Future minimum finance lease payments as at 31 March 2021 are as follows

	Less than 1 years	1 - 2 years	2 - 3 years	More than 3 years
Lease payment	40.39	41.80	43.20	12.86
Finance charge	16.29	11.53	5.61	0.81
Net present value	24.10	30.27	37.59	12.05

f) Total cash outflow for leases for the year ended 31 March 2022 was INR 40.39 lacs (March 31, 2021: INR 51.89 lacs)

The Company has leases for office spaces. With the exception of short-term leases, each lease is reflected on the balance sheet as a right-of-use asset and a lease liability.

Each lease generally imposes a restriction that, unless there is a contractual right for the Company to sublet the asset to another party, the right-of-use asset can only be used by the Company. For leases over office spaces, the Company must keep those properties in a good state of repair and return the properties in their original condition, except for normal wear and tear, at the end of the lease. Further, the Company must insure items of property, plant and equipment and incur maintenance fees on such items in accordance with the lease contracts.

The Company determines the leases term as either the non-cancellable period of the lease and any additional periods when there is an enforceable option to extend the lease and it is reasonably certain that the Company will extend the term, or a lease period in which it is reasonably certain that the Company will not exercise a right to terminate. The lease term is reassessed if there is a significant change in circumstances.

40 Employee benefit obligations

A) Defined contribution plans

The Company pays fixed contribution to provident fund and employee state insurance at predetermined rates and amount is recognised as expense and is charged to the statement of profit and loss. The contributions are made to registered provident fund administered by the government. The obligation of the Company is limited to the amount contributed and it has no further contractual nor any constructive obligation. The expense recognised during the period towards defined contribution plans is INR 66.53 lacs (31 March 2021: INR 53.87 lacs).

B) Defined benefit plans

Gratuity

The Company has a defined benefit gratuity plan. Every employee is entitled to gratuity as per the provisions of The Payment of Gratuity Act, 1972. The liability of gratuity is recognised in statement of profit and loss on actuarial basis.

	31 March 2022		31 March 2021	
	Current	Non-current	Current	Non-current
Gratuity	15.14	120.52	11.19	99.30
Compensated absences	25.23	111.09	20.71	92.85
Total	40.37	231.61	31.90	192.15

(i) Amount recognised in the statement of profit and loss is as under:

(vi) Sensitivity analysis for gratuity liability

	31 March 2022	31 March 2021
Impact of change in discount rate		
Present value of obligation at the end of the year	135.66	110.49
- Impact due to increase of 0.50 %	(2.93)	(2.93)
- Impact due to decrease of 0.50 %	3.08	3.08
Impact of change in salary increase		
Present value of obligation at the end of the year	110.49	110.49
- Impact due to increase of 0.50 %	3.12	3.12
- Impact due to decrease of 0.50 %	(2.99)	(2.99)

The above sensitivity analysis is based on a change an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied which was applied while calculating the defined benefit obligation liability recognised in the balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous year.

(vii) Maturity profile of defined benefit obligation

Within next 12 months	15.14	11.19
Between 1-5 years	45.59	45.59
Beyond 5 years	63.71	63.71

C) Compensated absences

Amount recognised in the statement of profit and loss is as under:

Current service cost	32.50	34.97
Interest cost	7.68	4.99
Actuarial loss/(gain) recognised during the year	6.23	12.13

41 Fair value disclosures

i) Fair values hierarchy

Financial assets and financial liabilities measured at fair value in the statement of financial position are divided into three Levels of a fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: Quoted prices (unadjusted) in active markets for financial instruments.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data rely as little as possible on entity specific estimates.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

(ii) Fair value of instruments measured at amortised cost

Fair value of instruments measured at amortised cost for which fair value is disclosed is as follows:

	Level	31 March 2022		31 March 2021	
		Carrying value	Fair value	Carrying value	Fair value
Financial assets					
Trade receivables	Level 3	2,523.17	2,523.17	3,080.74	3,080.74
Cash and cash equivalents	Level 3	1,748.38	1,748.38	537.02	537.02
Other financial assets	Level 3	353.39	353.39	353.81	353.81
Total financial assets		4,624.94	4,624.94	3,971.57	3,971.57
Financial liabilities					
Borrowings	Level 3	34,924.66	34,924.66	31,477.77	31,477.77
Trade payables	Level 3	2,428.84	2,428.84	1,730.05	1,730.05
Other financial liabilities	Level 3	2,802.13	2,802.13	2,993.92	2,993.92
Lease liabilities	Level 3	79.91	79.91	104.01	104.01
Total financial liabilities		40,235.54	40,235.54	36,305.75	36,305.75

The management assessed that cash and cash equivalents, other bank balances, trade receivables, other current financial assets, trade payables, short term borrowings and other current financial liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. For long-term financial assets and liabilities, there was not a significant change in the interest rates, hence fair value is same as the carrying value.

ii) Risk management

The Company's activities expose it to market risk, liquidity risk and credit risk. The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. This note explains the sources of risk which the entity is exposed to and how the entity manages the risk and the related impact in the financial statements.

Risk	Exposure arising from	Measurement	Management
Credit risk	Cash and cash equivalents, trade receivables, financial assets	Ageing analysis	Bank deposits, diversification of asset base, credit limits and collateral.
Liquidity risk	Borrowings and other liabilities	Rolling cash flow forecasts	Availability of committed credit lines and borrowing facilities
Market risk - foreign exchange	Recognised financial assets and liabilities not denominated in Indian rupee (INR)	Cash flow forecasting	Forward contract/hedging, if required
Market risk - interest rate	Long-term and short-term borrowings at variable rates	Sensitivity analysis	Negotiation of terms that reflect the market factors

The Company's risk management is carried out by a central treasury department (of the Company) under policies approved by the board of directors. The board of directors provides principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk and investment of excess liquidity.

Summary of significant accounting policies and other explanatory information for the year ended 31 March 2022
(All amount in INR lacs unless stated otherwise)

A) Credit risk

Credit risk is the risk that a counterparty fails to discharge an obligation to the Company. The Company is exposed to this risk for various financial instruments, for example by granting loans and receivables to customers, placing deposits, etc. The Company's maximum exposure to credit risk is limited to the carrying amount of following types of financial assets.

- cash and cash equivalents,
- trade receivables,
- loans and receivables carried at amortised cost and
- deposits with banks

a) Credit risk management

The Company assesses and manages credit risk based on internal credit rating system, continuously monitoring defaults of customers and other counterparties, identified either individually or by the Company, and incorporates this information into its credit risk controls. Internal credit rating is performed for each class of financial instruments with different characteristics. The Company assigns the following credit ratings to each class of financial assets based on the assumptions, inputs and factors specific to the class of financial assets.

- A: Low
- B: Medium
- C: High

Assets under credit risk –

	Credit rating	31 March 2022	31 March 2021
Other financial assets	Low	353.39	353.81
Cash and cash equivalents	Low	1,741.45	529.07
Trade receivables	Low	2,523.17	3,080.74

Cash and cash equivalents and bank deposits

Credit risk related to cash and cash equivalents and bank deposits is managed by only accepting highly rated banks and diversifying bank deposits and accounts in different banks.

Trade receivables

The Company has trade receivables primarily from government authority (i.e. Delhi Jal Board). Credit risk related to these receivables is expected to be very low and managed by monitoring the recoverability of such amounts continuously.

Other financial assets measured at amortised cost

Other financial assets measured at amortised cost includes advances to employees, security deposits and others. Credit risk related to these other financial assets is managed by monitoring the recoverability of such amounts continuously, while at the same time internal control system in place ensure the amounts are within defined limits.

b) Expected credit losses

(i) Trade receivables

The Company is engaged in infrastructure development business under Build-Operate-Transfer ("BOT") and design, build, finance, operate and transfer (DBFOT) project and currently derive its revenue primarily from the charges receivables from Delhi Jal Board ('DJB'). The credit risk with respect to such receivables from government institutions is expected to be very low and hence, no provision for expected credit loss is deemed necessary. Further, during the periods presented, the Company has made no write-offs of receivables.

(ii) Other financial assets measured at amortised cost

The Company provides for expected credit losses on loans and advances by assessing individual financial instruments for expectation of any credit losses. Since this category includes loans and receivables of varied natures and purpose, there is no trend that the Company can draw to apply consistently to entire population. For such financial assets, the Company's policy is to provide for 12 month expected credit losses upon initial recognition and provides for lifetime expected credit losses upon significant increase in credit risk. The Company does not have any expected loss based impairment recognised on such assets considering their low credit risk nature, though incurred loss provisions are disclosed under each sub-category of such financial assets.

B) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due. Due to the nature of the business, the Company maintains flexibility in funding by maintaining availability under committed facilities. Management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows. The Company takes into account the liquidity of the market in which the entity operates. In addition, the Company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

a) Maturities of financial liabilities

The tables below analyse the Company's financial liabilities into relevant maturity based on their contractual maturities for all non-derivative financial liabilities.

The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

C) Market risk

a) Interest rate risk

i) Liabilities

The Company's policy is to minimise interest rate cash flow risk exposures on long-term financing. The Company is exposed to changes in market interest rates through bank borrowings at variable interest rates. The Company's investments in fixed deposits all pay fixed interest rates.

Interest rate risk exposure

Below is the overall exposure of the Company to interest rate risk:

Particulars	31 March 2022	31 March 2021
Variable rate borrowing	19,899.65	16,028.52
Fixed rate borrowing	17,461.25	15,449.25
Total borrowings	37,360.90	31,477.77
Amount disclosed under other current financial liabilities and short-term borrowings	2,819.82	1,423.87
Amount disclosed under borrowings	34,541.08	30,053.90

Sensitivity

Below is the sensitivity of profit or loss and equity changes in interest rates.

Particulars	31 March 2022	31 March 2021
Interest sensitivity*		
Interest rates – Increase by 100 bps (31 March 2021 100 bps)*	199.00	160.29
Interest rates – decrease by 100 bps (31 March 2021 100 bps)*	(199.00)	(160.29)

*Holding all other variables constant

ii) Assets

The Company's fixed deposits are carried at amortised cost and are fixed rate deposits. They are therefore not subject to interest rate risk as defined in Ind AS 107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

b) Price risk

The Company does not have any significant investments in equity instruments which create an exposure to price risk.

43 Capital management

The Company's capital management objectives are

- to ensure the Company's ability to continue as a going concern
- to provide an adequate return to shareholders

The Company monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of balance sheet.

Management assesses the Company's capital requirements in order to maintain an efficient overall financing structure while avoiding excessive leverage. This takes into account the subordination levels of the Company's various classes of debt. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt.

- ii) The actual concession period may vary based on terms of the respective concession agreements.

45 Subsequent to the balance sheet on 26 August 2022, Administrator appointed by RBI for SREI Equipment Finance Limited ('SREI'), a lender of the Company, filed an application with National Company Law Tribunal ('NCLT') alleging certain matters including related party relationship between the Company and SREI, non-compliance of credit evaluation policies by SREI for granting loan to the Company. The Administrator also plead to NCLT that the Company should pay entire outstanding of Rs. 10633 lakhs to SREI on immediate basis. The management of the Company obtained a legal opinion from an external legal council and based on which the management believes that the Company does not have any related party relationship under the IBC Code, 2016 or the B99Act 2013 with any of the respondents to the aforesaid application and has strong legal ground for favorable conclusion in NCLT and there shall not be any requirement to repay the dues immediately. The matter is sub-judice with NCLT with next date of hearing on 21 December 2022.

46 The Company has obtained loan facilities from Bank of India (BOI) and SREI (SREI and BOI together referred as 'the lenders') for project work. The Company made defaults and delaying in paying dues to the lenders over the previous year and in the period subsequent to the balance sheet also. Also, as stated in note 45 above, the Administrator of SREI has filed an application with NCLT demanding all outstanding from the Company. The management is in active discussion with lenders for restructuring the loan facilities. Subsequent to the balance sheet date, the Company submitted restructuring proposal to the lenders which is under evaluation of lenders. In the meetings between lenders and the management of the Company happened wherein the lenders have shown interest in restructuring of loan facilities. The evaluation of proposal is not yet concluded by the lenders, however, the management is hopeful of favorable resolution and accordingly the loan facilities are presented as non-current and current in the financial statements based on the last approved repayment schedule.

- 47 Pursuant to concession agreement entered between the Company and Delhi Jal Board (DJB), the Company has Intangible assets 'Licence to charge grantor for water supply' which the management has obtained for the period of 15 years ending in September 2028. The project activities are majorly complete and the same has already been started to amortised in previous year. The Company has incurred losses in the current year of Rs. 7,318.80 lakhs and the net worth is fully eroded by Rs 12,313.69 lakhs. The Company is unable to meet its cash flow projection in the year and as stated in note 46 above, the Company is also defaulting on debt payment obligation to the lenders.

In view of the above, there is an uncertainty in generating sufficient cash flows to meet the obligations and that may cast significant doubt on the Company's ability to continue as a going concern due to which the Company may not be able to realize its assets and discharge its liabilities in the normal course of business. However, the monthly revenue from operations in period from April 2022 to September 2022 is around Rs. 565 lakhs which is around 20% higher than the revenue of FY 2021-22. As stated in note 46 above, the lenders of the Company are evaluating the restructuring proposal submitted by the Company. The management has also requested to DJB for granting extension of the concession period of 15 years which is due to be completed in September 2028. Further, the shareholders of the Company are willing to support to the extent possible. Considering this, the management is of the view that going concern for the purpose of accounting is appropriate.

- 48 As stated in note 47 above, the Company is not able to meet its cash flow projections and is defaulting in paying dues to the lenders. As stated in the said note, the management is taking various measures to ensure sufficient cash flows generation for meeting the obligation as and when fall due. The management is expecting to get the extension on concession period of 15 years which would expire in September 2028. Further, based on estimated future projections, the management of Company is of view that the project shall be able to generate the sufficient cash flows to realise its value and paying all dues to lenders and other operational creditors. Hence, in views of the management, there is no need to impair the intangible rights.
