years from the original scheduled date. As per the Technical Study report by L&T – Sargent & Lundy Ltd. dated 16-12-2020, and information gathered during the site visit:

Phase I of the project which consists of Unit 3 & 4 were commissioned on 14th August 2013 and 26th August 2014 respectively. Accordingly, 100 % progress is achieved in this phase.

Phase II, which consists of Unit 2 & 5. COD has been achieved only for Unit 2 on 28th February 2018 and Unit 5 is under construction with no current progress.

Phase III, which comprises Unit 1 and 6 are both under construction.

Percentage progress of the Plant – BTG for Unit 1, 5 and 6 is tabulated below:

		Table No. 30			
Particulars	Estimated % Completion of BTG				Remarks for estimated % Completion
	Weightage	Unit#1	Unit#5	Unit#6	
Engineering	12%	90%	90%	90%	Balance infrastructure, Township, non-plant buildings, As-built drawings, O&M manuals, Balance vendor engineering, etc.
Supply	55%	0%	45%	0%	Based on site assessment and judgment
Erection	27%	0%	25%	0%	
Commissioning	6%	0%	0%	0%	No pre-commissioning activities were performed due to non-availability of back charging power
Unit wise Progress		10.8%	42.3%	10.8%	(Weightage x Unit progress)
Overall Progress		21.3%			(Average)
		Source: Technical Study report by L&T dated 16-12-2020and site survey.			

BOP and other infrastructures required for these units are 85% completed. Major balance activities are CT – Completion of balance civil works, mechanical erection and commissioning, CW pump erection and commissioning, CW pipe laying and backfilling, Fly ash collection and disposal systems, CHP conveyer system (CD lines from TT6 to respective units), piping, Electrical and C&I systems such as cabling, HT-LT panels, MCCs, DCS

systems, TSI etc. with BTG packages of under construction units and to that of balance equipment erection of unit#2 (under operation).

Details of unit wise and cost wise break-up of CWIP as on March 2022

Table No. 31					
S. No.	Particulars	Unit-1	Unit-5	Unit-6	Total
1	EPC & Non-EPC cost	311.05	1,467.82	208.04	1,986.91

		No Supply for Unit#6	erected. Unit#6- no work done			
2.	Civil of TG, Boiler, ESP and TRF yard area		Unit # 1 Partial work done Unit# 6 almost No work done		-	10
3	Roads & drain, area paving, plinth protection, finishing, painting				-	-
#1,5 & 6 BOP Packages:						
1.	CW Pump and Piping (total 14 CW pumps for all the 6 Units (6W+2S))	7 nos. not received	-	-	-	-
2.	CW Piping	All received	For Unit#1,5 and 6, laying & connection with CW pumps and Condensers balance	Exposed portion of wrapping & coating of laid CW pipes (near CW pump house) is damaged. Need replacement. Also CW piping near condenser is submerged in water and needs to evaluate for reusability.	100	70
3	Cooling Tower	For Unit#1 and 6 not received	Civil structure of Unit#1 & 6 in advanced stage, Unit#5 nearly completed		60	50
4	Interconnection with pipes/cable between BTG packages, TRF packages, WTP, Fuel oil, CAS, FF, HT/LT panels, DCS,	-	Not done	-	-	-

Table No. 32						
Unit No.	Package Description	Status of Supply	Status of Erection	Remarks	% Progress supply	% Progress Construction
	Switchyard, HP, AHP etc.					
#1,5 & 6	CHP and AHP:					
1	CHP	Majority of materials received	CD line from TT0 to TT6 and TT7, Bunker floor balance, Erection of Stacker Reclaimer rails (approx. 120 meters), conveyor belts. Work for Unit 1, 5 and 6 balance		95	85
2	AHP	Majority of materials received	Work for Unit 1, 5 and 6 balance	Paving around ash silo balance (100M radius), 2 nos. Silos	75	70
Common	Balance Non-Plant Structures:					
	Administrative Building, Canteen, Service building, Security building, Main gate, Petrol pump, Car & scooter sheds, training center, Rain water harvesting etc.	Not yet constructed.				

Present Status of Non-EPC Scope

Table No. 33		
Sr. No.	Description	Status
1.	Transmission Line:	
a	Two double circuit 400 KV Transmission line (each line capacity 1200MW) from plant switchyard to TAGA pooling station of PGCL. The approx. length of TL is 27 KM from plant switchyard to TAGA pooling station.	Line1 double circuit tower is ready and the power generated by Unit 2, 3 and 4 is being evacuated through this line. Line2 double circuit tower under construction. Balance work: Total 83 towers per line. Foundation of 65 towers ready. 54 tower erection completed. 11 KM stringing completed

Table No. 33		
Sr. No.	Description	Status
2.	Non-Plant structures:	
b	Residential Colony	Not envisaged in KMPCL project. Refer KMPCL /PWC mail dated 20.10.2020
c	Outer boundary wall – 26KM length, Brick construction with barbed wire fixed on Y angle	Complete boundary wall was constructed as per scope. However, many places, the boundary walls are damaged including peripheral morum roads. KMPCL has taken up repair/re-doing the broken /damaged boundary wall from O&M budget
d	Roads and drain for areas outside the inner boundary wall	Incomplete
e	Entry gate	Temporary structure made
f	Watch towers	Not made
g	Training center	Not made
h	CCTV	Completed
i	Silos for evacuation of fly ash through Railways – 2 nos. (earlier it was a part of EPC contract scope)	Roof of one silo balance. Column erected for other Silo is balance
j	Horticulture (green belt) and rain water harvesting	Rain water harvesting pond/ well not made. Green belt balance for areas around incomplete structure/building

2. COST INCURRED IN THE PROJECT:

Table No. 34			
Particulars	Cost Capitalized (in ₹ Cr.)		
	Commissioned Unit 2, 3 and 4	Under Construction Unit 1, 5 and 6	Total
Land (Freehold and Leasehold)	324*		324
EPC Cost	9,445	2,139	11,584
Non EPC Cost	924	35	959
IDC, ERV and Preoperative Cost	5,676	2,399	8,075
Total	16,045	4,573	20,942

Source: Technical Study Report by L&T dated 16-12-2020

***Note:** As per FA Schedule dated 31st Marchs 2022, the total gross block of land component is Rs. 172.58 Cr.

3. COST TO COMPLETE:

Table No. 35		
Sr. No.	Particular	Amount (in ₹ Cr.)
A	P&M	
1	Unit-2	35.26
2	Unit-5	1,862.50
3	Unit-1&6	4,616.00
Total - A		6,513.76
B	Building and Civil Works	

Table No. 35		
Sr. No.	Particular	Amount (in ₹ Cr.)
1	Unit-5	95.19
2	Unit-1&6	200.373
Total – B		295.56
C	Additional Cost towards meeting the Environment Norms	
1	FGD	1,872.00
2	ESP Modification	12.00
Total - C		1,884.00
Grand Total (A+B+C)		8,693.32
Source: Technical Study Report by L&T dated 16-12-2020		

4. VALUATION OF CWIP (UNIT 1, 5 AND 6):

- As per the copy of provisional balance sheet dated 31st March 2022 shared by the subject company, the total book value of CWIP is ₹ 4,559.66 Cr. out of which Rs. 1,986.91 Cr. is the EPC & Non EPC (hard cost) incurred on site. Further no latest bifurcation has been provided, therefore we have relied on the data shared with us during the last valuation exercise dated 5th June 2018 and Technical Study Report by L&T– Sargent & Lundy Ltd. dated 16th December, 2020. Since, no new construction has been done from April 2018, therefore, the same has been considered fair for the purpose of this valuation assessment.
- Overall completion of the Unit 1, 5 and 6 is **21.30%** as per the Technical Study Report prepared by L&T – Sargent & Lundy Ltd. dated 16th December, 2020 as shown in table no. 30 above.
- The estimated time of completion of these units has been tabulated below:

Table No. 36				
Sr. No.	Milestones	Timeline (Months)		
		Unit – 1	Unit#5	Unit#6
A	Pre NTP Activities	-4	-4	-4
1	Release of LOI / WO to OEM / Contractors	-1	-1	-1
2	Statutory Approval	-1	-1	-1
3	Site Mobilization	0	0	0
4	Reconciliation of Material	0	0	0
B	NTP (Notice to Proceed)	0	0	0
5	Engineering work	6	6	6
6	Start of erection of Boiler, Turbine & it's Auxiliaries	13	1	16
7	Supply of balance items at site	17	12	19
8	Boiler Hydro test	25	13	28

10	TG & Auxiliaries readiness	22	15	27
11	Oil Flushing	24	17	29
13	TG ready for Barring Gear	25	17.5	30
14	Boiler Light up	28	19	31
15	Steam Blowing and restoration	29	21	32
16	Synchronization	31	23	33
17	COD	32	24	34
18	PG Test	32	24.5	35

- As per the estimated completion of balance work, COD of the Unit 1, 5 and 6 is envisaged to be achieved in 24th, 32nd and 34th month respectively after NTP (deviations \pm 3 months).
- Since the actual percentage of work is the real fact on site which has been assessed in Dec., 2020 by professionally expert agency L&T – Sargent & Lundy Ltd. Since the Project is stalled from last 8 years with no certainty whether these 3 CWIP units will be revived or not. In case any prudent buyer wants to take over this Plant in which there are 3 operational units and 3 CWIP units, for the purpose of estimating the value of 3 CWIP units the prudent buyer will want to pay the differential value of what may be the cost of setting up new plant and what may be the cost to incur to complete these 3 units. Further from this differential value it would like to discount for uncertainty and risk factor that in case he will not be able to revive these units.

Accordingly based on this basic approach the **Fair Market Value** of CWIP has been calculated below considering the below factors:

- Original Project cost**

For complete project planned in year 2009, the proposed project cost was Rs. 15,995.00 Cr. (Including IDC cost, pre-operative etc. but excluding working capital margin & Margin for BG) which translated into Rs. 4.44 per MW for 3600 MW Plant. However, due to delay in construction, there were multiple cost overrun in the project. Thus, the Project cost was revised to Rs. 25,834.00 Cr. (Including IDC cost, pre-operative etc. excluding working capital margin & Margin for BG) as per last available information which translated into Rs. 7.17 per MW. Unit wise Project cost was not available but if we breakup the total cost unit wise then it comes out to be Rs. 2,665.83 crores per unit as per original cost and Rs. 4,305.67 crores per unit as per revised cost.

- Present status of construction**

Adhis
ss-A

As shown in table no. 30 above, Unit-1 has achieved 10.8% of work, Unit-5 has achieved 42.30% of work and Unit-6 has achieved 10.80% of work.

- **Cost incurred on site as on date**

As per the copy of provisional balance sheet dated 31st March 2022 shared by the subject company, the total book value of CWIP is ₹ 4,559.66 Cr. out of which Rs. 1,986.91 Cr. is the EPC & Non EPC (hard cost) incurred on site as shown in table no. 31 above.

- **CWIP Replacement Cost**

Presently only super critical & ultra-super critical power plants are setup due to their higher efficiency than the sub-critical power plants. Presently thermal power plants with sub-critical technology is not setup anymore. Project cost for setting up Ultra Super Critical or Super Critical Thermal Power Plants is ranging between Rs.7.8 cr. per MW to Rs.9.5 Cr. per MW. The benchmark cost for establishing sub critical power plants established upto the year 2018 was approx. Rs.6.50 Cr. to Rs.6.90 Cr. per MW. Also since many ancillary/ common facilities required by the Plant is already covered in the Project since 3 other units are already operational. Therefore based on these factors and considering technological obsolescence we have considered Rs.6.7 Cr. per MW as replacement cost of the Project. Since no new plant is setup under sub critical technology, therefore CII indexation is not followed in this case and the historical benchmark cost is considered for estimating replacement cost of the Plant. However Rs.6.70 Cr. per MW is for the complete Project cost which includes Land & Buildings also. Land & Buildings in Balance of Plant in the project is already completed therefore while considering the benchmark cost of CWIP this portion has to be deducted. As per our analysis of different projects, around ~15% cost comes in Land & Buildings of the Plant. Thus, we have reduced 15% from Rs. 6.70 cr. per MW, which comes around Rs. 5.70 crore per MW which is used to estimate the replacement cost of CWIP units as on date.

Water infrastructure for the subject plant is setup & owned by a SPV of KSK Group named as M/s KSK Water Infrastructure Private Limited (KWIPL) which is not the part of M/s. KSK Mahanadi Power Company Limited (KMPCL). As per the earlier valuation conducted in the year 2018, the capitalized cost of KWIPL was Rs. 647.21 Cr. which is about Rs. 0.20 Cr. per MW. This cost is also deducted from the benchmark cost. Accordingly Rs.5.50 per MW is arrived which is considered to calculate the replacement

cost of the CWIP which majorly involves BTG or main Plant cost. Calculation to arrive replacement cost per MW after the above deductions considered for the subject plant is tabulated below:-

Table No. 37				
S. No.	Particulars		Values	Unit
A	Benchmark cost considered to setup sub critical thermal power plant (Including Land & Building) till the period it is implemented	A	Rs. 6.70 Cr.	Per MW
B	Average cost of Land & Building	B	15% of Rs. 6.70 Cr.	----
C	Benchmark cost considered to setup sub critical thermal power plant (excluding Land & Building) till the period it is implemented	C = A-B	Rs. 5.70 Cr.	Per MW
D	Cost of Water infrastructure as per KWIPL FAR dated 31-03-2018 (Gross Block Rs. 647.21 Cr.)	D	Rs. 0.20 Cr.	Per MW
E	Balance Benchmark cost or Replacement cost considered for the Subject Plant CWIP	E = D - C	Rs. 5.50 Cr.	Per MW

- **Material Deterioration**

As the construction work of these units were stalled since April-2018 and no repair and maintenance work have been conducted on these units since then. Some of the parts of CWIP i.e. CW piping, condenser, HP/IP/LP heaters, ESP etc. are exposed to open environment and thus corrosion & quality deterioration was easily visible during visit. Thus, to factor in material deterioration, 25% deterioration factor is considered on installed CWIP.

- **Uncertainty cum Utility and Risk Factor**

As per the present situation:

- Work of all these 3 units is not completed yet and is stalled from past 4 years.
- No fuel supply agreement has been achieved for these units.
- PPA has not been achieved yet for these unit. The PPA executed with GUVNL of 1010 MW is under subjudice before Hon'ble GERC.
- Project has slipped into the category of Projects which are **Uncertain for Benefits during 2017-22** as per the National Electricity Plan Report on Jan., 2018 issued by Central Electricity Authority.
- Based on the above, there is uncertainty whether project will be revived or not and will totally depend on the demand of the power and resourcefulness & willingness of the prospective buyer to revive the Project.

- vi. Therefore in our opinion 50:50 chances or may be below it exist for the revival of the project.
- vii. Based on the above factors, there is an uncertainty for the completion of these units and the utility for any buyer has become very less. Therefore based on the percentage of work completion in each unit, we have considered appropriate uncertainty and risk factor which is 50% or less for the revival of the units for reaching out to the Fair Market Value.

Therefore, the valuation is as follows:

Table No. 38					
S. No.	Particulars	Unit#1	Unit#5	Unit#6	Total
A	Replacement Cost (In Rs. Cr.) @Rs.5.50 per MW (excluding Land & Building and Water infrastructure cost)	3,300.00	3,300.00	3,300.00	9,900.00
B	Work completion (In %)	10.80%	42.30%	10.80%	
C	Work completion (In Rs. Cr.) (A x B)	356.40	1,395.90	356.40	2,108.70
D	25% Material Deterioration (In Rs. Cr.) (25% x C)	89.10	348.98	89.10	527.18
E	Depreciated Replacement Cost (In Rs. Cr.) (C - D)	267.30	1,046.93	267.30	1,581.53
F	Uncertainty cum Utility and Risk Factor	0.40	0.50	0.40	
G	Fair Value (In Rs. Cr.) (E x F)	106.92	523.46	106.92	737.30
H	Liquidation Value (Rs. Cr.)	17.82	69.80	17.82	105.44

- **Liquidation value:** For the calculation of Liquidation Value of CWIP, we have considered only Scrap Value i.e. 5% of Replacement Cost on piecemeal basis since in case the Plants slips into liquidation we do not foresee revival of these 3 balance units.

PART J

VALUATION ASSESSMENT SUMMARY

Table No. 39

S. No.	Particulars	Book Value	Indicative & Estimated Prospective Fair Market Value
1.	Land Value (A)	₹ 172.58 Cr.	₹ 377.31 Cr.
2.	Building Value (B)	₹ 1,508.61 Cr.	₹ 1,445.64 Cr.
3.	Plant & Machinery Value (C)	₹ 10,283.97 Cr.	₹ 7,116.60 Cr.
4.	CWIP (D)	₹ 4,559.66 Cr.	₹ 737.30 Cr.
5.	Total (A+B+C+D)	₹ 16,524.82 Cr.	₹ 9,676.85 Cr.
6.	Additional Premium if any	---	---
	Details/ Justification	---	---
7.	Deductions charged if any		3.60%
	Details/ Justification	The Enterprise Value of the company is Rs. 9,328.88 Cr. which is about 3.60% lower than the Asset Value. Thus, considering the Economic Obsolescence (EO) on the assets (Excluding CWIP), we have discounted the asset value by 3.60% to arrive Fair Market Value of assets of Unit-2, Unit-3 & Unit-4.	
8.	Total Indicative & Estimated Prospective Fair Market Value	---	₹ 9,355.39 Cr.
9.	Rounded Off	NA	₹ 9,355.00 Cr.
10.	Indicative & Estimated Prospective Fair Market Value in words	NA	Rupees Nine-Thousand Three-Hundred and Fifty-Five Crores Only
11.	Expected Realizable Value (@ ~20% less) (Refer:16-d Below)	---	₹ 7,484.31 Cr.
12.	Expected Distress Sale Value (@ ~35% less) (Refer:16-d Below)	---	₹ 6,081.01 Cr.
13.	Expected Liquidation Sale Value (Refer:16-e Below)		₹ 4,226.14 Cr.
14.	Concluding Comments/ Disclosures if any		
	a. This valuation is based on the cost approach and basically shows the current depreciated replacement value of the asset. However, market players may weigh it differently keeping in mind the various macro & micro economic factors and demand & supply of power at the time of actual transaction.		

- b. There is an Economic Obsolescence in the subject plant due to dependencies on SPVs and CWIP. The CWIP is stalled since 2018 and no repair & maintenance work has been conducted.
- c. Total Fair depreciated replacement value of the asset is arrived at **Rs. 9,676.85 Cr.** However Fair Market Value is given at **Rs. 9,355.00 Cr.** deducting the economic obsolescence based on its Enterprise Valuation.
- d. We have weighted the above arrived Fair Market Value with the average market return for the investment purpose based on baseline purpose which might be recoverable by year 2031-32.
- e. Realizable Value (RV) & Distress Value (DV) has been considered 80% & 65% respectively of Fair Market value. Although power demand is likely to be robust in next 5 years due to growing economy, but there are constant glitches in power sector such as domestic coal extraction, payment dues from power DISCOMS and this Plant dependency upon SPVs. Therefore, due to these issues in power sector and the Plant dependency, higher on RV & DV is considered.
- f. For the calculation of Liquidation Value (LV) of 3 operational units, we have conducted market research regarding the recent transaction in Power Sector. The average per MW cost in these transactions is about Rs. 2.29 Cr. and the range is from Rs. 0.39 Cr. per MW to Rs. 5.85 Cr. per MW. The plants which are transacted in IBC is sold from Rs. 0.39 Cr. per MW to Rs. 3.54 Cr. per MW. Plants which are sold as strategic sale in open market are transacted in Rs. 2.58 Cr. per MW to Rs. 5.85 Cr. per MW.
- g. Thus, on the basis of the above analysis and the merits and demerits of our plants we have assessed the Liquidation Value of operational 3 units on ongoing concern basis as Rs. 4120.70 Cr. taking 55.95% discount on fair value.
- h. For the calculation of Liquidation Value of CWIP, we have considered only Scrap Value i.e. 5% of Replacement Cost on piecemeal basis since in case the Plants slips into liquidation we do not foresee revival of these 3 balance units. Thus, the arrived Liquidation Value of CWIP of balance 3 units is Rs. 105.44 Cr.
- i. Further, the present market & economic scenario is uncertain and no one can predict it for a longer period of time due to various geo political and fast changing global and local markets. However, from the past ~6 months overall sentiments for Power sector in India are bullish due to increase in power demand.
- j. In spite of global recession and high inflation across major economies, still world over economist are bullish on India's growth.
- k. Therefore based on the above points it appears that market sentiments towards this Plant should be positive because of high power demand.
- l. There may be instances in previous years where the sale of Power Plants has not yielded good value in comparison to its replacement value due to subdued demand of power which was mainly because of tepid economic growth and COVID period.
- m. However, at present, both the market and economic situation are positive. The subject power plant have 3 fully operational units and operating on an average PLF of 75% as per the verbal information provided to our engineers during site survey. Rest of the 3 units are approx. 21% completed and at various stages. Further, the construction is stalled from past 4 years but there is a good scope of expansion since ample land parcel is available with the company within the subject premise.

- n. As per the market research, there are a few prominent market players which might be interested in the subject power plant.
- o. Therefore for this reason we have not tried to match the previous market comparable to this Plant value and kept it only as computed from cost approach.
- p. This is just core Asset Valuation and not an Enterprise Valuation. This report doesn't cover any prospective sale value of the Power Plant as a whole which is based on the cash flows of the business.
- q. Fragmented/ Individual component wise may fetch different values, however this Valuation is prepared based on the ongoing concern and the Values has been applied in totality/ group of assets.
- r. This valuation exercise has been performed to reach the prospective fair market value using the replacement cost for setting up such Greenfield integrated plants in current scenario. This should not be treated as the transactional value of these assets.
- s. Secondary/ Tertiary costs related to asset transaction like Stamp Duty, Registration charges, Brokerage, Bank interest etc. pertaining to the sale/ purchase of this property are not considered while assessing the Market Value.
- t. We are independent of client/ company and do not have any direct/ indirect interest in the property.
- u. This valuation has been conducted by R.K Associates Valuers & Techno Engineering Consultants (P) Ltd. and its team of experts.
- v. This Valuation is done for the property found on as-is-where basis as shown on the site by the Bank/ customer of which photographs is also attached with the report.
- w. Reference of the property is also taken from the copies of the documents/ information which interested organization or customer could provide to us out of the standard checklist of documents sought from them and further based on our assumptions and limiting conditions. All such information provided to us has been relied upon in good faith and we have assumed that it is true and correct. However we do not vouch the absolute correctness of the property identification, exact address, physical conditions, etc. based on the documents provided to us since property shown to us may differ on site Vs as mentioned in the documents or incorrect/ fabricated documents may have been provided to us.
- x. Legal aspects for eg. investigation of title, ownership rights, lien, charge, mortgage, lease, verification of documents from originals or from any Govt. department, etc. has to be taken care by legal experts/ Advocates and same has not been done at our end.
- y. The valuation of an asset is an estimate of the worth of that asset which is arrived at by the Valuer in his expert opinion after factoring in multiple parameters and externalities. This may not be the actual price of that asset and the market may discover a different price for that asset.
- z. This report only contains opinion based on technical & market information which came to our knowledge during the course of the assignment. It doesn't contain any recommendations.
- aa. This report is prepared following our Standard Operating Procedures & Best Practices and will be subject to Limitations, Conditions, Valuer's Remarks, Important Notes, Valuation TOS and basis of computation & working as described above.
- bb. The use of this report will become valid only after payment of full fees as per the Payment Terms. Using this report or any part content created in this report without payment of charges will be seen as misuse and unauthorized use of the report.

cc. **IMPORTANT KEY DEFINITIONS**

Fair Value suggested by the competent Valuer is that prospective estimated amount in his expert & prudent opinion of the subject asset/ property without any prejudice after he has carefully & exhaustively evaluated the facts & information came in front of him or which he could reasonably collect during the course of the assessment related to the subject asset on an as-is, where-is basis in its existing conditions, with all its existing advantages & disadvantages and its potential possibilities which is just & equitable at which the subject asset/ property should be exchanged between a willing buyer and willing seller at an arm's length transaction in an open & unrestricted market, in an orderly transaction after proper marketing, wherein the parties, each acted knowledgeably, prudently without any compulsion on the date of the Valuation.

Fair Value without using the term "Market" in it describes that the value suggested by the Valuer may not mandatorily follow or may not be in complete consonance to the established Market in his expert opinion. It may or may not follow market dynamics. But if the suggested value by the valuer is not within the prevailing Market range or is assessed for an asset is located in an un-established Market then the valuer will give reasonable justification & reasoning that for what reasons the value suggested by him doesn't follow the prevailing market dynamics.

Fair Market Value suggested by the competent Valuer is that prospective estimated amount in his expert & prudent opinion of the subject asset/ property without any prejudice in consonance to the Market dynamics after he has carefully & exhaustively evaluated the facts & information came in front of him or which he could reasonably collect during the course of assessment related to the subject asset on an as-is, where-is basis in its existing conditions, with all its existing advantages & disadvantages and its potential possibilities which is just & equitable at which the subject asset/ property should be exchanged between a willing buyer and willing seller at an arm's length transaction in an open & unrestricted market, in an orderly transaction after proper marketing, wherein the parties, each acted knowledgeably, prudently without any compulsion on the date of the Valuation.

Here the words "in consonance to the established Market" means that the Valuer will give opinion within the realms & dynamics of the prevailing market rates after exhaustively doing the micro market research. However due to the element of "Fair" in it, valuer will always look for the factors if the value should be better than the market realms which is just & equitable backed by strong justification and reasoning.

Market Value suggested by the competent Valuer is that prospective estimated amount which is average price of the similar comparable assets prevailing in an open & established market during the near period of the date of valuation at which the subject asset/ property should be exchanged between a willing buyer and willing seller on an as-is, where-is basis in its existing conditions, with all its existing advantages & disadvantages and its potential possibilities at an arm's length transaction in an open, established & unrestricted market, in an orderly transaction, wherein the parties, each acted without any compulsion on the date of the Valuation.

Using the term "Market Value" without "Fair" omits the elements of proper marketing, acting knowledgeably & prudently.

Market and market participants can be sentimental, inclined towards the transaction without the element of complete knowledge & prudence about facts or due diligence of the asset therefore "each acted knowledgeably, prudently" has been removed from the market Value definition.

Realizable Value is that minimum prospective estimated value of the asset/ property which it may be able to fetch at the time of actual property transaction factoring in the element of discount due to the prospects of deep negotiations between the buyer & seller when the parties in-principally find Fair Market Value reasonable and sits together to close the deal and the transaction across the table. Discount percentage on the Fair Market Value due to negotiation will depend on the nature, size, various salability prospects of the subject asset, the needs of the buyer & the seller and kind of payment terms. In some of the cases Realizable and Fair Market Value may also be equal.

Distress Sale Value* is that value when the property is attached with any process such as mortgaged financing, financial or operational dues which is under any stress condition or situation and the stakeholders are under process of finding resolution towards it to save the property from being attached to a formal recovery process. In this type of sale, minimum fetch value assessed will always be less than the estimated Fair Market Value where the discount of percentage will depend upon various circumstances and factors such as nature, size, salability prospects of the property and kind of encumbrance on the property. In this type of sale, negotiation power of the buyer is always more than the seller and eagerness & pressure of selling the property will be more on the seller than the buyer.

Liquidation Value is the amount that would be realized when an asset or group of assets are sold due to any compulsion or constraints such as in a recovery process guided by statute, law or legal process, clearance sale or any such condition or situation thereof where the pressure of selling the asset/ property is very high to realize whatever maximum amount can be from the sale of the assets in a limited time for clearance of dues or due to closure of business. In other words, this kind of value is also called as forced sale value.

Difference between Cost, Price & Value: Generally, these words are used and understood synonymously. However, in reality each of these has a completely different meaning, premise and also having different definitions in professional & legal terms. Therefore, it is our professional responsibility to describe the definitions of these words to avoid ambiguity & confusion in the minds of the user of this report.

The **Cost** of an asset represents the actual amount spend in the construction/ actual creation of the asset.

The **Price** is the amount paid for the procurement of the same asset.

The **Value** is defined as the present worth of future rights in the property/ asset and is a hypothetical or notional price that buyers and sellers are most likely to conclude for a good or service. Value is not a fact, but an estimate of the likely price to be paid for a good or service at a given time in accordance with a particular definition of value.

Therefore, in actual for the same asset/ property, cost, price & value remain different since these terms have different usage & meaning.

IMPORTANT NOTES

DEFECT LIABILITY PERIOD - In case of any query/ issue or escalation you may please contact Incident Manager by writing at valuers@rkassociates.org. We try our level best to ensure maximum accuracy in the Calculations done, Rates adopted and various other data points & information mentioned in the report but still can't rule out typing, human errors, assessment or any other mistakes. In case you find any mistake, variation, discrepancy or inaccuracy in any data point mentioned in the report, please help us by bringing all such points into our notice in writing at valuers@rkassociates.org within 30 days of the report delivery, to get these rectified timely, failing which R.K Associates shouldn't be held responsible for any inaccuracy in any manner. Also, if we do not hear back anything from you within 30 days, we will assume that the report is correct in all respect and no further claim of any sort will be entertained thereafter. We would welcome and appreciate your feedback & suggestions in order to improve our services.

Our **DATA RETENTION POLICY** is of **ONE YEAR**. After this period we remove all the concerned records related to the assignment from our repository. No clarification or query can be answered after this period due to unavailability of the data.

COPYRIGHT FORMAT - This report is prepared on the copyright format of R.K Associates to serve our clients in the best possible way. Legally no one can copy or distribute this format without prior approval from R.K Associates. It is meant only for the organization as mentioned on the cover page of this report. Distribution or use of this format or any content of this report wholly or partially other than R.K Associates will be seen as unlawful act and necessary legal action can be taken against the defaulters.

IF REPORT IS USED FOR BANK/ FIs

NOTE: As per IBA Guidelines in case the valuation report submitted by the valuer is not in order, the banks / FIs shall bring the same to the notice of the valuer within 15 days of submission for rectification and resubmission. In case no such communication is received, it shall be presumed that the valuation report has been accepted.

At our end we have not verified the authenticity of any documents provided to us. Bank is advised to verify the genuineness of the property documents before taking any credit decision.

Valuation Terms of Services & Valuer's Important Remarks are available at www.rkassociates.org for reference.

PART I

VALUER'S IMPORTANT REMARKS

1.	Valuation is done for the asset found on as-is-where basis which owner/ owner representative/ client/ bank has shown/ identified to us on the site unless otherwise mentioned in the report of which some reference has been taken from the information/ data given in the copy of documents provided to us and informed verbally or in writing out of the standard checklist of documents sought from the client & its customer which they could provide within the reasonable expected time out of the standard checklist of documents sought from them and further based on certain assumptions and limiting conditions. The information, facts, documents, data which has become primary basis of the report has been supplied by the client which has been relied upon in good faith and is not generated by the Valuer.
2.	The client/ owner and its management/ representatives warranted to us that the information they have supplied was complete, accurate and true and correct to the best of their knowledge. All such information provided to us either verbally, in writing or through documents has been relied upon in good faith and we have assumed that it is true & correct without any fabrication or misrepresentation. I/We shall not be held liable for any loss, damages, cost or expenses arising from fraudulent acts, misrepresentations, or willful default on part of the owner, company, its directors, employee, representative or agents.
3.	Legal aspects for eg. Investigation of title, ownership rights, lien, charge, mortgage, lease, sanctioned maps, verification of documents provided to us such as title documents, Map, etc. from any concerned Govt. office etc. have to be taken care by legal expert/ Advocate and same is not done at our end. It is assumed that the concerned Lender/ Financial Institution has asked for the valuation of that property after satisfying the authenticity of the documents given to us for which the legal verification has been already taken and cleared by the competent Advocate before requesting for the Valuation report. I/ We assume no responsibility for the legal matters including, but not limited to, legal or title concerns.
4.	In the course of the valuation, we were provided with both written and verbal information. We have however, evaluated the information provided to us through broad inquiry, analysis and review but have not carried out a due diligence or audit of the information provided for the purpose of this engagement. Our conclusions are based on the assumptions and other information provided to us by the client during the course of the assessment.
5.	Getting cizra map or coordination with revenue officers for site identification is a separate activity and is not part of the Valuation services and same has not been done in this report unless otherwise stated.
6.	Wherever any details are mentioned in the report in relation to any legal aspect of the property such as name of the owner, leases, etc. is only for illustration purpose and should not be construed as a professional opinion. Legal aspects are out of scope of this report. Details mentioned related to legal aspect are only based on the copy of the documents provided to us and whatever we can interpret as a non-legally trained person. This should be cross validated with a legal expert. We do not vouch any responsibility regarding the same
7.	We have made certain assumptions in relation to facts, conditions & situations affecting the subject of, or approach to this exercise that has not been verified as part of the engagement rather, treated as "a supposition taken to be true". If any of these assumptions prove to be incorrect then our estimate on value will need to be reviewed.
8.	This is just an opinion report based on technical & market information having general assessment & opinion on the indicative, estimated Market Value of the property for which Bank has asked to conduct the Valuation. It doesn't contain any other recommendations of any sort including but not limited to express of any opinion on the suitability or otherwise of entering into any transaction with the borrower.
9.	We have relied on the data from third party, external sources & information available on public domain to conclude the valuation. These sources are believed to be reliable and therefore, we assume no liability for the truth or accuracy of any data, opinions or estimates furnished by others that have been used in this analysis. Where we have relied on the data, opinions or estimates from external sources, reasonable care has been taken to ensure that such data is extracted from authentic sources, however we still can't vouch its authenticity, correctness, or accuracy.
10.	Analysis and conclusions adopted in the report are limited to the reported assumptions, conditions and information came to our knowledge during the course of the work and based on the Standard Operating Procedures, Best Practices, Caveats, Limitations, Conditions, Remarks, Important Notes, Valuation TOR and definition of different nature of values.
11.	Value varies with the Purpose/ Date/ Asset Condition & situation/ Market condition, demand & supply, asset utility prevailing on a particular date/ Mode of sale. The indicative & estimated prospective Value of the asset given in this report is restricted only for the purpose and other points mentioned above prevailing on a particular date as mentioned in the report. If any of these points are different from the one mentioned aforesaid in the Report then this report should not be referred.
12.	Our report is meant ONLY for the purpose mentioned in the report and should not be used for any other purpose. The Report should not be copied or reproduced for any purpose other than the purpose for which it is prepared for. I/we do not take any responsibility for the unauthorized use of this report.
13.	We owe responsibility only to the authority/client that has appointed us as per the scope of work mentioned in the report. We will not be liable for any losses, claims, damages or liabilities arising out of the actions taken, omissions or advice given by any other person. In no event shall we be liable for any loss, damages, cost or expenses arising in any way from fraudulent acts, misrepresentations or willful default on part of the client or companies, their directors, employees or agents.
14.	This report is having limited scope as per its fields & format to provide only the general basic idea of the value of the property prevailing in the market based on the site inspection and documents/ data/ information provided by the client. The suggested indicative prospective estimated value should be considered only if transaction is happened as free market transaction.
15.	The sale of the subject property is assumed to be on an all cash basis. Financial arrangements would affect the price at which the property may sell for if placed on the market.
16.	The actual realizable value that is likely to be fetched upon sale of the asset under consideration shall entirely depend on the demand and supply of the same in the market at the time of sale.

17.	While our work has involved an analysis & computation of valuation, it does not include detailed estimation, design/ technical/ engineering/ financial/ structural/ environmental/ architectural/ compliance survey/ safety audit & works in accordance with generally accepted standards of audit & other such works. The report in this work is not investigative in nature. It is mere an opinion on the likely estimated valuation based on the facts & details presented to us by the client and third party market information came in front of us within the limited time of this assignment, which may vary from situation to situation.
18.	Where a sketched plan is attached to this report, it does not purport to represent accurate architectural plans. Sketch plans and photographs are provided as general illustrations only.
19.	Documents, information, data including title deeds provided to us during the course of this assessment by the client is reviewed only upto the extent required in relation to the scope of the work. No document has been reviewed beyond the scope of the work. These are not reviewed in terms of legal rights for which we do not have expertise. Wherever any information mentioned in this report is mentioned from the documents like owners name, etc., it is only for illustration purpose and may not necessary represent accuracy.
20.	The report assumes that the borrower/company/business/asset complies fully with relevant laws and regulations applicable in its area of operations and usage unless otherwise stated, and that the companies/business/assets is managed in a competent and responsible manner. Further, as specifically stated to the contrary, this report has given no consideration to matters of a legal nature, including issues of legal title and compliance with relevant laws, and litigations and other contingent liabilities that are not recorded/reflected in the documents/ details/ information/ data provided to us.
21.	This valuation report is not a qualification for accuracy of land boundaries, schedule (in physical terms), dimensions & identification. For this land/ property survey report can be sought from a qualified private or Govt. surveyor.
22.	This Valuation report is prepared based on the facts of the property on the date of the survey. Due to possible changes in market forces, socio-economic conditions, property conditions and circumstances, this valuation report can only be regarded as relevant as at the valuation date. Hence before financing, Banker/ FI should take into consideration all such future risk and should loan conservatively to keep the advanced money safe in case of the downward trend of the property value.
23.	Valuation of the same asset/ property can fetch different values under different circumstances & situations. For eg. Valuation of a running/ operational shop/ hotel/ factory will fetch better value and in case of closed shop/ hotel/ factory it will have considerable lower value. Similarly, an asset sold directly by an owner in the open market through free market transaction then it will fetch better value and if the same asset/ property is sold by any financier due to encumbrance on it, will fetch lower value. Hence before financing, Lender/ FI should take into consideration all such future risks while financing and take decision accordingly.
24.	Valuation is done for the property identified to us by the owner/ owner representative. At our end we have just visually matched the land boundaries, schedule (in physical terms) & dimensions of the property with reference to the documents produced for perusal. Method by which identification of the property is carried out is also mentioned in the report clearly. Responsibility of identifying the correct property to the Valuer/ its authorized surveyor is solely of the client/ owner for which Valuation has to be carried out. It is requested from the Bank to cross check from their own records/ information if this is the same property for which Valuation has to be carried out to ensure that owner has not misled the Valuer company or misrepresented the property due to any vested interest. Where there is a doubt about the precision position of the boundaries, schedule, dimensions of site & structures, it is recommended that a Licensed Surveyor be contacted.
25.	In India more than 70% of the geographical area is lying under rural/ remote/ non municipal/ unplanned area where the subject property is surrounded by vacant lands having no physical demarcation or having any display of property survey or municipal number / name plate on the property clearly. Even in old locations of towns, small cities & districts where property number is either not assigned or not displayed on the properties clearly and also due to the presence of multiple/ parallel departments due to which ownership/ rights/ illegal possession/ encroachment issues are rampant across India and due to these limitations at many occasions it becomes tough to identify the property with 100% surety from the available documents, information & site whereabouts and thus chances of error, misrepresentation by the borrower and margin of chances of error always persists in such cases. To avoid any such chances of error it is advised to the Bank to engage municipal/ revenue department officials to get the confirmation of the property to ensure that the property shown to Valuer/ Banker is the same as for which documents are provided.
26.	If this Valuation Report is prepared for the Flat/ dwelling unit situated in a Group Housing Society or Integrated Township then approvals, maps of the complete group housing society/ township is out of scope of this report and this report will be made for the specific unit based on the assumption that complete Group Housing Society/ Integrated Township and the subject unit must be approved in all respect.
27.	Due to fragmented & frequent change in building/ urban planning laws/ guidelines from time to time, different laws/ guidelines between regions/ states and no strict enforceability of Building Bye-Laws in India specially in non-metro and scale b & c cities & Industrial areas, property owners many times extend or make changes in the covered area/ layout from the approved/ applicable limits. There are also situations where properties are decades old when there was no formal Building Bye-Laws applicable the time when the construction must have been done. Due to such discrete/ unplanned development in many regions sometimes it becomes tough for the Valuer to determine the exact lawful situation on ground. Unless otherwise mentioned in the report, the covered area present on the site as per site survey will be considered in the Valuation.
28.	Area of the large land parcels of more than 2500 sq.mtr or of uneven shape in which there can be practical difficulty in sample measurement, is taken as per property documents which has been relied upon unless otherwise stated.
29.	Drawing Map, design & detailed estimation of the property/ building is out of scope of the Valuation services.
30.	Valuation is a subjective field and opinion may differ from consultant to consultant. To check the right opinion, it is important to evaluate the methodology adopted and various data point/ information/ factors/ assumption considered by the consultant which became the basis for the Valuation report before reaching to any conclusion.

31.	Although every scientific method has been employed in systematically arriving at the value, there is, therefore, no indisputable single value and the estimate of the value is normally expressed as falling within a likely range.
32.	Value analysis of any asset cannot be regarded as an exact science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgment. Given the same set of facts and using the same assumptions, expert opinions may differ due to the number of separate judgment decisions, which have to be made. Therefore, there can be no standard formula to establish an indisputable exchange ratio. In the event of a transaction, the actual transaction value achieved may be higher or lower than our indicative analysis of value depending upon the circumstances of the transaction. The knowledge, negotiability and motivations of the buyers and sellers, demand & supply prevailing in the market and the applicability of a discount or premium for control will also affect actual price achieved. Accordingly, our indicative analysis of value will not necessarily be the price at which any agreement proceeds. The final transaction price is something on which the parties themselves have to agree. However, our Valuation analysis can definitely help the stakeholders to take informed and wise decision about the Value of the asset and can help in facilitating the arm's length transaction.
33.	This Valuation is conducted based on the macro analysis of the asset/ property considering it in totality and not based on the micro, component, or item wise analysis. Analysis done is a general assessment and is not investigative in nature.
34.	This report is prepared on the RKA V-L1 (Basic) Valuation format as per the client requirement and scope of work. This report is having limited scope as per its fields & format to provide only the general estimated & indicative basic idea of the value of the property prevailing in the market based on the information provided by the client. No detailed analysis, audit or verification has been carried out of the subject property. There may be matters, other than those noted in this report, which might be relevant in the context of the transaction and which a wider scope might uncover.
35.	This is just an opinion report and doesn't hold any binding on anyone. It is requested from the concerned Client/ Bank/ Financial Institution which is using this report for mortgaging the property that they should consider all the different associated relevant & related factors & risks before taking any business decision based on the content of this report.
36.	All Pages of the report including annexures are signed and stamped from our office. In case any paper in the report is without stamp & signature then this should not be considered a valid paper issued from this office.
37.	As per IBA Guidelines & Bank Policy, in case the valuation report submitted by the valuer is not in order, the banks / FIs shall bring the same to the notice of the valuer within 15 days of submission for rectification and resubmission. In case no such communication is received, it shall be presumed that the valuation report has been accepted.
38.	Defect Liability Period is 15 DAYS. We request the concerned authorized reader of this report to check the contents, data, information, and calculations in the report within this period and intimate us in writing at valuers@rkassociates.org within 15 days of report delivery, if any corrections are required or in case of any other concern with the contents or opinion mentioned in the report. If no intimation is received within 15 (Fifteen) days in writing from the date of issuance of the report, then it shall be considered that the report is complete in all respect and has been accepted by the client upto their satisfaction & use and further to which R.K Associates shall not be held responsible in any manner. After this period no concern/ complaint/ proceedings in connection with the Valuation Services will be entertained due to possible change in situation and condition of the property.
39.	Though adequate care has been taken while preparing this report as per its scope, but still we can't rule out typing, human errors, over sightedness of any information or any other mistakes. Therefore, the concerned organization is advised to satisfy themselves that the report is complete & satisfactory in all respect. Intimation regarding any discrepancy shall be brought into our notice immediately. If no intimation is received within 15 (Fifteen) days in writing from the date of issuance of the report, to rectify these timely, then it shall be considered that the report is complete in all respect and has been accepted by the client upto their satisfaction & use and further to which R.K Associates shall not be held responsible in any manner.
40.	Our Data retention policy is of ONE YEAR . After this period we remove all the concerned records related to the assignment from our repository. No clarification or query can be answered after this period due to unavailability of the data.
41.	This Valuation report is governed by our (1) Internal Policies, Processes & Standard Operating Procedures, (2) R.K Associates Quality Policy, (3) Valuation & Survey Best Practices Guidelines formulated by management of R.K Associates, (4) Information input given to us by the customer and (4) Information/ Data/ Facts given to us by our field/ office technical team.
