

VILL. AKBAHFUR UD

SITE PLAN

KHASRA NO. 52B

RAIL WATER HARVESTING TANKS

1. The first step is to identify the problem. In this case, the problem is that the system is not working properly.

2. The next step is to gather information about the problem. This includes checking the logs, looking at the error messages, and talking to the users.

3. Once you have gathered the information, you can start to troubleshoot the problem. This involves checking the configuration, testing the code, and looking for any recent changes.

4. If you are still having trouble, you may need to consult with a specialist or a support team. They can provide you with more information and help you to solve the problem.

5. Finally, once you have solved the problem, you should document the solution. This will help you to avoid the problem in the future and will be useful for other people who may have the same problem.
